

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. P R E F A C E.

JUDGING by opinions expressed both by the Press and by private individuals, there is reason to believe that the narrative of Sir Hope Grant's military services in 'Incidents in the Sepoy War' has been read with some little interest. Sir Hope Grant has therefore once more been persuaded to intrust to me his private journals and his correspondence relating to the China War of 1860, and has allowed me to publish such portions as appeared to me to merit special attention.

It is necessary to explain that, in accordance with the General's directions, I have abstained from narrating certain facts, and from inserting certain correspondence, closely affecting public individuals still living; and this reservation has particularly applied to the share taken in the campaign by our French allies. Even with this drawback, however, it has appeared to me desirable to make further public the little-known

61-21-39 52

incidents of the war, and the little-realised successes then achieved by our troops, ere an additional lapse of years shall have entailed on the subject the proverbial indifference belonging to the feats of a bygone age.

This book has no pretensions to being a complete history of the Expedition. As in the case of 'Incidents in the Sepoy War,' the present diary was no after-thought composition. Day after day the events of the preceding twenty-four hours were committed to paper while fresh in the writer's memory.

HENRY KNOLLYS,

CAPTAIN ROYAL ARTILLERY.

17 EATON SQUARE, LONDON,

February, 1875.

P O S T S C R I P T.

During the interval between the delivery of the manuscript of this volume to Messrs Blackwood and its publication, Sir Hope Grant died March 7, 1875. During the month of February however, he went over with me, carefully

proof-sheets; and as he was then in the same possession of his mental faculties as though he were in perfect health, it may with certainty be asserted that this book contains precisely the same matter the General would have desired had he lived to witness its publication.

THE EAST COAST OF CHINA,	I
SKETCH OF THE OPERATIONS BETWEEN THE 1ST AND 21ST AUGUST 1860,	51
PLAN OF THE COUNTRY BETWEEN PEKIN AND THE GULF OF PECHILI,	<i>at the end</i>

CONTENTS.

CHAPTER I.

JOURNAL.

	PAGE
Sir Hope Grant appointed to command China Expedition—	
Sir William Mansfield declines post of second in command—	
Arrival at Hong-Kong—Acquisition of Kowloon—Expedient for quieting Canton—Proceeds to Shanghai—War declared—Consultation with French concerning plan of operations—Seizure of Chusan—Interview with mandarins—How to allot quarters—The French and the flag-staff—Return to Hong-Kong—Composition of the English expedition—Delay on the part of the French—Their want of transport—English troops sail for Gulf of Pechili—The new Armstrong guns—Remarks by the Editor—Letters and returns,	1-32

CHAPTER II.

Sails for Shanghai—Conference with the French—Sir Hope Grant's and General de Montauban's respective plans of attack—Delay on part of French—Deplorable condition of China—General Ignatieff—Visits Wei-hei-wei and Che-foo—The new French gun—Disembarkation of British troops at Ta-lien-wan—Arrival of Lord Elgin—Sir Hope

again urges on General de Montauban the necessity for quickly beginning active operations—Splendid condition of our troops—Inspection by French—General de Montauban abandons his original plan, and resolves to act with us in attack on Peh-tang—Embarkation of troops for Peh-tang—Strength of force,

CHAPTER III.

Disembarkation near Peh-tang—Advance through the mud—Surrender of the town—The hidden shells—Tales of violence—Dread of fire—Reconnaissance and search for water—Sir Hope Grant resolves to continue march, and General de Montauban at length acquiesces—Measures for attacking the Sin-ho forts—Fresh struggles through the mud—Gallant attack of Tartar cavalry against Stirling's guns—Repulsed by Probyn's Horse—Capture of the Sin-ho forts—French advance against Tang-ku, but are forced to retire—Prisoners captured by the Tartars—Attack and capture by the allies of Tang-ku on 14th August—Incidents in the engagement—Despatch from Lord Elgin, 5.

CHAPTER IV.

Description of the small north Taku fort—Petitions for peace—General de Montauban's plan of attack—His formal letter of remonstrance against Sir Hope Grant's scheme, to which he finally yields upon protest—Cannonade against the fort—Explosion of magazine—The storming and capture of the Taku fort—Bravery of the Chinese—Capture of the large north fort—Surrender of the southern forts—Admiral Hope steams with his gunboats up to Tien-tsin—Sir Hope Grant proceeds there likewise—The inhabitants conciliated—Chinese rebels threaten Shanghai—Arrival of plenipotentiaries at Tien-tsin—Comfortable quarters—Remarks by the editor on the plan of attack on the Taku Forts, . . . 74·1

CHAPTER V.

March from Tien-tsin to Ho-si-wu—Concentration of troops at latter place—Chinese open negotiations for peace—Advance towards Chan-chia-wan—Symptoms of treachery—Hairbreadth escape of Colonel Walker's party—Allies resolve to attack Chinese army—Engagement of Chan-chia-wan—Probyn's charge—Demand for the release of the envoys—Sir Robert Napier ordered up from Ho-si-wu—Engagement at Pa-le-chiao—Sir Hope Grant nearly captured by Tartar cavalry—Charge of English cavalry—Gallant French attack on canal bridge—Chinese overtures for peace—Allies refuse to treat until the envoys are given up—Probyn's reconnaissance—General Ignatieff lends a map of Peking—Diversity of opinion between allied commanders-in-chief as to true point of attack of Peking—Arrival of Sir Robert Napier's division at Tang-chow—Siege-train comes up—Probyn's second reconnaissance—The allied ultimatum—Intermediate depots established—Letters from Parkes—Further advance—French "miss" our track—Fruitless search for them—They are discovered at the Summer Palace—Sir Hope visits Summer Palace—Looting—Chinese consent to release the envoys, who return to camp—Their sad story—Hospital returns—Description of Peking, . . . 101-136

CHAPTER VI.

Letters from Lord Herbert—Chinese official correspondence relating to the war, 137-189

CHAPTER VII.

British troops directed to give up "loot" from Summer Palace—Their ready compliance—Auction to insure an equal division—Subsequent confirmation of the step by the Home Government—Han-ki's search for the governor of the Sum-

mer Palace—Establishment of batteries to breach Pek walls—Inhabitants warned of approaching conflict—Prince Kung's complaint of the looting of the palace—He promises that our terms shall be agreed to—The prisoners given up—Detail of the batteries—Extraordinary strength of the walls—Funerals of the murdered prisoners—Burning of the Summer Palace—Rumours of treachery, and Probyn's consequent reconnaissance—Entry of Sir Hope Grant, Lord Elgin, and British troops into Peking—The signing of the treaty—Prince Kung's terror of the photographic apparatus—Preparations for departure—The town of Peking—The troops begin their return march to Tien-tsin and Taku—Remarks by the editor on the march to, and destruction of, the Summer Palace—Results attained by the war, 196

CHAPTER VIII.

JOURNAL OF A VISIT TO JAPAN.

Sir Hope Grant sails for Japan—Arrives at Yokohama—Proceeds to Yedo—Arrest of the Jew—Description of Mr Alcock's residence—The feudal power—The Daimios and the Government—Murder of the Tycoon—The royal conjuror—Prosperity of Japan—Visit to the Japanese ministers—Dwellings of the Daimios—System of universal espionage—Japanese defences—Their knowledge of war—Return voyage to Hong-Kong—The Granada nearly founders—Shipwrecked Malays—Leave to return to England—Interview with Napoleon—Funeral of the Emperor, 228-25

APPENDIX, 252-26

INCIDENTS
IN THE
CHINA WAR OF 1860.

CHAPTER I.

JOURNAL.

SIR HOPE GRANT APPOINTED TO COMMAND CHINA EXPEDITION—SIR WILLIAM MANSFIELD DECLINES POST OF SECOND IN COMMAND—ARRIVAL AT HONG-KONG—ACQUISITION OF KOWLOON—EXPEDIENT FOR QUIETING CANTON—PROCEEDS TO SHANGHAI—WAR DECLARED—CONSULTATION WITH FRENCH CONCERNING PLAN OF OPERATIONS—SEIZURE OF CHUSAN—INTERVIEW WITH MANDARINS—HOW TO ALLOT QUARTERS—THE FRENCH AND THE FLAG-STAFF—RETURN TO HONG-KONG—COMPOSITION OF THE ENGLISH EXPEDITION—DELAY ON THE PART OF THE FRENCH—THEIR WANT OF TRANSPORT—ENGLISH TROOPS SAIL FOR GULF OF PECHILI—THE NEW ARMSTRONG GUNS—REMARKS BY THE EDITOR—LETTERS AND RETURNS.

IN consequence of the severe reverses we had met with in the attack on the Peiho Forts in 1859, the English Government determined to

send out an expedition to China to demand redress, and to secure the provisions of the treaties made by the Earl of Elgin¹ and Baron Gros² respectively on 26th and 27th June 1858. The French likewise resolved to despatch a force to act in conjunction with ourselves.

Her Majesty, on the recommendation of his Royal Highness the Duke of Cambridge, was pleased to nominate me to the command of the British troops, with the rank of Lieutenant-General—a mark of favour which I appreciated the more, because I had sought for it neither directly nor indirectly. Indeed, I heard from home that, in the first instance, Sir Charles Wood,³ Secretary of State for India, had offered great opposition to my appointment, and had requested that Sir William Mansfield,⁴ whom he considered much superior to myself, might be selected instead. But the Duke urged my fitness for the command, and at the same time pointed out the injustice of passing over a senior and competent officer who, his Royal Highness was

¹ Afterwards Governor-General of India ; died 1863.

² Since dead.

³ Now Viscount Halifax.

⁴ Now General Lord Sandhurst, G.C.B., commanding the force in Ireland

good enough to say, had always done his duty.

I received private letters from the Duke, and from Mr Sidney Herbert,¹ Secretary of State for War, notifying to me my appointment, and explaining that Sir William Mansfield would be nominated my second in command, in consequence of his being a first-rate diplomatist and French scholar. Mansfield and myself had always been the best of friends, and I felt sure that we should continue to work together harmoniously; but it was hardly to be expected that he would consent to act as my junior, for he was considerably senior to me as a local Major-General, though below me in army rank. Accordingly, in course of time, he wrote to tell me that he had declined the appointment, provided the Government approved of his refusal. I replied that I thought the view he had taken of the matter a mistaken one; but, of course, he adhered to his opinion, which was subsequently fully endorsed by the home authorities. On 26th February 1860, I sailed on board the screw-steamer *Fiery Cross* from Calcutta for Hong-Kong, where we arrived on 13th March. Admiral

¹ Afterwards Lord Herbert; died 1862.

Hope,¹ who was there in command of the fleet, carried his flag on board the Chesapeake, and I at once proceeded to make his acquaintance. He was a tall noble-looking man, with a prepossessing and most gentlemanlike appearance, and we were not long in becoming excellent friends. From him I learnt that Lieutenant-General Cousin de Montauban,² the French military commander-in-chief, had gone to Shanghai, but that their senior naval officer, Admiral Page, was living on shore at Hong-Kong. I was most hospitably welcomed at Government House by the governor, Sir Hercules Robinson,³ whose residence was beautifully furnished in English fashion, and well warmed with blazing coal-fires. Although we were in the same latitude as in Calcutta, the climate was entirely different—in Hong-Kong the weather in March was bitterly cold.

On the opposite coast, and within three-quarters of a mile of Victoria, was the promontory of Kowloon, a spot of which I was most anxious to gain im-

¹ Now Admiral Sir James Hope, G.C.B.

² Now Count Palikao. After the fall of the Ollivier Ministry in July 1870, he was head of the Government, until the battle of Sedan, September 1, 1870, overthrew the French Empire.

³ Now Sir Hercules Robinson, K.C.M.G., Governor and Commander-in-Chief of New South Wales.

mediate possession—firstly, because its occupation was absolutely essential for the defence of Hong-Kong harbour and the town of Victoria ; secondly, because it was an open healthy spot, admirably suited for a camping-ground on the arrival of our troops ; thirdly, because at the conclusion of the war it would be a salubrious site for the erection of barracks, required for the Hong-Kong garrison ; and lastly, because if we did not take it, the French probably would. This tract was about two miles in length and two miles in breadth, and was particularly healthy, owing to its being exposed to the south-west monsoon. There were, however, difficulties in the way. Mr Bruce,¹ our plenipotentiary, had sent an ultimatum to the Chinese Government, allowing them a month to reply, and war had not as yet been actually declared ; so the forcible seizure of the promontory would not have been quite legal. Meanwhile, Mr Bruce directed Sir Hercules Robinson to apply to the governor of the two large provinces of Kwang-tung and Kwang-si, for a lease of a portion of the ground, about two square miles in extent. The mandarin governor was at that

¹ The Hon. Sir Frederick Bruce, G.C.B., British Minister in the United States, died 1867.

time resident in Canton; and Sir Hercules Robinson charged our consul at that town, Mr Parkes,¹ a clear-headed and able young man, with all his wits about him, to take steps for the attainment of our object. This, to my surprise and satisfaction, he accomplished most successfully. The mandarin agreed to give us a lease of Kowloon, together with "Stone-Cutter's Island," in perpetuity, on our engaging to pay a yearly rent of £160. Of course we instantly closed with these terms, and the lease was signed by both parties. On 18th March, the promontory was occupied by a detachment of the 44th Regiment. The 8th April was the day fixed on for the reply to our ultimatum; and I decided that if war were declared I would at once despatch a force of 2000 men, comprising 67th and 99th Regiments, Rotton's battery of artillery, and a company of Engineers, &c., to take possession of Chusan, which would serve as a base of operations. Admiral Hope agreed to aid me with 600 marines; and Admiral Page, with the permission of General de Montauban, likewise promised to send 500 marines and sailors. The French regulation

¹ Now Sir Harry Parkes, K.C.B., Envoy Extraordinary Minister Plenipotentiary in Japan.

differ from our own with regard to command when the sea and land forces co-operate. The military officer, if he happens to be the senior, is empowered to employ the navy as he thinks fit, and *vice versa*.

I was anxious to start at once for Shanghai, that I might proceed without delay to Chusan, should the answer to our ultimatum prove unfavourable; and Admiral Hope placed at my disposal a nice little steamer of about 800 tons called the Granada. Before setting off, I paid a visit to the town of Canton, where were stationed the 3d Buffs, the 67th Queen's, and the 65th and 70th native infantry regiments, under Major-General Sir Charles Straubenzee,¹ who had commanded the troops in China previous to my arrival, but who was now about to return to England—a very gentlemanlike active officer, and young for his rank.

Canton had been in a very disturbed state for some time; and on one occasion a gingal had been fired by some Chinese in concealment upon a party of fourteen military police as they were going their rounds, killing seven of their

¹ Now Lieut.-General Sir Charles Straubenzee, K. C. B., Governor and Commander-in-Chief of Malta.

number ; whereupon the General, in reprisal, demolished the whole street in which the outrage had taken place, and thus effectually put a stop to a repetition of such occurrences. Canton was now very fairly quiet ; and Lady Straubensee, Mrs Straubensee, wife of the aide-de-camp, and my wife, were carried in sedan chairs through the crowded streets and by-lanes without meeting with any incivility. On 31st March 1860, we set sail from Hong-Kong for Shanghai, where we arrived on 6th April ; and I at once went to call on General de Montauban and Mr Bruce. The latter was our plenipotentiary in China ; but his brother, Lord Elgin, was shortly expected to take over the management of affairs during the war.

I had formerly known Frederick Bruce well. In disposition he was a fine, upright, honourable fellow, and in appearance tall and strong made, with a remarkably good expression of countenance. I was sorry to find that the chief diplomatic power was to be taken out of his hands ; but Lord Elgin had more experience, and had been in China before. General de Montauban was a fine handsome, soldier-like-looking man, appeared under sixty years of age, with a pleasant ex-

sion, and in general appearance quite the "beau sabreur."

On 8th April, the official reply to our ultimatum arrived from Peking, and was "cheeky" in the extreme, refusing point-blank all our demands. No doubt one reason for this was that our conditions were too moderate, and led the Chinese Government to think that we were frightened. Their answer was, however, quite what we expected, and war was at once declared.¹ [The following are the concluding words of the Chinese official reply: "The despatch written on this occasion is in much of its language too insubordinate and extravagant for the Council to discuss its propositions more than superficially. For the future the British Minister must not be so wanting in decorum. . . . It will behove (him) not to adhere obstinately to his own opinion, as so doing he will give cause to much trouble hereafter."]

On 14th April, Mr Bruce, Monsieur Bourboulon,² the French plenipotentiary — afterwards succeeded by Baron Gros—General de Montauban, Admiral Page, who had arrived from Shanghai, Admiral Jones,³ second in command to Admiral

¹ See despatch at end of chapter.

² Since dead.

³ Now Admiral Sir Lewis Jones, G.C.B.

Hope, and myself, assembled to arrange about the preliminaries of the war, and to decide on a few points bearing on the blockade of the Gulf of Pechili, and the immediate occupation of Chusan. We all agreed that it would be inexpedient to blockade the gulf—the war was not being waged against the poor inhabitants; we had not thought it necessary to seize their junks; and indeed, had we done so, our interests would probably have suffered more than those of the Chinese Government. We were likewise unanimous, with the exception of General de Montauban, in favour of immediately seizing Chusan. The French general, however, objected so strongly, that our conference lasted three hours ere we could reconcile our differences of opinion.

On 18th April, we set sail with the troops I have before mentioned¹ for Chusan, and the next day anchored at King-tang, at the mouth of the river Ningpo, the appointed rendezvous of our little force. On 20th, all our vessels got under way, some towed by steamers, and the rest sailing vessels, and on 21st we entered the beautiful harbour of Chusan. The batteries had all been

¹ See page 6. The numbers were 2000 English, and about 200 French marines.

dismantled since the last war in 1841, and no opposition was offered to us. A summons was at once sent to the chief mandarin to surrender to us quietly the town of Ting-hai¹ and the island; and it was also explained that all we required in addition was that the Chinese military forces should deliver up to us their arms and guns, which would be kept in safety and returned to them at the conclusion of the war. Mr Parkes, a very fearless man, was appointed our interpreter, and was sent into the town with the summons, and with instructions to endeavour to persuade the chief mandarins to come on board ship. Accordingly, in about a couple of hours he returned to the Granada, accompanied by the two chief men, a military and a civil representative. I notified their arrival to Admiral Page, and he at once joined our conference. The poor mandarins were humble and submissive, chiefly owing, I believe, to the kind manner with which they had been formerly treated when our people held possession of their island. But I was much vexed with the French admiral, whose manner to the Chinese was harsh and overbearing. They soon came to terms, and agreed to all our demands; and after

¹ The population of which was 400,000.

disposing of a good number of glasses of cherry brandy, they took their departure.

The next difficulty was in housing our troops. The French, after all, only brought with them about 200 marines, and Admiral Page had selected a joss-house at the north gate, near the French Roman Catholic mission, which had for a long time been established there. I supposed, therefore, that they were all comfortably located; and I forthwith allotted the other available buildings in the town to my own troops, of which I had over a thousand to every hundred of the French. I then went with Admiral Jones to Admiral Page's ship, and laid before him my proposed detail. He looked askance at the paper for some time, and I perceived that an explosion was gurgling up. "What is this I see?" he broke out at last; "nine, ten, eleven, twelve places for your men, and I have not one! I will not stand this. No, no; this must not be;" and he got up and stamped about the room as if I had grossly insulted him. I laughed, let his excitement calm down, and then asked him what he wanted. I told him I was most anxious to meet his wishes; but that in consequence of the number of troops I had with me it was necessary for me to avail myself of all the accommodati

which he did not himself require, and that notwithstanding all my efforts, I had still been compelled to leave the 67th Regiment on board ship. "Only write down," I wound up by saying, "what you require." He flew to pen, ink, and paper, put his hand to his head, and began to consider. At length, after some deliberation, he wrote down that he required a building for the officer commanding the French marines, and a small hospital. Of course I instantly acceded to his demand. We also agreed that the joss-house on the hill, a building invested with a sort of official dignity, should be occupied by a force of twenty men from the English and French troops. And here another difficulty arose. Under such circumstances, custom prescribes that the national ensigns shall be hoisted. The French got hold of a good long pole and fixed their flag to it. Our men, after considerable difficulty and search, laid their hands on a stout beam which was considerably loftier, and from the top of which our standard floated in the breeze as if looking down contemptuously on its ally. I have no doubt that herein our seamen were actuated by some little malicious feeling; but the commotion created amongst our allies did not tend to promote the good feeling which I was so

anxious to establish. At last the French soothed their feelings by hoisting their banner on a still higher beam, and the rivalry of the poles ceased.

All these small troubles having been at last smoothed over, on 23d April I set sail¹ and returned to Hong-Kong, where there was a great deal of work awaiting me. Admiral Hope was an excellent officer and a first-rate colleague, and we got on together admirably. Nearly all our force was now concentrated on the newly-acquired promontory of Kowloon. Its composition was as follows :²—

Queen's Regiments.

Infantry, six battalions.

King's Dragoon Guards.

Military Train.

Royal Artillery—5 field-batteries and 2 siege-batteries ; the whole under the command of Brigadier Crofton, R.A.³

¹ A small garrison was left behind to hold Chusan.

² For detailed return see p. 29. In addition, there were the 87th Regiment, the 13th Punjaub Infantry, some marines, &c., stationed at various garrisons.

³ Major-General Crofton died 1863.

Royal Engineers—3 companies, under Colonel Mann, R.E.¹

Native Troops.

Sikhs—Loodianah Regiment.

4 regiments of Punjaub infantry.

Madras Sappers.

A company of Goolundaz.²

2 Bombay native infantry regiments.

21st Madras Native Infantry Regiment.

2 Irregular Sikh cavalry regiments.

The total strength was 13,116 men, of whom about 1000 were cavalry.

The two irregular cavalry regiments were really magnificent. They were composed of fine handsome men—Sikhs—becomingly dressed, well mounted, and commanded by two excellent officers—Major Fane³ and Major Probyn,⁴ both of whom I had known well in India during the Mutiny. The

¹ Now Colonel Mann, C.B., commanding Royal Engineers at Malta.

² Native Sappers.

³ Now Lieut.-Colonel Fane, C.B., Commandant of the 19th Bengal Cavalry (late Fane's Horse). An irregular cavalry officer of great repute during the Indian Mutiny.

⁴ Now Major-General Probyn, V.C., C.B. The services of this

King's Dragoon Guards was also one of the finest regiments in the service; and, altogether, I had reason to be proud of my little cavalry force. It was commanded by Brigadier Pattle,¹ of the King's Dragoon Guards.

My staff consisted of Colonel Stephenson,² Scots Fusilier Guards, Deputy Adjutant-General. I consider myself most fortunate in this appointment, as not only was he in every respect a first-rate staff officer, but he possessed a peculiarly conciliatory manner, which smoothed over many difficulties, and specially qualified him for the post of an adjutant-general.

Major Hon. C. Dormer,³ Assistant Adjutant-General.

distinguished cavalry officer are almost historical, especially in the annals of Indian military operations, where, during the Mutiny, his exploits mark him as the beau-ideal of a leader of irregular horse. (*Vide* 'Incidents of the Sepoy War.') After the China campaign, he held various appointments, his last post being Commandant of the Central Indian Horse, and Political Agent in West Malwa. On returning to England, he was gazetted in 1872 Equerry to His Royal Highness the Prince of Wales.

¹ Now Major-General Pattle, C.B.

² Now Major-General F. C. A. Stephenson, C.B., to whom this volume is dedicated.

³ Now Lieut.-Colonel Dormer, Assistant Adjutant-General, Dover.

Major Taylor,¹ Deputy Assistant Adjutant-General.

Colonel Kenneth Mackenzie,² Deputy Quartermaster-General. This skilful and valuable officer performed his onerous duties with a judgment and ability which merited my warmest approbation.

Colonel Ross,³ Assistant Quartermaster-General.

Lieut.-Colonel Wolseley,⁴ Deputy Assistant Quartermaster-General—a very excellent officer.

Dr Muir,⁵ principal medical officer. A great deal of responsibility devolved on him, and he performed his duties with great zeal and ability.

Major Reboul⁶ was appointed French Com-

² Colonel Mackenzie, C.B., late Assistant Quartermaster-General, Horse Guards, died from the results of an accident met with while fording a river, in the performance of his duties during the Dartmoor manœuvres of 1873.

³ Since dead.

⁴ Now Major-General Sir Garnet Wolseley, K.C.B., K.C.M.G. Inspector-General of Auxiliary Forces.

⁵ Now Sir William Muir, K.C.B., Director-General of the Medical Department.

⁶ Major Reboul was afterwards appointed to the Chasseurs of the Guards, and was taken prisoner at the battle of Sedan, Sep-

missioner with the English headquarters. He was a very agreeable gentlemanlike officer, and spoke English like an Englishman.

Lieutenant Biddulph,¹ Royal Artillery, was my military secretary. He carried on the duties of this responsible position with zeal and ability, and I entertained a high opinion of him. Captain Hon. A. Anson,² Captain F. Grant,³ Major Sarel,⁴ and Captain Farquharson,⁵ were my aides-de-camp. They were all excellent staff officers, and were frequently intrusted with important duties, which they invariably carried out to my satisfaction.

Colonel Mann was the commanding officer of the Royal Engineers. He carried out his duties most ably.

The two Generals of Divisions were Major-General Sir John Michel⁶ and Major-General Sir

tember 1st, 1870. In consequence of the personal application of Sir Hope Grant to the Prussian authorities, the rigours of his confinement were much modified.

¹ Now Colonel Biddulph, Assistant Adjutant-General for the Auxiliary Forces.

² Now Lieut.-Colonel Anson, V.C., C.B., retired.

³ Now Lieut.-Colonel Grant, retired.

⁴ Now Colonel Sarel, C.B., Assistant Adjutant-General, Dover.

⁵ Now Major Farquharson, 60th Rifles.

⁶ Now Lieut.-General Sir John Michel, G.C.B.

Robert Napier¹—both excellent officers. Captains Green² and Allgood³ were Deputy Assistants Adjutant-General and Quartermaster-General to Sir John Michel. Major Dillon⁴ and Lieutenant Lumsden⁵ filled the same positions on Sir Robert Napier's staff.

The Brigadiers were Sutton,⁶ Jephson,⁷ Staveley,⁸ and Reeves.⁹

About the middle of May the French troops began to arrive at Shanghai;¹⁰ but they had not yet made any arrangements to procure horses for their guns, and had organised little or no com-

⁶ Since dead.

⁷ Now Major-General Jephson, C.B., retired.

⁸ Now Lieut.-General Sir Charles Staveley, K.C.B., Commander-in-Chief at Bombay.

⁹ Since dead.

¹⁰ Some of the French troops lay at anchor at Hong-Kong for a short time on their way to Shanghai. See return at the end of this chapter.

missariat.¹ Upon hearing this, I offered General de Montauban to let him have 170 ponies, which we had collected at Shanghai, and were in excellent condition, provided he paid their cost. He was much pleased with my offer; but after consulting with his staff, he declined it, considering the price of the ponies excessive. This little piece of economy was more expensive in the end, and did not further the main object in view—viz., to bring the war quickly to an end. The ideas of the French on this subject evidently differed from ours, for his officers stated that they did not expect to be able to get to work this year. I understood, however, that instructions had been received from the Emperor to delay as little as possible, and they then set to work with vigour. In course of time they obtained a number of ponies from Japan, and began breaking them into harness.

By 1st June the whole of the British force had sailed for the Gulf of Pechili. Unfortunately, the Assistance, a fine steam-transport, commanded by Captain Balfour, R.N.,² struck upon a rock going into "Deep Bay" and went down. No one

¹ See remarks at the end of this chapter.

² Since dead.

was drowned, and nothing was lost except some provisions. The French sustained a severe loss in two large transports. One, the *Isère*, laden with harness for their gun-horses, and 400 tons of gunpowder, struck upon a rock entering Amoy, and sank ; and the other, the *Queen of Clippers*,¹ containing stores of various kinds, and especially a quantity of warm clothing for their soldiers, took fire off Macao and was burnt. Our troops had scarcely sailed when a severe north-east gale set in so strongly that thirty of our vessels were obliged to put back into Hong-Kong, where they remained until the 8th June, when the wind shifted to the south-west, and the expedition started afresh. Admiral Hope sailed on the 9th June ; but I remained behind to meet Lord Elgin, who was daily expected.

Thus far everything had gone wonderfully well with us. The men were in excellent health ; and our cavalry and artillery horses were assembled in capital condition. We had purchased and collected, from various places, numbers of ponies and mules ; and had also organised a coolie corps.

¹ An English transport hired by the French, and designated by them *Reine des Clippères*.

I must also mention that two batteries¹ of the newly-invented Armstrong guns had arrived from England; and, to judge from some experiments made with them at Kowloon, we had every reason to consider them a great improvement upon the old smooth-bore 9-pounder.

[Sir Hope Grant, in his journal, here gives a minute description of these weapons, which at that time had been recently introduced into our service. Great importance was then attached to the fact that they were loaded at the breech; and, as will be seen in the sequel, they fully came up to the expectations formed of them. Of late years, however, breech-loaders have, in the British Royal Artillery, been discarded in favour of muzzle-loaders, contrary to the conclusions arrived at by the great majority of European States.—H. KNOLLYS.]

At last I determined to wait no longer for Lord Elgin, and I once more embarked on board the *Granada*. My wife remained behind me in the Commander-in-Chief's residence, over which had been established a guard of native soldiers—but for these the Chinese care little. On one occasion, one of these sentries was pacing

¹ Viz., Lieut.-Colonel Barry's and Major Milward's.

up and down in front of Government House, when a Chinaman crept up behind, tripped up the sentry by means of a long stick with a crook at the end of it, wrested the musket out of his hands and bolted.

Remarks by the Editor.—In all military operations beyond Europe, the provision of transport has invariably been a gigantic difficulty, and the present instance proved no exception. Native horses, mules, and ponies were with much difficulty and expense collected from India, Manilla, and Japan. In one instance the fittings of a ship conveying ponies from Japan gave way, and 70 out of 270 died. It was in a great measure owing to the scarcity of draught animals experienced by the French that the armies were unable to take the field until so late a date that, as will be subsequently seen, Peking was captured but just before the severe winter set in. But for the strenuous efforts which were made to hasten the preparations, there is reason to suppose that the operations of the expedition would have been prolonged into another year. Our embarrassments were increased by the ignorance of all foreigners as to the resources of the country—thus requiring an accumulation of every sort of sup-

plies. Our English practice of protecting the inhabitants, and of paying for whatever we consumed, once more met with its reward. When we landed in Ta-lien-wan Bay,¹ proclamations in the Chinese language were distributed throughout the adjacent villages, assuring the inhabitants that we intended to pay them liberally for their supplies; and that if any of them received ill-treatment at the hands of the English, the injured parties would obtain redress by representing their cases to certain indicated civil officers who understood Chinese. At first all the inhabitants fled; but after a few days, realising the fact that our reign was a reign of order, honesty, and justice, they gradually returned, bringing with them every description of provisions into our camp. These were bought up by the commissariat at a fair rate, and a plenty prevailed which more or less attended the English army throughout the campaign. So great was our solicitude on this point, that in one of the semi-official, semi-private documents with which I have been furnished I find the following entry: "June 30th, compensation ordered for the crops destroyed by the camps." Now, had we pursued an opposite

¹ *Vide* chapter 2.

course—had we acted on the somewhat brutal theory of making war support war—full surely would our economy have proved false and unjust, and full surely should we have rued the evil consequences.—H. K.

DESPATCH from Mr F. BRUCE to
Sir HOPE GRANT.

“SHANGHAI, 16th April 1860.

“SIR,—You are aware that the Imperial Commissioner Ho has communicated to me a document emanating from the Great Council of State at Peking, and purporting to be a reply to the ultimatum sent by me.

“Not one of the demands made is accepted; and the language in which the document is couched convinces me that the course most likely to conduce to a speedy and satisfactory termination of existing differences, is to treat the reply as altogether unsatisfactory, and to call upon her Majesty’s military and naval authorities to prosecute with vigour and despatch the military preparations for an advance on the north. It is possible that when the Peking Government becomes more alive to their magnitude than it is at present, more moderate counsels may prevail; but I am

led to conclude, from the most reliable sources of information, that such will not be the case, unless the hostile party now dominant feel that they are unable to resist on land the force brought against them ; and I fear, after the unsuccessful attempt at the Peiho last year, that they will not be convinced of that fact by anything short of actual defeat.

“ I will keep you informed of any fresh overtures of the Imperial Government which may seem deserving of consideration, as I know that you, as well as myself, would willingly see the question terminated with as little effusion of blood, and as little disturbance of peaceful relations with the industrious classes of China, as possible. The latter consideration is of the highest importance with reference to our future position in this country.

“ Monsieur de Bourboulon has taken a similar view of the reply received by him from the Chinese Government to the French ultimatum, and has informed me that he will to-day call upon the French military and naval authorities to act.—I have the honour, &c.,

“ FREDERICK W. A. BRUCE.”

DESPATCH from Viscount CANNING,¹
Viceroy of India.

“UMBALLA, 9th May 1860.

“DEAR SIR HOPE GRANT,—I was very glad to get your letter of the 27th March, which reached me as I was leaving Simla a few days ago. It is a great relief to find that, notwithstanding the outcries from home, and the early presence on the scene of General de Montauban, we are not behindhand. It is an excellent thing that the material force should, at starting, be mainly at your back and not at his. I hear a good account of General de Montauban as a sensible, conciliatory man; but nobody in England seems to know much of him as a soldier.

“The despatch which I was obliged to send you last month respecting the (supposed) undue excess of our force will, I hope, give you no trouble. The truth is that, as therein shown, we exceed the prescribed 10,000 by very little, when garrisons are deducted; and that little can, if you think right, be sent back to us, either to Singapore, or Calcutta, or whatever Indian port may best suit the remanded men. It was not until many weeks after our Indian force had been warned for ser-

¹ Earl Canning, K.G.; died 1862.

vice, and much of it despatched, that I heard of any agreement with the French Government that it should not exceed 10,000; and up to that time the cry had been, 'send all you can.'

"Probably Lord Elgin's arrival with a French colleague, and fresh from Paris, will do away with all risk of a misunderstanding of our exaggerated strength, either in France or on the spot. I should like much to know whether you have as yet had any questionings or heard of any remarks upon it from the French staff. Bruce has done well in securing the Kowloon peninsula. If the readiness of the Governor-General to treat for it may be taken as an indication of a disposition to peace on the part of his superiors, it will be still better; but I suppose Peking did not know what Canton was doing when the bargain was made.

"The only part of your letter which makes me a little uneasy, is what you say of the French not contemplating to begin work until the middle of August. I am glad that they should not be ready before ourselves; but this surely will be very inconveniently late. The northern coast is, I believe, untenable by troops or ships after the beginning of November—that is, for active operations.

"Good-bye, my dear Sir Hope Grant. I hope

you will continue to let me know how you get on ; and, believe me, very faithfully yours,

“ CANNING.

“ Lieut.-General Sir HOPE GRANT,
K. C. B., Hong-Kong.”

CHAPTER II.

SAILS FOR SHANGHAI—CONFERENCE WITH THE FRENCH—SIR HOPE GRANT'S AND GENERAL DE MONTAUBAN'S RESPECTIVE PLANS OF ATTACK—DELAY ON PART OF FRENCH —DEPLORABLE CONDITION OF CHINA—GENERAL IGNATIEFF—VISITS WEI-HEI-WEI AND CHE-FOO—THE NEW FRENCH GUN—DISEMBARKATION OF BRITISH TROOPS AT TA-LIEN-WAN—ARRIVAL OF LORD ELGIN—SIR HOPE AGAIN URGES ON GENERAL DE MONTAUBAN THE NECESSITY FOR QUICKLY BEGINNING ACTIVE OPERATIONS—SPLENDID CONDITION OF OUR TROOPS—INSPECTION BY FRENCH — GENERAL DE MONTAUBAN ABANDONS HIS ORIGINAL PLAN, AND RESOLVES TO ACT WITH US IN ATTACK ON PEH-TANG—EMBARKATION OF TROOPS FOR PEH-TANG—STRENGTH OF FORCE.

ON 11th June I sailed from Hong-Kong for Shanghai. After we had proceeded about 500 miles on our journey, we came upon the last division of our ships at anchor behind a little island called Lam-yit. They had been detained there by a wind blowing so strongly from the north-east that the towing steamers could make no way against it. We had reason to suppose, however, that the monsoon would soon change to another

quarter. We therefore sailed on, and reached Shanghai on the 16th June; and I immediately went on shore, and arranged with Mr Bruce for a conference with General de Montauban the following day, that we might concert plans for our further proceedings. Colonel St George Foley,¹ the English Commissioner with the French, Major Reboul, and Monsieur Bourboulon, were likewise present at the conference. General de Montauban laid before us his plan of attacking the Taku defences. He proposed to land at a spot 25 miles south of the large fort which had done so much damage to our fleets the previous year, and then to march up along the coast through a wretched semi-barren country, taking with him his light guns only. For provisions and water he would rely upon his ships. This scheme appeared to me very hazardous. The difficulties of landing would be great; heavy winds might very probably arise, and prevent communication with his ships for days; and, above all, it was most unlikely that the large fort, which was armed with about sixty very heavy guns, could be compelled to yield to the fire of light field-pieces only.

¹ Now Major-General Foley, C.B., Lieutenant-Governor of Guernsey.

Before attending the conference I had consulted with Admiral Hope, and we both came to the conclusion that our most judicious course would be to proceed up the river Peh-tang, eight miles north of the Peiho, capture the town of Peh-tang, and there establish a base for future operations. The Taku forts were four in number, two small upper, and two large lower works—a large and a small fort being on each side of the river.¹ In front of the lower forts, near the mouth of the Peiho, were fixed two very strong chain-barriers, impassable for ships under fire; and on each side of the river was a salt-marsh. The plan which I proposed to the French general was first to attack Peh-tang, the defences of which were, so far as we could ascertain, of a less formidable description. Here, too, there was, it is true, a fort on each side of the river, but there were no barriers thrown across; and by landing near the town of Peh-tang we could attack in rear the Taku forts, which would thus probably fall after a short resistance.

General de Montauban remained wedded to his opinions, and proposed that we should each of us carry out our own scheme independently, as far as possible. To this I readily agreed. I

¹ See plan.

had an amply sufficient force for my purpose, and we should thus avoid many causes for disagreement. My satisfaction was marred by the French general's statement that he could not be ready to begin operations until the 15th July. This delay was serious, as by that date the rainy season would in all probability have set in, and would have so inundated the country as to render it almost impassable for troops. We were prepared to open operations on 1st July, but the French very naturally insisted on a simultaneous start; and as I had received strict injunctions from home to act in unison with our allies, I had no alternative but to wait patiently.

The long-haired rebels¹ who had risen against the Chinese Government were now becoming very formidable. They had taken Foo-Chow, the great emporium for silk, and had treated the inhabitants with great brutality, murdering women and children wholesale, and committing great destruction of property. They next began to make their appearance in the neighbourhood of Shanghai, where the panic amongst the native population was excessive, and the trade was stopped in consequence. Ho, the governor of

¹ The insurgents were distinguished by the length of their hair.

the province, applied to us to protect the town ; and we therefore took possession of the gates, and I brought up the Loodianah Regiment from Hong-Kong. The garrison then consisted of 1030 men, which, with 600 French marines and a party of their sailors, was sufficient to insure tolerable safety for the place. China was indeed in a deplorable condition, with rebellion and misgovernment within, and a war with two great European nations from without. About this time General Ignatieff,¹ the Russian ambassador, arrived at Shanghai from Pekin. He spoke English very well, and appeared to me a straightforward, gentlemanlike man. The Emperor of China, a young man, 32 years of age, I was informed, had worn out his intellects and brought on paralysis, which deprived him of the use of his legs, by debauchery.² The government was in the hands of a party of civilians, who were determined to wage war to the last extremity. They overruled their famous general Sang-ko-lin-sin and the military mandarins, who were inclined for peace.

[The intestine strife which was then raging in

¹ Now Russian Ambassador at Constantinople.

² He died in 1862, and was succeeded by his son, who died while this work was in the press, aged 25.

China materially complicated the difficulties of the expedition, so far at least as the English were concerned, and powerfully influenced the ultimate result. On the one hand, the Imperial Government were unable to resist us with their whole force, owing to the necessity imposed on them for employing a large portion of their army in attempting to suppress the rebellion. But for this diversion, it is probable that by the mere force of numbers they would have succeeded at all events in rendering our subsequent march to Peking a more perilous and a more protracted undertaking. On the other hand, the last thing to be desired was the overthrow of the ruling dynasty, or the flight of the Emperor from Peking, whereby there would be no responsible Government with which we could negotiate, or from which we could take guarantees for the fulfilment of a treaty. A certain consequence of the above contingencies would be a complete state of anarchy and the cessation of our trade. Even so early as June, the rebel forces, fully appreciating the difficulties entailed upon the Imperial Government by our threatened descent upon the shores of Pechili began to throng around Canton; and one large Taeping¹ army was reported to be within six

miles of the city, spreading universal terror and paralysing commerce. It therefore became the business of the English military and diplomatic authorities intrusted with the conduct of the war so to hit off the happy medium, that the Pekin Government might be rendered so weak as to be unable to offer to us further resistance, but so strong as to be capable of suppressing the formidable rebellion. Hence our wise anomaly of smiting them in the north at Taku, and serving them in the south at Canton. These complications little affected the French, as their commercial interests were small, and their longing for laurels in the shape of victory over the Imperial hosts of China great.—H. KNOLLYS.]

On 22d June I sailed from Shanghai for Wei-wei, a town situated on the promontory of Shan-tung, at the commencement of the Gulf of Pechili, as I wished to ascertain whether it would be a suitable spot for the formation of a depot. On the way we touched at Woosung, about ten miles north of Shanghai. Here I made the acquaintance of Admiral Charner, who had been sent out from France in the *Renommée* to supersede Admiral Page. He was an elderly gentlemanlike person, had been a long time in the service, and I at once

saw we should get on well together, as he did me the justice to believe that I was most anxious to promote good feeling and cordiality between the nations. Altogether I welcomed the change very gladly, for his predecessor was a person with whom it was difficult to harmonise.

We continued our voyage, and after two days and a half reached Wei-hei-wei, where we at once landed and walked up to the gates of the town, which was small, containing about 2000 inhabitants, and, like all Chinese cities, walled in. The people were civil. We entered the gate unmolested, and after a short search discovered the residence of the chief mandarin. By means of an interpreter, I told him that I proposed establishing a force in Wei-hei-wei; and that if he would bring in supplies he should be well paid for them, and every consideration and kindness shown to the inhabitants. The mandarin, a humble fellow, declared that he would do his best, but that the resources of the town were very slender. Upon further investigation, I found that there was deficiency of good fresh water and of anchorage, and I therefore abandoned my intention of forming a depot at this place.

We next sailed for Che-foo, 35 miles higher up

the coast,¹ where the French had established large magazines under the supervision of General Baron Jamin, a most civil obliging officer, and particularly popular with his men. He showed me over his lines, formed round a conical hill, where his soldiers had pitched their *tentes d'abri*, which looked fairly comfortable on a fine day. He also directed my attention to the new French rifled guns² of the same description as those which had been used with so much effect in the late war with Austria. They were so light, that four Japanese ponies could easily draw them, and their range was considerable; but they had not the carefully adjusted sights which made our Armstrongs so formidable, and their fire was not particularly accurate. I told Baron Jamin that General de Montauban had stated he hoped to be ready to take the field by the 15th July; but he laughed at the notion, and declared it to be utterly out of the question. The number of ponies required for the artillery and other purposes was, he said, 620. As yet they had only 114, and these were still unbroken to harness.

¹ And opposite the English rendezvous of Ta-lien-wan.

² Commonly called the Napoleon gun—a converted muzzle-loading bronze gun with studded projectiles, rifled.

The English forces had been collected at Talién-wan, a magnificent bay to the west of a promontory in the large province of Manchooria, in the Gulf of Pechili, and opposite Che-foo. I now betook myself to this spot, and arrived there on the 26th June, where I found that our whole army, with the exception of 120 of the King's Dragoon Guards, had arrived in 73 vessels. This splendid fleet rode at anchor in the bay. The French force had not yet made its appearance ; so, without any further delay, I landed all my troops and encamped them on three sides of the bay—the cavalry and artillery on the east, near the entrance, at a place called by us Odin's Bay, after the name of a vessel commanded by Captain Lord John Hay.¹ On the north was the 2d Division under Sir Robert Napier at Hand Bay ; and on the west the 1st Division, Sir John Michel's, at Victoria Bay : the baggage animals were stationed near Sir John Michel's position. The men were in excellent health, and the horses in first-rate condition ; and though they had travelled so far over a troubled sea, there had been scarcely a casualty amongst them. At first

¹ Now Captain Lord John Hay, C.B.

we apprehended a deficiency of fresh water, but in course of time we discovered one or two small streams flowing into Odin's Bay and Bustard's Creek ; reservoirs were formed, and we were thus enabled both to supply the troops and to keep the ships well stored. The inhabitants were Tartars ; and though at first surprised and frightened at our large ships of war and red-coats, soon became friendly, and brought us in abundance of supplies.

About this time I received an official letter from General de Montauban, in which, to my great satisfaction, he stated that his force would be ready to begin operations by the 25th July at the latest.¹

¹ The following despatch serves to point out one of the difficulties attendant on carrying out military operations in conjunction with an allied power :—

“ HEADQUARTERS, TA-LIEN-WAN,
9th July 1860.

“ MY LORD,—I have the honour to inform your Excellency that the British land forces at this place amount to about 12,000 men.

“ By a despatch from Lord Canning, I learn that the Home Government had arranged that the British expeditionary force should not exceed 10,000 men, and his Lordship requested me to act in accordance with this arrangement. To effect this reduction, it will be necessary for me to leave 2000 men at Ta-lien-wan.

On the 9th July, Lord Elgin arrived in the Feroze, and I immediately went on board to pay my respects. My eldest brother was married to his sister, Lady Lucy Bruce, and in former days I had known him well. Twenty years at least had intervened since we had last met, and we were, of course, both much changed; his hair had become perfectly white, and mine was well sprinkled with grey. We renewed our old acquaintance, and he told me how he and

As the aim of the expedition is a speedy success with as small loss as possible, it seems unwise thus to throw away the services of these men—the expense of bringing them to China having been already incurred; whilst the stronger the force, the fewer in all probability will be the casualties in action.

“From what I can gather, I understand that the French effective force will not greatly exceed 6700 men, including the garrison of Che-foo.

“Having informed Mr Herbert that the wishes of H. M. Government as expressed to Lord Canning will be attended to, and that the surplus force would be left at Ta-lien-wan, I venture to request that your Excellency will, if you think fit, obtain the concurrence of H. I. M.’s Plenipotentiary to the English force exceeding the limit of 10,000 laid down, in which case I would propose to leave only 600 men to guard the depot at Ta-lien-wan.—I have the honour, &c.

“J. HOPE GRANT, Lt.-Gen.,
Commander of the Forces.”

“His Excellency the Earl of Elgin and Kincardine,
K. T., K. C. B., &c., &c., &c.”

The authority requested was granted.

Baron Gros, the new French ambassador, had been wrecked in the harbour of Galle. Just as his ship, the *Malabar*, was preparing to sail, a severe squall suddenly came on and bumped her fifteen times on a rock, which knocked a hole in her bottom. Her steam was up, and they managed to run her ashore ere she sank; but nearly all the property of the passengers was lost. After Lord Elgin had made me acquainted with his views bearing on the politics of the war, I determined to start at once for Che-foo, in order that we might fix on a day for both armies to begin their move. I arrived there the next day, and proceeded to confer with the French general and admiral. Admiral Hope had been obliged to remain at Ta-lien-wan, in consequence of an injury he had sustained on the shin-bone.

I impressed upon General de Montauban the expediency of getting to work at once, and I showed him his own letter to me, binding himself to be ready by the 25th July. He seemed to have forgotten the existence of such a document, and declared his present inability to fix a day; but added that by the 20th July he would, at all events, let me know the exact date when he would be prepared to start. I dined with him that

evening, and then returned to Ta-lien-wan. On 13th July, General de Montauban and Admiral Charner came to pay an official visit to Lord Elgin and myself, and I took the two French officers to Odin's Bay to inspect the portion of our troops stationed there. On disembarkation we found the King's Dragoon Guards, and Probyn's and Fane's Horse, with a field-battery on each flank, drawn up to receive us. A salute was fired in honour of our guests, and we proceeded along the line. Though the force of cavalry and artillery was small, the sight in such a distant land was undoubtedly one to be proud of showing to the representatives of a great foreign power. It must be remembered that this force had been conveyed a distance of 5000 miles from India ; that they had been embarked and disembarked several times during the process ; and that, though frequently unprovided with proper landing-places, scarcely a casualty had occurred. Each English soldier was a splendid fellow, and looked as though he were a thoroughbred gentleman—powerful and strong enough to contend with any men the world could produce. The Sikhs, too, with their beautiful turbans wound gracefully over their ears and drooping down the

backs of their heads, were almost equally splendid, and looked as if they intended to vie in acts of daring with the British. I need scarcely add that the Royal Artillery was, as usual, in the most beautiful order. And then the horses were turned out in a manner which did credit to both branches of the service. They had been taken from the stud-depots of India; and having recently had plenty of rest and good food, they looked handsome, imposing, and full of breeding.

The French general walked down the line with me, and frequently expressed his admiration of our troops. Such a sight, he said, would not have been extraordinary in Hyde Park or in the Tuileries, but he could never have expected to witness it in China. In the evening, Lord Elgin, General de Montauban, and Admiral Charner, dined with me; but I am sorry to say that I cannot report so favourably of my dinner as of my parade.

Very plentiful supplies, in the shape of bullocks, sheep, goats, and vegetables, were daily brought in to us at Odin's Bay, so I determined to establish here a depot for supplying the rest of our army, and to leave a small force to protect it.

Lord Elgin had gone over to Che-foo to see

Baron Gros ; and he wrote me word that the French had discovered the impracticability of landing a force south of the Taku forts. On hearing this, I at once went to Che-foo to see General de Montauban, who told me that he had sent a ship to reconnoitre the coast where he had proposed disembarking ; but the report was so unfavourable that he had relinquished his original intention. He now wished to ask me whether I had any objection to his men landing at the place I had selected—viz., Peh-tang. I told him that he was at perfect liberty to do so, as it was my sincere wish to keep up a good understanding between the two nations. He then said that he should be quite ready to start by the 26th July. We afterwards rode out together into the country, which appeared fertile, well wooded, and cultivated. Here, too, the people were bringing in supplies freely, and also numbers of capital mules. Baron Gros allowed me to purchase two of these animals for my private use, which, from my experience during the Indian Mutiny would, I knew, prove most serviceable. During my last campaign in India, many a good breakfast had my old mule carried for me on the line of march.

On returning to Ta-lien-wan, we set to work in

earnest preparing for the real business of fighting. We had no difficulty in embarking the infantry, but the cavalry and artillery proved a more onerous affair. Thanks to Admiral Hope's judicious arrangements, and to the care and energy displayed by all the officers concerned in the operation, the whole of the horses were got on board safely, with the exception of one officer's charger, which broke its leg, and had to be destroyed. Our force amounted, in round numbers, to about 11,000 men; that of the French to 6700.

CHAPTER III.

DISEMBARKATION NEAR PEH-TANG—ADVANCE THROUGH THE MUD—SURRENDER OF THE TOWN—THE HIDDEN SHELLS—TALES OF VIOLENCE—DREAD OF FIRE—RECONNAISSANCE AND SEARCH FOR WATER—SIR HOPE GRANT RESOLVES TO CONTINUE MARCH, AND GENERAL DE MONTAUBAN AT LENGTH ACQUIESCES—MEASURES FOR ATTACKING THE SIN-HO FORTS—FRESH STRUGGLES THROUGH THE MUD—GALLANT ATTACK OF TARTAR CAVALRY AGAINST STIRLING'S GUNS—REPULSED BY PROBYN'S HORSE—CAPTURE OF THE SIN-HO FORTS—FRENCH ADVANCE AGAINST TANG-KU, BUT ARE FORCED TO RETIRE—PRISONERS CAPTURED BY THE TARTARS—ATTACK AND CAPTURE BY THE ALLIES OF TANG-KU ON 14TH AUGUST—INCIDENTS IN THE ENGAGEMENT—DESPATCH FROM LORD ELGIN.

ON 26th July 1860, our fleet got under way. It consisted of 73 vessels, some of which were sailing ships, and the others steamers, drawn up in two lines. The French fleet, composed of 40 transports and men-of-war, formed the third line. On 27th and 28th July we anchored within 20 miles of the Taku forts, which loomed large in the

distance ; and on 30th we approached to within 10 miles of Peh-tang. We had intended to cross the bar the following day, and to anchor within 2000 yards of the forts ; but owing to the storminess of the weather, we deferred our further advance until 1st August. The depth of water over the bar proved to be only 13 feet, and at low tide only 3 feet, in consequence of which large vessels could not cross ; and the admiral determined to ship the troops in men-of-war boats, towed by gunboats. This was effected with admirable precision, and we anchored on 1st August just out of fire of the batteries. It had been originally settled to land on the left bank of the Peh-tang river ; but on further examination the muddy state of the beach deterred us, and the troops disembarked on the right or south bank.¹ Even here the ground appeared to be little better than slush ; and General de Montauban, just as he had set foot on shore, suddenly found the river rising, and the water surrounding him. There were close at hand two or three high mounds of earth, apparently serving as a guide for navigation, and on one of these the French general placed himself ; but even here he was in a few minutes surrounded by

¹ About a mile and a half east of Peh-tang.

a sea of water extending for miles. The two forts on the river-banks looked very imposing. They were constructed of mud and straw, with a high cavalier¹ in the centre of each. That on the right bank was armed, so far as we could see, with 13 guns; the one on the left bank with 11 guns. No notice was taken of our approach beyond that of a few "Braves"² looking at us from the parapets.

A total of 2000 troops, in equal numbers of French and English, were forthwith landed; and as we had the prospect of wading through at least two miles of mud, I took off my boots and stockings, tucked up my trousers, and pushed forward at the head of my men towards a raised causeway, which led apparently from the gate of Peh-tang to the Taku forts.³ On our way we came across a deep water-course, concealed by the high tide, and many were our cooling tumbles therein. The French Chief of the Staff had landed on his pony, and both came to terrible grief in this briny bath.

Some Tartar cavalry were seen moving along the road, but on our approach they retired in the

¹ A raised terreplein with parapet.

² The term adopted for themselves by the Chinese army.

³ See plan.

direction of the Taku forts. At last all our wading difficulties were got over; our men reached the causeway, which was found sound and dry, and were ordered to bivouac on it for the night. I arranged with Admiral Hope and the French that at daybreak we should make a simultaneous attack on Peh-tang from the road. At the same hour the gunboats were to steam up past the forts and support us with their fire.¹ During the night the admiral sent up one of his small boats to find out whether any barriers impeded the passage of the river; and having ascertained that all was clear, we felt confident of being able to establish ourselves in the town without much difficulty.

When we laid down for the night in the open on the road, we had no apprehensions of being attacked during the darkness, as there was nothing but water and swamp on our flanks, which, moreover, were guarded by a few pickets. At midnight, to my surprise, firing commenced in the centre of our line, and it was reported that some Tartar cavalry had ridden close up to us. However, it soon ceased, and next morning a Tartar

¹ Preparations were also made for landing the remainder of the troops the next day.

pony, fully accoutred, was found within a stone's-throw shot dead by a rifle-bullet. Not far from Peh-tang was a bridge, which was occupied by one of our pickets ; and as everything appeared perfectly quiet, I sent a flag of truce with an interpreter to demand the surrender of the town. A respectable-looking old man came up and said that no opposition would be offered to our entrance, and that no Chinese soldiers were in the place ; but he warned us that inside the fort were concealed some large shells filled with gunpowder, which would explode on being touched. This information, so kindly given, proved of great importance. The party with the flag of truce followed the old man into a deserted fort, and were there shown where the gunpowder was buried. The top surface was scraped away for about an inch, and revealed several small gunlocks, so placed that the weight of the foot would cause them to go off, and, by means of some trains of gunpowder, would have exploded the shells. These missiles, sixteen inches in diameter, were placed in two mines, ten in each, and would have caused a pretty commotion had a company of soldiers marched over the spot.

Very early in the morning, we entered Peh-

tang, and found that our gunboats had taken up the position previously assigned to them. On examination, it was ascertained that there was no site outside the walls suitable for the encampment of our troops. All around was swamp, or covered with water at high tide; and now commenced the miseries of war. We were compelled to lodge the men of both armies in the town, which was densely populated. The unfortunate Chinese women all had the small deformed feet common to the females of their nation, and were scarcely able to move. The Chinese coolies, of whom we had a large number—about 2500¹—were for the most part atrocious villains, though extremely useful; and in the first instance, when they could be comparatively but little controlled, the robberies and crimes they committed in the town were fearful. In one respectable-looking house which some of our officers entered, were found the corpses of two young women, and their father apparently at the point of death. The latter turned out to be the same kind old man who had received our interpreter and had pointed

¹ A large number of coolies had been temporarily engaged in addition to the regular Coolie corps.

out to us the existence of the loaded shells. They were all taken to the hospital, where it was ascertained that they had swallowed opium. After some difficulty, the father was brought round again, and he told his sad tale. A party of coolies came to his house, and demanded admission. He was obliged to let them in, whereupon they plundered and ransacked his dwelling. They had scarcely taken their departure when fresh coolies came with the same intention, which so terrified the unhappy family that they resolved upon suicide, and took a quantity of opium.

The inhabitants evacuated the town as quickly as possible, the men carrying their helpless, footless wives and their children on their backs, and other poor females hobbling along as best they could, supporting themselves upon sticks to the river-side, and then getting into boats, or toiling along the banks to some other village. Some French soldiers were removing a box out of a house to increase the available space, when on opening it were discovered the bodies of two young girls about fourteen and fifteen years old, who, there was reason to suppose, had been strangled by their relations.

At last the place was cleared of its population ; one half of the town was allotted to the French and the other half to ourselves, and we forthwith began disembarking the main body of our troops.

I took up my abode in one of the bastions of the fort, which was cool and airy : perhaps too much so, for I shall never forget one night when a storm of thunder, lightning, wind, and rain broke over us, flooding the place, and converting our beds into the appearance of tubs filled with dirty clothes, and ourselves into half-drowned rats. I had a slight attack of fever during the two following days. The occupation of this town was fraught with the most fearful risks it has ever fallen to my lot to encounter, and had we not been protected by that great Being who rules above, terrible and fearful consequences would have ensued. The town was very small, not much more than 500 yards square, and in it were crowded 11,000 of our men, exclusive of the French force amounting to above 6700 more, and about 4000 of our horses, mules, and ponies, all stowed away in houses and in narrow lanes. The buildings were almost all thatched, fires burning, dinners cooking, men smoking ; in fact, all the accessories for the outbreak of a blaze. After the storm, the weather

became very hot, and the thatched roofs as dry as tinder. Had a spark fallen on one of them it is difficult to say what would have been the result. Probably almost all our fine horses and ponies would have been destroyed; and many of the men would have been unable to effect their escape out of the narrow thickly-thronged lanes. At length heavy rain set in, and the danger of fire was much lessened; but the streets became almost impassable from the mud, filth, and dead animals. These latter seemed to cling to us persistently; for when thrown into the river the returning tide cast them back on to the bank where, they decomposed in the sun, creating a horrible stench. Nevertheless, notwithstanding the pestilential nature of the place, our troops, wonderful to say, never enjoyed better health. During the whole period of our occupation we had not above one and a half per cent sick. The French likewise were remarkably healthy.

I had brought four excellent horses with me from India, and my favourite mule. I am sorry to say that the latter on being landed fell upon a post in the river, and staked himself so badly that I was obliged to shoot him. I had likewise my favourite little Arab pony which did

me such good service in India during the Mutiny.¹

On 3d August, General de Montauban and myself arranged to send out reconnoitring parties of 1000 men each, on the road to the Taku forts, to ascertain the position of the enemy. Brigadier Sutton commanded the British force; and General Collineau,² an excellent officer who had commanded a regiment with great gallantry during the attack of the Redan in the Crimea, the French. The party advanced along the narrow road for about four miles, with water and swamp on both sides, and on their way met with a picket of Tartar cavalry which retired on our approach. The ground now sloped upwards and about a mile to the front; an intrenched position became visible, whereupon General Collineau deployed his whole force. The troops had hardly got into line when the enemy opened on them with a heavy fire of gingals, wounding several of their number. This weapon is a species of long heavy duck-gun, carrying a ball weighing

¹ It died at Aldershot, April 1873, after a happy and an honoured old age—a splendid little animal to the last.

² General Collineau died at Tien-tsin the following November of small-pox.

about two pounds: its range is at least 1000 yards. Placed upon a tripod, from which tolerable aim can be taken, it is very handy and effective in a country where, owing to innumerable large ditches, water-courses, and marshy ground, field-artillery would be useless. The enemy appeared to be in considerable force; and General Collineau having reconnoitred their position, thought it advisable to retire: my force followed his example. The Tartar cavalry, however, harassed the retreat. On 4th August, we occupied with a strong picket the position abandoned the previous day by the Tartar cavalry.

Probyn's Horse had been landed, and I had posted them within the fort of Peh-tang. On 5th August, heavy rains and violent squalls flooded the horses up to their knees in mud, and, moreover, we were in great straits for drinking-water. There were a few wells in the town yielding a very brackish supply, and in each house were five or six earthen jars large enough to hold a man, in which fresh water had been stored away; but in a short time, with the number of horses to be provided for, these sources became exhausted, and it was a matter for anxious consideration how we could meet this grave impending

difficulty. On the spot where at first landing we had found the dead Tartar pony, a cart-track was perceived; and anxious to discover to where it led, I sent out a reconnoitring party, consisting of two squadrons of Probyn's Horse, and a troop of the King's Dragoon Guards—the whole under Colonel Wolseley, Deputy Assistant Quartermaster-General, and a most excellent officer. They started on the morning of the 9th August; and on their return the same day, Wolseley reported to me that for the first two miles the track was very muddy and difficult, but that afterwards it became sound, and well adapted for the passage of cavalry and artillery. Above all, he discovered several large pools of excellent rain-water, at which the horses drank greedily. This information was most satisfactory, because, provided the difficulties of the first two miles' mud could be surmounted, I could send a division by the newly-discovered track, and thus attack the enemy in flank as well as in front. I was also much relieved at the discovery of this additional supply of water, though we had now begun to eke out our resources by distilling, which was carried on on board our steamers by Admiral Hope's orders.

Once more the rains came down in constant

heavy showers, and in the intervals the sun shone with an intense heat. Great indeed was my anxiety lest, in consequence of the stench and crowded state of the town, disease should break out; and I resolved at all hazards to march off and attack the enemy the instant the country should become passable after a few days' dry weather.

General de Montauban and myself had come to an agreement that our forces should take precedence of march by turns, and that the British should have the first right to the privilege. The arrangements for the start, therefore, devolved upon me, and I went to tell him of my wish to march off on the morning of the 12th August. The French general objected strongly, and urged that the state of the country would be the destruction of his men. To this I replied that we had had several days of fine weather, which had rendered the ground much sounder, and that every moment we remained in Peh-tang was fraught with danger. Indeed so strongly was I impressed with the latter consideration, that I urged my point with all the force in my power. General de Montauban, I am happy to say, was not in the least offended, and merely replied:

“Very well: if you go I must go with you.” The force he detailed for immediate advance, however, amounted only to 1000 men.

On 12th August, therefore, Sir Robert Napier was directed to start with his division an hour before the rest of the troops, to cross the salt-marsh by the cart-track turning to the right, and to attack the enemy's intrenchments on their left. He was reinforced by the cavalry under Brigadier Pattle, one battery of Armstrong guns, three 6-pounders, smooth bore, and a rocket-battery. Sir John Michel was ordered to advance with his division, and to attack the enemy posted behind their earthworks, in front, as soon as Sir Robert Napier should have cleared off the causeway.

I accompanied Sir Robert Napier's division in order that I might assure myself that he had succeeded in crossing the marsh, and here we encountered great difficulty in dragging the artillery along. The horses got bogged, the guns sank up to their axle-trees, and the waggons stuck fast. At last we were compelled to leave the waggon-bodies behind us, and to content ourselves with the gun and waggon limbers.¹ The

¹ The limber and body when hooked up together form a four-

cavalry likewise were much embarrassed in struggling through the mud, and even the infantry found it hard work, and lost many a good pair of boots. At one time I really thought we should be obliged to give up the attempt ; but Sir Robert Napier was full of energy: the struggle was continued, and, by means of drag-ropes and perseverance, the artillery was hauled over the two miles of mud, and sound ground reached. I then retraced my steps, and accompanied Sir John Michel's division along the causeway, and on reaching the high ground deployed the whole line, the French force of 1000 men being formed upon our left. From the roof of a house a little to our front I obtained a good view of the whole system of the intrenchments. They appeared to consist of several small redoubts, open at the gorge, and weak in profile, but connected with each other by crenelated walls.

The enemy soon began to open fire upon us, to which we replied with 18 guns at a range of 900 yards, consisting of Desborough's smooth-bore 9-pounders, Barry's Armstrongs, and a battery of French artillery. Govan's rocket-battery also

wheeled carriage. The limber can be moved separately without the body, but not *vice versa*.

came into action. Every one of our shot pierced right through the slight mud Chinese walls, and in half an hour the forts were all evacuated.

Meanwhile, Sir Robert Napier had been engaged, two miles to our right, with the enemy. A body of about 4000 Tartar cavalry attacked us in the most gallant style, very nearly captured Stirling's¹ three 6-pounders, and surrounded the whole of our column in the manner customary with Eastern horsemen; but the Armstrong guns opened, and our own cavalry was let loose upon them with great effect. The Sikhs understood this style of warfare, and committed great havoc amongst the Tartars—driving them eventually off the field. They took refuge in the village of Tang-ku, on the north bank of the Peiho. We followed up our success to the village of Sin-ho, which was also covered by intrenchments; but the enemy had received such a thrashing that they did not wait to defend it.

General de Montauban now wished to attack another fortified position inclosing the large village of Tang-ku. The distance between this post and Sin-ho was about three miles; the enemy had

¹ Now Lieut.-Colonel William Stirling, commanding B Battery, B Brigade, Royal Horse Artillery.

retreated by a causeway, and the fortifications were large enough to have contained 40,000 men. The ground along each side of this single road appeared to be very marshy, and consequently the whole of our deep columns of infantry would be exposed to an overwhelming fire of artillery from behind the walls, to which we could make no reply, as there was not sufficient breadth of ground for even half a battery in line. I therefore strongly objected to advance any further until, by a reconnaissance, we could mature our plans with greater safety. The French general, however, was resolute, and I at length consented to follow his troops in support. He accordingly moved forward with his columns massed on the highroad, and when within 1700 or 1800 yards of the forts managed to bring a few guns to the front, with which he opened fire. The enemy responded with vigour; but, fortunately for the French, the range was too great to be effective; otherwise their loss would have been heavy indeed. General de Montauban at last recognised the futility of the attempt, and withdrew his force.

On the morning of the 13th August we carefully inspected the position. The river Peiho ran

parallel to the road, and at a perpendicular distance from our right flank of about a mile. A water-course likewise flowed alongside the road. This was bridged, and I then rode up to the river-bank, where the site proved to be at a much higher elevation, and far sounder than in the direction of our original advance. In fact, we found that, by throwing bridges over several little intervening streams, we could march on an extended front up to the very walls of the fort of Tang-ku.

I am sorry to say that, during the fight, two of our men, with several coolies, were taken prisoners as they were conveying a cart with rum to the 2d Division by the track across the salt-marsh. The mishap occurred owing to the carelessness of the Europeans, who had not exerted themselves to keep up with the column, and were captured by some of the Tartar cavalry who had attacked Sir Robert Napier.

[In a journal of the operations kept by an officer on Sir Hope Grant's staff, the following entry occurs, characteristic of the nation with which we were at war: "*August 8th.*—A mandarin brought a letter for Lord Elgin this morn-

ing from the governor-general of the province, saying they wished for peace, but recommended us to keep off, as they were very strong." This same nation, who at a later date violated the laws of nations and of humanity by murdering some of our envoys,¹ captured during our advance on Sin-ho several enlisted coolies, actually assisting an army of foreigners against their own countrymen. The instant execution of the captives could not have been possibly condemned ; but the Chinese merely cut off their tails—a mark of degradation—and sent them back to us under a flag of truce.—H. K.]

The 14th of August was a hot dry day ; and at an early hour, all our preparations having been completed, the British and French troops filed across the bridges, and were deployed in two lines. The enemy opened on us from the other side of the river with some guns, in two junks, hauled up on the mud near a village called Ta-leang-teze, close to the bank on the other side, and with a battery on some rising ground, about 1200 yards distant from us. Our guns opening upon them soon silenced their fire, and Captain

¹ See page 134.

Willes,¹ Flag-Captain of Admiral Hope, crossed the river with a few men, and spiked the guns in the village.

The two Armstrong and the two 9-pounder batteries then came into action, and with two French batteries, 36 guns in all, opened fire upon the fort. The enemy's intrenchments were traced in the form of a square, one face of which rested on the river, and the other three were strengthened with a crenelated wall, with two wide ditches in front. Our attack was directed against the side of the work at right angles to the river, where the ditches and walls were of weaker profile. The heavy fire from our 36 guns soon knocked the intrenchment to pieces; and by advancing by alternate batteries up to within 350 yards—a movement which was skilfully executed by the officer commanding the Royal Artillery, Brigadier Crofton—the enemy's pieces were dismounted, and their parapets ruined. The flags with which the walls had at first been bedecked were fast vanishing. One brave fellow mounted on the battlements, and proudly waved a red banner in the air, until a shot from one of our guns struck him, and he

¹ Now Admiral Willes, C.B.

disappeared. Meanwhile some companies of the 1st Royals and 60th Rifles crept through some sedges along the banks of the river, reached the foot of the fort, and succeeded in forcing their way in. An entrance once effected, the Chinese abandoned the whole of their works, turned, and fled.

The French met with obstinate resistance at the point they had selected for their attack, a little to our left; but, gallantly led by Colonel Schmitz,¹ the French chief of the staff, they scaled the walls about the same time as ourselves. Ten guns in good condition fell into our hands. One of them which had been troubling us considerably was found dismantled by a shot from an Armstrong gun, and around it were lying thirteen dead Chinamen. Our rocket battery was also used with great effect. The enemy on the other side of the river fired the same sort of missiles at us, with an arrow attached to them. Their range was great, and they were well directed, but they did us no harm. During the engagement Sir John Michel had his horse killed under him. We were

¹ Served as General Schmitz under General Trochu during the early part of the siege of Paris in 1870.

now well sheltered in the large village of Tang-ku, which lay within the enceinte of the works. I directed Sir Robert Napier to occupy it with his division, and from the roof of the house wherein he lived, we could make out the distant outline of the Taku forts. I was convinced that the capture of the small upper northern work would entail the surrender of the three others, and I determined to reconnoitre it carefully, availing myself of the assistance of Sir Robert Napier, whose opinion was, as an engineer officer, particularly valuable. In Tang-ku we found a number of capital boats, which were very useful to us in bridging the river.

The next day I visited our poor wounded fellows, whom I found doing well, and comfortably cared for in the village of Tang-ku.

DESPATCH from LORD ELGIN.

“THE GRANADA, 16th August 1860.

“MY DEAR GRANT,—The Chinese authorities are very desirous to put a stop to further military operations. I have received three despatches from them on the subject. As I am of opinion that the forts should be in our hands, and the

Peiho river opened before their terms are accepted I shall do what I can to keep things going till you are ready to effect these objects. But of course it becomes every day more difficult for me to do so. My last despatches from the Governor-General¹ inform me that an Imperial Commissioner is on his way from Pekin.—Yours very sincerely,
ELGIN AND KINCARDINE.”

¹ Of the province of Pechili.

CHAPTER IV.

DESCRIPTION OF THE SMALL NORTH TAKU FORT—PETITIONS FOR PEACE—GENERAL DE MONTAUBAN'S PLAN OF ATTACK—HIS FORMAL LETTER OF REMONSTRANCE AGAINST SIR HOPE GRANT'S SCHEME, TO WHICH HE FINALLY YIELDS UNDER PROTEST—CANNONADE AGAINST THE FORT—EXPLOSION OF MAGAZINE—THE STORMING AND CAPTURE OF THE TAKU FORT—BRAVERY OF THE CHINESE—CAPTURE OF THE LARGE NORTH FORT—SURRENDER OF THE SOUTHERN FORTS—ADMIRAL HOPE STEAMS WITH HIS GUNBOATS UP TO TIEN-TSIN—SIR HOPE GRANT PROCEEDS THERE LIKEWISE—THE INHABITANTS CONCILIATED—CHINESE REBELS THREATEN SHANGHAI—ARRIVAL OF PLENIPOTENTIARIES AT TIEN-TSIN—COMFORTABLE QUARTERS—REMARKS BY THE EDITOR ON THE PLAN OF ATTACK ON THE TAKU FORTS.

ON the 20th August I made a reconnoissance in company with Sir Robert Napier, and advanced to within 600 yards of the north fort without being molested. I then sent forward Mr Parkes and Captain Graham,¹ Royal Engineers, with a flag of truce, with a view of demanding a sur-

¹ Now Colonel Graham, V.C., C.B.

render; but the Chinese showed no signs of yielding, and my two envoys were compelled to retire. The fort was enclosed with the usual crenelated walls, and with two broad ditches. On the space between the walls and the ditches, corresponding to our berm, the ground was thickly studded with upright bamboo spikes. The adjacent country consisted of a salt-marsh, with innumerable broad deep water-courses intersecting it in all directions. By following a winding course, however, ground could be picked out sufficiently sound to admit of the passage of artillery. I arranged with Sir Robert Napier where the ditches were to be bridged, and where the batteries for our heavy guns were to be placed. A bridge of boats was also nearly completed across the Peiho, when the Chinese, discovering our purpose, established a battery to oppose the passage; whereupon General de Montauban sent a force across which succeeded in driving the enemy away. The whole of the Tartar cavalry, so far as we could ascertain, had crossed over to the right bank, by means of a bridge of boats in their possession, lower down.

Flags of truce now came in to us from the viceroy Hang-foo; and the unfortunate inhabitants

sent deputations begging for the cessation of hostilities. As these overtures in no way emanated from the Emperor, Lord Elgin wrote a letter to the viceroy saying that it was now too late to think of peace. This letter was taken across the river under a flag of truce, by Mr Parkes and Augustus Anson, my aide-de-camp. Hang-foo, to our surprise, sent back two of our men and thirteen coolies who had been captured by the Tartars.¹

As a proof of the swampy condition of the country at the time of which I am now writing, I may mention that some days before, the river had risen so high that the ground in the vicinity of our camp was flooded, and the headquarter tents of the 1st Division were a foot under water.

The French general now proposed to me that both our armies should cross the river, and attack the town of Taku, which was intrenched, and the large southern fort on the right bank. This plan, upon further consideration, appeared to me very hazardous, as our right flank would thereby be uncovered and exposed to the attacks of cavalry; while even were the main fort, with its numerous and powerful armament, to fall into our hands,

¹ See page 68.

the remaining defences would give us much trouble. I therefore determined to adhere to my original intention, and endeavoured to convince General de Montauban that by gaining possession of the upper northern fort, we should be able to command all the others. In vain; he remained unmoved, but told me that if I was determined to carry out my plan, he of course would give me his assistance—but that he should feel obliged to write a protest against it. Accordingly, in course of time, I received the following letter :—

“ DU BIVAC DE SIN-HO,
Le 20^e Août 1860.

“ RÉPONSE AU MÉMORANDUM.

“1^e. L'attaque des forts qui restent sur la rive gauche me semble complètement inutile, ainsi que le Général Grant l'a reconnu lui-même il y a trois jours, lorsque nous étions convenus de ne pas nous occuper de ces forts qui tomberont tout naturellement lorsque ceux de la rive droite dans lesquels sont réunis tous les moyens de défense seront tombés eux-mêmes.¹ C'est donc

¹ In the first instance it had been contemplated to act on both sides of the Peiho, and with this view a bridge of boats had been constructed across the river at Ta-Wang-teze.

contre les forts du sud que tous les efforts d'action doivent être dirigés. Tout ce qui sera tenté contre les forts du nord, n'aura pour résultat que de retarder les opérations de l'armée de mer.

“ 2^e. Le fort extérieur du nord étant à peu près de trois mille mètres¹ du fort intérieur, le feu des cannières n'atteindra pas le but que l'on se propose.

“ Quant à réduire le feu des forts du sud, les cannières trouveront dans la rivière des obstacles qui ne leur permettront pas de venir assez près pour obtenir ce résultat. La véritable attaque des forts du sud est par terre, et dans ce cas seulement l'on conçoit que la marine puisse y concourir. Laisser les cannières exposés au feu des forts du sud, sans que ces forts soient inquiétés par terre, me semble une faute capitale contre les règles les plus simples de l'art de la guerre.

“ 3^e. La distance où se trouveront les cannières du fort intérieur du nord ne me permet pas de comprendre comment elles pourraient ouvrir leur feu sur ce fort.

“ 4^e. Aucune communication par la rivière entre l'armée de terre et l'armée de mer ne me paraît

¹ 3280 yards.

possible, même par les canonniers, tant que les forts du sud seront debout ; et pour débarrasser la rivière des obstacles du côté de la rive nord, il faudrait que ces obstacles fussent à une telle distance des forts du sud que ceux-ci ne puissent pas atteindre les travailleurs—ce qu'il est impossible d'admettre.

“ En resumée, de deux choses l'une : ou les forts du nord seront défendus ou ils seront abandonnés. Dans le premier cas, l'opération de leur attaque ne donnera aucun résultat sérieux pour la solution de la question, ni même aucune satisfaction pour la marine ; on y perdra peu de monde peut-être, mais inutilement. Dans le second cas, de quelle utilité sera leur occupation ?

“ De tout temps les forts du sud ont été considérés comme le véritable siège de la puissance de la défense, et c'est contre l'attaque de ces forts de concert avec l'armée de terre que notre brave marine alliée trouvera l'occasion d'une revanche glorieuse.

“ Tout en considérant le plan proposé comme contraire à ce qui avait été convenu d'abord, et comme opposé à mes idées sur la manière de conduire cette opération, je n'en enverrai pas moins une force française de terre pour agir concurre-

ment avec nos alliés, et témoigner par sa présence du désir que j'ai de concourir à toutes les opérations.

“ Mes observations ont surtout pour but de dégager ma responsabilité militaire vis-à-vis de mon gouvernement dans le cas où il jugerait la question sous le point de vue où je l'envisage moi-même.

“ Le Général de Division,
Commandant-en-Chef,
C. DE MONTAUBAN.”

(*Translation.*)

“ BIVOUAC AT SIN-HO.
20th August 1860.

“ ANSWER TO THE MEMORANDUM.

“ I. The attack of the forts situated on the left bank appears to me completely useless, as was admitted by General Grant himself three days ago—when we agreed to pay no heed to these forts, which will fall in the natural course of events, as soon as those which are on the right bank, and in which are combined every means of defence, shall have given way.¹ Consequently, all our active

¹ See note page 77.

measures should be directed against the southern forts. Every attempt against the northern forts will only result in retarding the operations of the sea forces.

"2. The northern exterior fort being about 3000 metres [3280 yards] from the inner fort, the fire of the gunboats will not attain the proposed object.

"As for silencing the southern forts, the gunboats will encounter in the river obstacles which will not allow them to approach sufficiently close to obtain this result. The true attack of the southern forts is by land, and in this case only can it be supposed that the navy will be able to assist. To leave the gunboats exposed to the fire of the southern forts, without distracting their attention on the land side, appears to me a radical error, opposed to the most elementary rules of the art of war.

"3. Considering how great must be the distance of the gunboats from the inner northern fort, I cannot understand how they can open fire against it.

"4. River communication between the land and the sea forces appears to me impossible, even with the aid of gunboats, so long as the southern

forts hold out ; and, in order to clear the river of the obstacles on the northern bank, these obstacles must be assumed to be at such a distance from the southern forts that the workmen would be out of range—a fact which I cannot for one moment admit.

“ To sum up, there are two alternatives : either the northern forts will be defended or they will be abandoned. In the first case, to carry out an attack against them will not seriously affect the solution of the question—will not even give any satisfactory result to the navy. The loss of life involved will, perhaps, be small, but useless. In the second case, of what use will be their occupation ?

“ At all times the southern forts have been considered as the true basis of the power of defence, and it is in attacking these forts in concert with the land forces that our brave allied navy will find an opportunity for a glorious revenge.

“ Notwithstanding that I consider the proposed plan as contrary to what we had previously agreed on, and opposed to my ideas of the method of conducting this operation of war, I shall nevertheless send a French land force to work conjointly with our allies, and to prove by its presence my desire to co-operate in all the operations.

“The object of my observations is, above all, to free myself from military responsibility with reference to my own Government, in the event of its judging the question from the same point of view as that from which I myself regard it.

“The General of Division
Commanding in chief,
C. DE MONTAUBAN.”

I sent the following reply to General de Montauban's memorandum; but I did not alter my opinion, and I arranged that the attack should take place on the 21st August.

“HEADQUARTERS CAMP, SIN-HO,
20th August 1860.”

“SIR,—I have the honour to acknowledge the receipt of your Excellency's memorandum of this date, which embraces so many distinct points, that it becomes necessary to reply to it in detail.

“Your Excellency observes that in the forts on the right bank are collected all the means of defence. To this I cannot assent; for, from personal observation, I find that the north forts do not only in themselves possess great means both of offence and defence, but also, from their posi-

tion, their fire can sweep that part of the right bank along which an army must pass to attack the south forts. Nor can I see how their¹ capture would delay the operations of the army; for the bridge is being equally advanced across the Peiho,² and is not being delayed by this measure, whilst the bridges which have been constructed over the creeks beyond Tang-ku will be ample for both French and English.

“It has never been proposed by the admirals to bring the fire of the gunboats to bear on the inner forts; on the contrary, it was expressly stipulated that they should fire only on the outer forts.

“I fully agree with your Excellency in thinking that it would be a grave error to expose the gunboats to the fire of the south forts without any co-operation from the land forces; but I have yet to learn that this is proposed to be done. It has not been part of my plan, of which I shall treat more fully below.

“I think it most probable that when the north forts are in our possession, the obstacles in the river can be removed; but, of course, this may be

¹ *I.e.*, of the north forts.

² See note, page 77.

doubtful. At all events, we ought to be able to silence any fire they can bring to bear on our working parties. In short, the case resolves itself to this: the bridges over the Peiho will not be completed for three or four days at the soonest. Should we wait for this, and make the great movement down the right bank, the troops would be exposed to such severe fire from the north forts, that the losses would be increased to a very serious extent—losses not only serious, but unnecessary. Nor could the fleets act with any better effect by this plan. I imagine rather the reverse.

“I have already expressed my opinion that the co-operation of the navy is not a military necessity—their object can only be to harass the enemy and divert his attention. No risk should therefore be run by them of losing vessels. It is true that after the capture of Tang-ku I mentioned my opinion that a move to the south bank would be good, but that was before any reconnoissance had been made to the front; and it is still my wish to cross the river as soon as the bridge is completed, and co-operate with your Excellency in the attack of the south forts.

“Much as I regret that my opinion should differ from that of your Excellency, I must still

remind you that I never agreed to any plan to which the present is opposed ; and I can only repeat that my object is to cause the forts to fall speedily and with little loss, and to avoid that hazard which every day's delay at this late season of the year must incur, when it is taken into consideration how much yet remains to be done by the allies before the end of the season.—I have the honour, &c.,

“J. HOPE GRANT.”

The nature of the ground prevented our drawing up a large force, and our total strength amounted to 2500 men, in addition to which General de Montauban stated he would contribute 1000¹ and two field-batteries. Our heavy guns were placed in position, and consisted of four 8-inch guns, two 8-inch howitzers, two 32-pounders, and three 8-inch mortars. We also had in the field two Armstrong batteries, two 9-pounder batteries, and one rocket battery.

¹ Such is the number stated in Sir Hope Grant's diary. Other sources of information, however, lead to the conclusion that the actual strength of their infantry on this occasion did not exceed 400 of all ranks ; and Sir Hope himself, on being appealed to, is inclined to consider the latter estimate correct.—H. K.

At five o'clock on the morning of the 21st August, the enemy opened on us a heavy fire from the two upper forts, one on either side of the river. Our guns quickly responded, and a cannonade from our forty-seven pieces was maintained with great vigour for three hours. Our shot fell thick upon the doomed fort, and at about 6 o'clock A.M., an eight-inch shell falling on their powder magazine blew it up with a terrific explosion. For some time the fort was so shrouded in dense clouds of vapour and smoke, that it appeared to have been entirely destroyed; but by degrees it cleared away; the enemy recommenced fire, and seemed determined not to give up the place without a desperate struggle. Inside the work was a high cavalier from which heavy guns were opened on us, but we soon succeeded in silencing them. The general direction of our attack was against the enemy's rear—a fact on which they had by no means calculated, as they were thus almost entirely exposed to our fire.

Our marines now brought up the pontoons for the purpose of forming a bridge across the broad ditches. They were baffled in their endeavours owing to the heavy matchlock-fire from the walls, and sixteen of them were knocked over. The

French were more successful. By means of scaling-ladders carried by Chinese coolies, they constructed a way across the ditch. The Chinamen jumped into the water up to their necks, and supported the ladders upon their hands and shoulders, to enable the men to get across. These poor fellows behaved gallantly, and though some of them were shot down they never flinched in the least.

The allied forces now pushed forward. Our storming-party consisted of the 44th and 67th Regiments. Some of our men swam across the ditch, and others got over with the French. On reaching the escarp they were sheltered from fire. The French placed their ladders against the parapet and endeavoured to get over; but the defenders offered a vigorous resistance with their swords and pikes, and knocked them off the crest as soon as they showed themselves. At last my aide-de-camp, Anson, gallantly succeeded in clambering across a drawbridge which had been hauled up over the ditch in front of my force, and with his sword cut the supporting ropes. In this operation he was nobly aided by Lieut.-Col. Mann of the Royal Engineers. The bridge fell into its proper position, and afforded to our men a means of crossing. Some of our officers perceived a

small breach which we had effected in the wall close to the gate, and here Lieut. Burslem of the 67th Regiment forced his way in, but was driven back. Lieutenant Rogers¹ was the next to enter, but was wounded.

The French, who behaved as gallantly as possible—worthy of the great nation to which they belonged—entered the breach at the same time as our men, and their great ambition was to plant their standard first upon the walls; but young Chaplin² of the 67th Regiment, who carried the colours of his corps, outdid them, and placed the British standard upon the highest part of the works. He was wounded in three places.

Our combined navies had brought up gunboats to within 1800 yards of the two forts at the mouth of the river and commenced firing. Their practice was excellent, and one of their shells exploded a large magazine in the lower fort on the left bank of the river. The damage inflicted we were unable at first to ascertain. The poor Chinese now had a sad time of it; they had fought desperately and with great bravery, few of them apparently having attempted to escape. Indeed they could

¹ Now Major Rogers, V.C., 90th Foot.

² Now Captain Chaplin, V.C., 8th Hussars.

hardly have effected their retreat by the other side of the fort—the wall was very high, and the ground below bristled with innumerable sharp bamboo stakes. Then intervened a broad, deep ditch, another row of stakes, and, finally, another large ditch. The only regular exit, the gate, was barred by ourselves. Numbers were killed, and I saw three poor wretches impaled upon the stakes; and yet, notwithstanding all the difficulties which I have pointed out, a considerable number succeeded in getting off.¹ The upper fort on the southern side of the river was completely commanded by the guns on the northern bank, only about 400 yards distant. The enemy was therefore compelled to abandon it. The fort we had captured presented a terrible appearance of devastation. The explosion of the magazine had ruined a large portion of the interior; many of the guns were dismantled, and the parapets battered to pieces. Seventeen of our men were killed, and 184, including twenty-one officers, wounded. Sir Robert Napier, whose conduct was very gallant, was struck by shot in five places,

¹ It was afterwards ascertained that the garrison of this little fort was 500 men, of whom about 100 succeeded in effecting their escape.

but was not actually wounded. Shortly after the fall of the work, Lord Elgin rode down and examined it.¹

During the early part of the day numerous war-flags had waved defiantly over the other intrenchments, but about this time we suddenly perceived that they had been replaced by white banners. I sent Mr Parkes and Major Sarel, one of my acting aides-de-camp, to summon the defenders of the other northern fort to surrender; but the garrison returned a very insulting answer, to the effect that only one of their works had fallen, and there still remained four more to be captured. I therefore made arrangements with General Colineau, who commanded the French force, at once to proceed to the attack. With this view I moved two 8-inch guns up to within about 900 yards of the work, and caused three heavy guns which had been captured in the cavalier, and which were not more than 1600 yards distant, to be turned in the same direction. The French, however, would not wait for us, hurried forward, reached the fort without a shot being

¹ See also the very brilliant account of the storming of the Taku forts, in Sir Garnet Wolseley's Narrative of the China War, p. 132.

fired at them, marched in by one of the large embrasures, and thus¹ the place was captured without resistance. The fortification was strong towards the sea, but weak on the land side, by which an entrance had been effected, and unenclosed, save by a thin wall, which was not shot-proof. In it were two cavaliers; and it also completely commanded the large fort on the right side of the river about 200 yards distant; and though this latter work was likewise strengthened with two cavaliers, a few shot from our last capture would have silenced all their guns. This showed that I was justified in assuming beforehand that the plan of attack which I had projected would prove successful. About 2000 prisoners fell into our hands, and much to their surprise they were allowed to go away in peace. We likewise captured some enormous brass ordnance, and several of the iron guns lost by our navy during their severe engagement of 1859. We now sent flags of truce across the river to Hang-foo² by Mr Parkes and Anson, and demanded the surrender of all the remaining forts with their guns and other military stores. After a long delay this was agreed to, upon condi-

¹ About two hours after the capture of the first fort.

² Governor-General of the province.

tion of the inhabitants being protected, and their property spared, to which, of course, we instantly assented.¹

That afternoon heavy rain commenced to fall, which ere long swamped the whole country, rendering the task of removing our guns a difficult one. Several sank up to their axle-trees, and had to be left for the night.

The next day, 22d August, I sent over Sir Robert Napier to take possession of the forts on the right bank. They were all handed over to him in due form, including 600 guns. The same day Admiral Hope broke away the chains and barriers which had been placed across the river. He was now able to get his gunboats up, and on the 23d he started for Tien-tsin, about sixty miles distant. He met with no opposition, and on approaching the town he found a deputation inviting us to occupy it. I accordingly sent forward the 1st Foot (the Royals), the 67th Regiment, and an Armstrong battery of artillery, under Brigadier Staveley, to take possession of it ; and on the 24th August, I myself started up the Peiho river in the Granada for the same destination, which we

¹ For Sir Hope Grant's official despatch relating to the capture of the Taku forts, see Appendix II.

reached in four hours' time. Before setting out I left a small garrison in the large southern fort. Tien-tsin was a much larger town than we had anticipated.

About two and a half miles south of the town, and on the river-banks, were two strong newly-constructed forts, but their guns had been removed, and were afterwards found buried close at hand. On 26th August, we procured some Tartar ponies by the aid of Mr Parkes, and rode out into the adjacent country to select a site for an encampment. Our choice fell on some ground near the temple where Lord Elgin had signed the treaty in 1858. The building was turned into a commissariat "Godown."¹ The Tartar general, Sang-ko-lin-sin, had constructed a crenelated wall round Tien-tsin, which, with a broad ditch, he had expected would keep us at bay. But after our easy conquest of all his other forts, he thought it wiser to retreat forthwith with his army, and the place was denuded of troops. The inhabitants at first were frightened; but finding that so far from molesting them we treated them with kindness, they soon gained courage, and brought us in plentiful supplies, amongst which were fine fat

¹ A "Godown" is a large storehouse.

sheep weighing 70 or 80 lb. each, fat oxen, apples, pears, grapes, peaches, and the great luxury of enormous blocks of ice.

Information reached us from Shanghai that the rebels intended to attack that town; so, on the 24th August, I sent the 44th Regiment from the Taku forts, under Brigadier Jephson, to strengthen the force at Shanghai. Lord Elgin and Baron Gros came to Tien-tsin, and we all three took up our quarters in an excellent clean house, the property of a wealthy and important grain merchant. Around the main building were courtyards, along the sides of which were ranged small rooms with the peculiar circular entrance, showing that they were the ladies' apartments. The couches inside were so constructed as to admit of fires being lit underneath them in winter. As may be supposed, extreme care was necessary in the indulgence of this luxury. The good people of the house seemed quite to approve of our having taken possession of their domicile.

Some additional remarks on the plan of attack on the Taku Forts. By the Editor.

General de Montauban was so strongly opposed

to the projected plan of attack, that he declined to give any countenance to the undertaking beyond assisting with a single battalion of 400 men of all ranks, with a feeble force of artillery¹—our own force so employed amounting to 2500 men. Moreover, in order to mark still further his disapproval, he did not appear on the scene of conflict—as I am informed by English staff officers who were eyewitnesses—until after the fight for the north fort had been brought to a successful conclusion. He was then unprovided with his sword.

Seldom indeed have commanders been willing to assume the amount of responsibility which Sir Hope Grant so readily took upon himself. Had there been the slightest miscarriage, had the result been even indecisive, the military reputation of the projector would have received a death-blow. The war had never been popular in England; and an outburst of censure would have

¹ After careful investigation and numerous inquiries, I am led to the conclusion that the French furnished one field-battery, of 4 guns only, and not two field-batteries, as promised the previous day by General de Montauban. Moreover Captain (now Colonel) Desborough informs me,—“ Assistance from General Collineau was asked to support his storming columns, and two howitzers of my own battery, under Sir John Campbell, were placed so as best to attain this object.”—H. K.

arisen, based on the fact that our allies had emphatically condemned the course we had adopted. It must be remembered that in 1860 there was attributed to the French a knowledge of, and aptitude in, the science of war which was supposed to leave every other nation far in the rear, similarly as in 1875 any Prussian military practice is lauded as perfection, for the sole reason that it is a Prussian military practice. On the other hand, in the event of a successful issue, the hazards attendant on the assumption of responsibility would be forgotten in the feeling that "all's well that ends well"—were, in point of fact, forgotten in the anxiety to smooth over the susceptibilities of our allies. I trust, therefore, it will not be unbecoming in me to enlarge upon one or two points connected with the most critical operation in the campaign, which want of time prevented Sir Hope dwelling on in his despatch. The works south of the Peiho were in themselves much stronger; they had numerous guns mounted on cavaliers; they were surrounded by two, and in places by three, wet ditches, together with abattis and pointed stakes; the escarps were 15 feet high, and the parapets were literally bristling with cannon, and enormously thick.

From the river side the only means of approach was across a muddy open expanse; and General de Montauban himself admitted that an attack from this direction was not to be thought of. But supposing that we had split up our army, and had brought the greater part of it across the Peiho in the very face of the enemy—thus repeating on a small scale the operations of the Russians at Friedland—our next step must have been the capture of the works about Suku, after which we must have marched against one of the main southern forts, each of which was far more susceptible of defence from the guns on the opposite side of the river, than were the north forts capable of being aided by the south. Moreover, in our advance over the open country, we should have been especially liable to be surrounded by the numerous Tartar cavalry, which had so nearly performed that feat in front of Sin-ho, and which we knew had crossed the Peiho in a body. This danger would have been a formidable one. We should have been cut off from our base, and from our supplies at Peh-tang; and the Chinese would always have had it in their power to harass us in our rear by forces sallying forth from the northern forts. Lastly, it was made manifest

that the fall of the southern works would not have involved the surrender of those on the other bank.

Let us now review the advantages of the plan of attack which was actually carried out. The works assailed were of a comparatively less formidable construction. By means of our temporary road, we were enabled to make a detour, whereby we avoided to a great extent the fire from the opposite bank. Under any circumstances we could only have been exposed to this fire while crossing the portion of ground between the upper and lower north forts. General de Montauban miscalculated this interval in fixing it at 3280 yards. A reference to the map shows it to have been not more than 1500 yards. With these two forts in our possession, we should command the similar ones on the other side; we should be able to enfilade completely the two long faces of the large southern fort; and, finally, we should take in reverse the sea-defences of the principal northern work, from which direction alone the Chinese expected to be attacked.¹

¹ I am told by Sir Hope Grant that during the first China war in 1842 there was a current statement—which seems to have been revived for the present occasion—to the effect that, in a subsequently

Every single one of these anticipations were fulfilled to the letter. The capture of the weakest of the four largest works was followed by the almost instant submission of the remainder ; and if success be a test of sound reasoning, it can hardly be denied that the step which Sir Hope resolved upon in opposition to the counsels of the French, was based on the soundest military wisdom.—H. KNOLLYS.

captured Chinese despatch, it was mentioned that “the ignorant barbarians, not knowing that guns could not be fired against an object behind them, came upon us in rear, and thus rendered all our cannons useless.”

ON 31st August, three Commissioners arrived¹ from Peking with a view to stop our advance. They gave out that they were intrusted with full powers; but this turned out to be false. They were only mandarins of small importance; and therefore, when on the 7th September they brought forward pretended terms of a convention, Lord Elgin and Baron Gros instantly broke off negotiations, stating their resolution not to conclude a treaty before reaching Tang-chow, fifteen miles from Peking.

[Tien-tsin, on the Peking road, is thirty-five miles distant from Taku. The French advanced by the left bank of the Peiho, the English by the right; and by the 5th of September the bulk of our troops had been concentrated about the above-mentioned town. Throughout the camp there was a confident anticipation that all the fighting had come to an end—an expectation which was shared by Sir Hope Grant, as is manifest from the following despatches:—

“HEADQUARTERS, TIEN-TSIN,
3d September 1860.

“MY LORD,—I have the honour to request

¹ At Tien-tsin.

that your Excellency will inform me what amount of escort you wish to accompany the special Embassy to Peking; and also, in about how many days they will be required to be ready to start.—I have, &c.

“J. HOPE GRANT.

“The Right Hon. the EARL of ELGIN
and KINCARDINE.”

The strength of the English escort was fixed at 1000 men, and a battery of artillery; but the French, for reasons best known to themselves, objected to our so employing more than 150 men.

“HEADQUARTERS, TIEN-TSIN,
7th September 1860.”

“MY LORD,—I have the honour to inform your Excellency that the recent operations in the north of China having terminated successfully, peace is about to be concluded with the Chinese Government. I shall be much obliged, therefore, by your ordering all further supplies of every kind for the army in China, that have not yet left India, to be stopped. Orders have been sent to Singapore to send back everything that has not

yet passed that point, unless they can be disposed of on the spot. . . .

I have . . . &c.

“ J. HOPE GRANT,

Lieut.-Gen., Commander-in-Chief in China.

“ The Right Hon. EARL CANNING, G.C.B.,
Viceroy and Governor-General of India.”

It had come to Mr Parkes's knowledge that the Chinese General, Sang-ko-lin-sin, had organised a kind of commissariat at Tien-tsin, and he immediately offered to employ the chief officers, consisting of merchants and burgesses, for our own purposes. They readily responded, and brought in large supplies of sheep, oxen, vegetables, fruit, and blocks of ice.—H. K.]

On 8th September, we recommenced our march with a small mixed force¹ of 800 infantry, 600 cavalry, and two batteries of artillery. Lord Elgin and I set out, and overtook them on the 9th. During the third night after our start the rain came down in a deluge, whereupon nearly the whole of our drivers, Chinese cartmen, to-

¹ Viz., Stirling's and Barry's Batteries, the King's Dragoon Guards, Fane's Horse, 99th Regiment, and 200 Marines—the whole under the command of Brigadier Reeves.

gether with their mules and ponies, conveying our baggage, absconded. This delayed us for a day, until with great difficulty we obtained water transport. On the 13th September we reached the pretty little town of Ho-si-wu, half-way between Peking and Tien-tsin, and on the 16th I was joined by Sir John Michel's division, raising our force to 2300 infantry, a company and a half of engineers, three batteries of artillery, and the whole of the cavalry. The French with 1200 men marched into the town the day after ourselves. Sir Robert Napier's division remained behind to hold Tien-tsin, 40 miles to our rear; and as there was good water communication the whole way, I arranged with Admiral Hope to establish a depot at Ho-si-wu, in furtherance of which end he sent us up a flotilla of junks as transport. I also left a regiment, three 6-pounder guns, and 25 sowars to hold the place.

On 11th September despatches arrived for Lord Elgin and Baron Gros from Peking, and Messrs Parkes and Wade,¹ the latter consul and interpreter, started off on September 13th with an escort

¹ Now T. F. Wade, Esq., C.B., Envoy Extraordinary, Minister Plenipotentiary, and Chief Superintendent of British trade in China.

to meet the Commissioners at Matow, 12 miles from Ho-si-wu, but found the latter had gone back to Tang-chow, to which place our envoys followed them. They proved to be mandarins, one of whom was Tsai, Prince of I, a nephew of the Emperor's, and a conference was held, which lasted until past midnight; but the Chinese had to make their way back to Peking to obtain the Imperial authority. Parkes and Wade returned to us on the 15th, stating that they had seen about 2000 Tartar cavalry drawn up alongside the road for their inspection, and that they had been treated very civilly. The Commissioners through them prayed us not to advance any further with our army. Lord Elgin sent word in reply that we must march to within five miles of Tang-chow, but would not exceed this limit. To this concession the mandarins agreed with great reluctance. On 17th September we marched for Matow, 12 miles distant, Lord Elgin and Baron Gros remaining behind at Ho-si-wu for a few days. The roads were heavy, and the baggage did not arrive until very late. The entire country appeared to be in a high state of cultivation. The crops of millet and maize were so lofty as to close in the view to within a distance of twenty

yards to a man on horseback. Parkes and Loch,¹ one of Lord Elgin's staff, Mr De Norman,² Colonel Walker,³ Quartermaster-General, and Mr Thompson,⁴ a commissariat officer, had gone on ahead to Tang-chow⁵ to select a site for encampment and to procure supplies.

On the 18th September we recommenced our march at 5 A.M., the French on this occasion following us. When we had proceeded about three miles, to my surprise we found a strong Tartar picket occupying a farmhouse on the road-side, who retired on our approach. A little further on were seen great bodies of cavalry and infantry, the latter drawn up behind a large nullah or water-course to our right front, displaying innumerable war-banners. We halted for the purpose of forming up our infantry; and seeing that we were likely to meet with resistance, I massed our baggage in rear near the farmhouse, where the

⁵ About 65 miles distant from Tien-tsin.

Tartar picket had been posted. Meanwhile Loch galloped in from Tang-chow with some sowars,¹ and brought letters from Parkes, announcing that the matters with which he had been busied were going on satisfactorily. Lieutenant Anderson, a very fine young fellow, had been sent with Parkes in command of 20 sowars as escort; and Mr Bowlby,² the correspondent of the 'Times,' had accompanied the party. Loch further stated that Mr Parkes had started on the return journey with him, but finding that works had been thrown up, guns placed in position, and a large army assembled, had ridden back to ask the meaning of these preparations, and, if necessary, to remonstrate with the mandarins for this active resumption of hostilities after the conference and the proposals for peace. Loch now requested me to allow him to return, under a flag of truce, to look after Parkes; and an artillery officer, Captain Brabazon,³ asked for leave to ac-

¹ A *sowar* is a native cavalryman from India.

² Shared the same fate as Mr De Norman. See preceding page.

³ Subsequently treacherously captured and murdered by the Chinese. From what Sir Hope Grant states it is evident that Captain Brabazon lost his life in the performance of a duty with which he was intrusted, and not through volunteering for an undertaking merely to satisfy curiosity.—H. K.

company him. At first I refused this latter request; but Brigadier Crofton, commanding the Royal Artillery, pointed out how valuable would be the knowledge of the ground thus obtained, and I regret to say I yielded. Captain Fane, of Fane's Horse, likewise applied for permission to go, but I refused peremptorily—fortunately indeed for him, as will be seen.

A mandarin of high rank, by name Hang-ki, now came to us in his sedan-chair with a flag of truce, and requested to see Lord Elgin. He was told that the ambassadors were not with the armies, and after a short time he went away. A Chinese petty officer and three men also rode up and offered to show us our camping-ground, but they were ordered off.

The name of the place where the enemy had taken up a position, and where we were to have encamped, was Chan-chia-wan. We looked through our telescopes along the line of Chinese troops and made out Colonel Walker and three of the Dragoon Guards on their horses, but to our surprise they did not come out to meet us. The space of ground occupied by the enemy extended over three miles, and as they were moving round both our flanks, I sent a squadron out to our

right and left with directions to keep a good look-out, and advanced a battery of 9-pounders to some high ground on our right flank, with orders to prepare for action. Suddenly we heard a heavy fire of matchlocks and gingals, and a number of horsemen were seen galloping furiously towards us. They turned out to be Colonel Walker and his party. They soon reached us and told us their story. They had been detained by the enemy, but were civilly treated, when a French officer rode up and began to dispute with some Tartars about a mule he was riding. At last he drew a pistol and fired it, when his mule was immediately shot, and he himself murdered. Colonel Walker rode to his assistance, but his sword was struck out of his hand; and though it was restored to him by a Chinese officer, fresh efforts were made to wrest it from him, and in his endeavours to retain it, his fingers were so badly cut that his hand was disabled. Then finding that their only hope of safety was to force their way out, he shouted to his party to ride for their lives. All charged through the enemy and made their escape—viz., Colonel Walker, Mr Thompson of the Commissariat, one sowar and four Dragoon Guards, one of whom

was shot through the leg. Mr Thompson received several spear-wounds in the back, and one horse was shot through the body, but managed to convey its rider back in safety.

Loch and Brabazon had been absent for two hours, and it was evident they had been detained. At all events, after the treacherous conduct of the Chinese, we had no option but to proceed with our attack, and General de Montauban and myself agreed that he should take the right and turn the enemy's position. I placed at his entire disposal a squadron of Fane's Horse, which had already pushed on in that direction. General de Montauban accordingly advanced and soon got on the left flank of the Chinese who were lining the dry water-course. He then brought up his artillery and opened an enfilading fire upon them, from which they must have suffered considerably, as they had not apparently the power of moving their guns and were unable to reply. They therefore attacked him with their cavalry, and for a short time the French guns were in jeopardy. Colonel de Bentzman commanding the French artillery afterwards told me that he drew his revolver as a last resource to aid in endeavouring to save them. Our gallant little force of cavalry with

about half-a-dozen troopers which General de Montauban had with him,¹ the whole led by Colonel Foley, the Commissioner with the French, now charged the Tartars, and, though a handful compared with them, used their sharp swords with such effect that the enemy was compelled to retreat.

I had already ordered the 9-pounder battery to open fire, which diverted the attention of the Chinese from the French flank attack, which was further supported by the 99th Regiment and the Dragoon Guards. Sir John Michel was sent to the left with the 2d Queen's, Stirling's 6-pounder battery,² and the native cavalry, to act against the enemy's right; and I proceeded to the point with the Armstrong guns, the Musbee³ Sikhs, and a squadron of the Dragoon Guards. The enemy opened upon us from all points, but their fire was ineffectual.

Sir John Michel encountered such heavy masses on his left that he had some difficulty in holding

¹ The French expedition was unprovided with cavalry, with the exception of a few mounted orderlies.

² The present designation of this battery is B Battery 14th Brigade.

³ The Musbee is a low caste of Sikh, really the sweeper caste.

his position, and was attacked by a large body of Tartar cavalry. Probyn, who had only 100 of his regiment with him at the time, was ordered to charge to the front, which he did in most gallant style, riding in amongst them with such vigour and determination that they could not withstand his attack for a moment, and fled in utter consternation. The Musbees then advanced in a steady line carrying everything before them, and taking several guns. By-and-by we were joined by the 99th Regiment, the 9-pounder battery and the Dragoon Guards; and Sir John Michel having sent to say that the enemy was still very strong in front of him, I sent the Armstrong battery to his assistance, and shortly after they retired. The whole of their position was now captured, and I sent a message to the French, who had made a long circuit, to say that I intended to advance and take the town of Chan-chiawan; but General de Montauban replied that his men were so knocked up that he did not propose to advance any further. The squadron of Fane's Horse, commanded by Lieutenant Cattley,¹ crossed over and joined Michel, and I rode on

¹ Since dead.

and found the enemy had evacuated Chan-chia-wan. Advancing through it with the Musbees, about a mile on the other side I came to a large Chinese camp in which we took several guns. The total number which fell into the hands of the allies that day amounted to 80. Our combined forces did not exceed 4000 men. We occupied the town.¹

During the night a fire broke out and I was in great trepidation lest it should spread; fortunately it was confined to one house. In the evening I sent out a picket on the Tang-chow road; and on the following day, 19th, fresh pickets were pushed still more forward. Wade was sent with a flag of truce into Tang-chow to find out what had become of the prisoners, and to warn the authorities that, if they were not given up, our forces would take Peking. The Prefect stated that Mr Parkes had left the town on the day of the fight, and, he supposed, had gone back to us. As Wade was returning he saw a large camp to the west of Tang-chow, but on trying to communicate with it was fired at. Lord Elgin and his suite joined our camp this day from Ho-si-wu; and on

¹ The strength of the Chinese was estimated at about 20,000 men.

the 20th September General Collineau's brigade arrived, raising the French force to 3000 men. I also sent an order to Sir Robert Napier to march up from Ho-si-wu with two regiments, one of which was to be the 60th, as soon as possible. The 31st Regiment was to be distributed between Ho-si-wu and Yang-tsun, half-way on the road to Tien-tsin. Our head commissariat officer, Mr Turner,¹ also arrived, and to my great satisfaction reported that he had brought up the flotilla with commissariat stores to Ho-si-wu from Tien-tsin.

On 21st September, at 5 A.M., we resumed our march. The weather had become much cooler, and the country more easy for marching. When two miles outside Chan-chia-wan, I had to wait to enable the French to come up and take their position on our right, according to their turn. Our baggage was collected in two small villages, and 100 infantry left to guard it. We were only a short distance from the enemy; and after we had advanced a mile, their guns opened on the French. Opposite the latter was the canal bridge of Pa-le-chiao,² apparently strongly fortified.

¹ Since dead.

² Whence General de Montauban subsequently derived his title of Count Palikao.

Our troops were formed up with the infantry on the right, artillery in the centre, and cavalry in echelon on the left, and I then rode up to the French to reconnoitre the position of the enemy. As I was quietly riding back, I saw some cavalry on the left front of our allies, which I at first took for some of their skirmishers, when they suddenly approached me, and I found that they were Tartars. I immediately galloped off to Stirling's guns,¹ and opened fire with case at a range of 200 yards, which quickly made them retire. The King's Dragoon Guards and Fane's Horse, with Probyn's regiment in support, now advanced to the charge; the first-named taking a bank and ditch on their way, and, attacking the Tartars with the utmost vigour, instantly made them give way. Fane's men followed them in pursuit, and on reaching the margin of a road jumped into it over an interposing high bank and ditch. The front rank cleared it well; but the men in rear, unable to see before them owing to the excessive dust, almost all rolled into the ditch. Nevertheless, the Tartars had but a poor chance, and suffered severely. The whole of their cavalry retreated, and we followed them up for some time, occasion-

¹ B Battery, 14th Brigade.

ally firing long shots at them with our Armstrongs with good effect.

We continued our advance until we were stopped by a force firing at us from a strong position in a village and from a tope of trees. We soon, however, brought up some infantry, and dislodged them without difficulty. It must have formed the camping-ground of a Tartar general of some importance, as we there captured two yellow silk banners belonging to the Imperial Guard, one of which I have now in my possession ; eighteen brass guns likewise here fell into our possession. The French attacked the bridge of Pa-le-chiao with great gallantry. The *élite* of the Chinese Imperial Guard was drawn up to resist them, but had to give way before European discipline. The French took with the bridge twenty-five guns.

The enemy had apparently disappeared, and I retired towards the bridge, where our camp was being pitched, when suddenly fire was opened on us from the other side, whereupon the Musbees crossed the canal, took the guns, and killed sixty of the enemy. We finally encamped upon some high ground on the right bank of the canal, and the French on the other side, near the Pa-le-chiao

bridge. The next morning, 22d September, a flag of truce was sent in, with letters from the highest mandarin in the empire, Prince Kung, brother to the Emperor. He stated that he had been appointed chief commissioner in room of the last two, whose conduct had not been approved of, and that he was anxious to come to terms with us; but he said nothing with regard to our poor prisoners. Lord Elgin and Baron Gros replied in strong terms, that they declined to open negotiations until the captives were returned. The next day another letter came from the Prince, stating that our people were safe; that Sang-ko-lin-sin had seized them the day of the first fight; and that the only conditions on which they would be sent back were the restitution of the Taku forts and the evacuation by our fleet of the Peiho river. He added that the Emperor had agreed to sign the treaty; but that he could not consent to Lord Elgin delivering to him in person a letter from the Queen of England. Upon this Lord Elgin wrote a most decided letter. He told the high commissioner that if the Chinese Government chose to break through the law of nations with regard to flags of truce, they must abide by the consequences, and that the vengeance

of the British and French would be visited upon their country for such an act of perfidy. As for delivering in person her Majesty's letter to the Emperor, he would waive that point; but that not a ship or any part of the army should leave the country until the provisions of the treaty had been carried out. The Chinese still evaded giving up the prisoners; and Lord Elgin therefore resolved that our advance upon Peking should not be arrested.

[Prince Kung also threatened that the entry of our forces into the capital would be followed by the instant massacre of the prisoners. The perils which environed these latter placed both the military and the diplomatic chiefs in a position of the most painful perplexity. Mr Parkes and his party having been kidnapped in violation of the laws of nations, when employed upon diplomatic duty, could not be considered lawful prisoners of war; and Lord Elgin always refused, in his correspondence with the Chinese, to admit them to be such. The cruel and treacherous people into whose hands they had fallen, if irritated, were quite capable of wreaking a fearful vengeance on them, as subsequent events proved. And yet to have yielded one iota in our demands to insure

the safety of our fellow-countrymen would have been the most fatal of all precedents—would have been a premium on future bad faith, and might almost have neutralised the successes we had already gained. The plenipotentiaries, therefore, made the surrender of the prisoners a *sine qua non* before hostilities could be suspended.—
H. K.]

Sir Robert Napier arrived with his deputy assistant quartermaster-general, Lieut. Lumsden, on the 24th September, but his division was a few days' march in rear. I sent the irregular cavalry to make a reconnoissance up to Peking; and on their return, Probyn, who was in command, told me that, along the whole distance, he had seen neither troops nor camps, but that report stated that the Chinese army was in position to the north of the town. He had ridden up to within 200 yards of the walls, which he described as being very high and in excellent repair. On the 26th, Lord Elgin and I rode to Chan-chia-wan to pay a visit to General Ignatieff, the Russian ambassador, who had throughout followed us up in our march, and was now on his way to Tang-chow. He received us very cordially, and showed us an excellent map, which he had caused to be made,

of Peking, wherein was represented every street and house of importance. This plan he kindly lent me to copy, merely stipulating that it should not be published, as it had not yet been sent to St Petersburg.¹ I had it photographed by Signor Beato, whom I had specially allowed to accompany the expedition, and who had previously photographed scenes in India and the Crimea. I also obtained some further very valuable information from the Russians—to the effect that the Tartar town, separated from the Chinese by a wall, occupied the northern portion; that the city was surrounded by large suburbs and numerous trees, and that the ditch was deep and broad on three sides, but on the north side shallow, and in many places almost dry. In this direction, moreover, the ground was much more open. General de Montauban was of opinion that the town ought to be attacked on the south side, but in consequence of the above information, I differed with him. We wished to molest the Chinese as little as possible: on the north, where it was stated that

¹ This acquisition ultimately proved of great value. The streets therein laid down had been “traversed” in a cart from which angles had been taken, while indicators fixed to the wheels marked the distances gone over. See note at end of this chapter.

the Tartar streets were wide and the population scanty, there would be greater facilities for forcing an entrance ; and lastly, in this direction the Summer Palace of the Emperor was little more than four miles distant from the city.

On 27th September, the two regiments of Sir Robert Napier's division from Ho-si-wu, together with Pennycuick's and Bedingfield's batteries, marched in, and on the 29th our siege-guns arrived, under the charge of Captain Dew, R.N.¹ He had had great difficulty in bringing them up, owing to the shallowness of the river, and at places had been obliged to have recourse to the company of Madras sappers, which I had sent with the guns in order to cut channels. The day before I had ordered Probyn, with the 1st Irregular Cavalry, to make another reconnoissance, and to ascertain the whereabouts of the Tartar camp—a task which this excellent officer performed with great judgment. He came upon their pickets, drove them in, and discovered their camping-ground to be on the north-east of the town. On 30th September an ultimatum was sent by Lord Elgin and Baron Gros to Peking, to which the Chinese returned an

¹ Since dead.

answer, that if we would retire to Chan-chia-wan, they were willing to sign a treaty there. Our plenipotentiaries rejoined that this reply was not at all satisfactory, and that the forces should march to Peking. I left the marines and a couple of guns at Tang-chow¹ to hold that place as a protection to our convoys coming up, and I also established a depot in some roomy old tombs, near the bridge of Pa-le-chiao and the village. These places were built with substantial walls, and were capable of making a good defence. As a temporary measure, I also left there our siege-train, with 200 infantry. Several of our sowars had been fired at conveying letters from Chan-chia-wan down the road, and in compliance with my request, General de Montauban took possession of the town with 100 men, to whom I added 25 irregular cavalry, thus enabling us to keep up our communication with the south.

On the 1st October, Prince Kung again wrote praying us to stay our march, and hinting that Mr Parkes should be employed as a mediator; but on the 2d the allied ambassadors again replied that they would listen to nothing until the

¹ This town had surrendered without opposition.

prisoners had been given up. The same evening Kung sent another letter accompanied by one from Parkes written in Chinese semi-officially, requesting that clothes might be sent for himself and Loch. In the margin were added the words in English "we two are quite well treated," and another sentence in Hindostani by Loch, which conveyed to us a warning that the rest of the letter was written under compulsion. The clothes were forwarded, and a letter was written which would do the prisoners no harm should the Chinese choose to read it, stating what we menaced if they were not given up.¹

On the 3d October we marched again, crossed the canal, and halted at the depot,² which was called Chan Kia-Ying. Here we were obliged to wait pending the arrival of a French convoy. On the 4th the merchants of Peking sent presents of supplies to Lord Elgin and Baron Gros, entreating at the same time that we would not ad-

¹ Upon some of the clothes thus sent were written in Hindostani the following sentences around the name marked on them: "In three days we shall commence hostilities again;" and "What is the name of the place in which you are confined?" By the next letter received from them, we learned that they were lodged in the Kaon-meon Temple near the Teh-shun gate.—Wolseley, p. 211.

² See preceding page.

vance further. We also heard from Parkes and Loch, saying that they had received the clothes, that they were confined in a temple near the Teyshun gate, and that only three of the remaining prisoners were with them. Parkes added an official note stating the wishes of Prince Kung and his colleagues. On the morning of the 5th October we marched, the men carrying three days' rations. The country was so intersected with houses and trees, that our progress often became difficult. We only accomplished about five miles, and then encamped round some old brick-kilns about three miles from the north-east angle of Peking. On the 6th October, after a couple of hours' march we came upon a large grass-covered ruined rampart where the men halted for breakfast, and where General de Montauban and I agreed that, as the army of Sangko-lin-sin had apparently retreated, we should make for the Summer Palace, where we should probably find the Emperor or principal Government officials. It was the turn of the English to march first, and as the country was much enclosed, rendering our advance in a regulated line impracticable, I pushed on in front with a strong advanced-guard and with flankers. At the same

time our cavalry moved off to the right, and were directed to take a wide circuit on that flank. When we had gone a couple of miles, it was reported to me that a strong force of Tartar cavalry was moving ahead of us. They retreated, however, so quickly, that we soon lost sight of them amongst the trees and houses; but I was determined to follow them up, and moved my force along a road which led up to a rampart, forming a part of the same ruined fortifications before mentioned. Our troops were now much fatigued; and I gave orders for them to encamp near some fine temples situated on a large open plain within the line of works, while I myself went in search of the French General, whom we supposed to be on our left, for the purpose of holding a conference with him. But he was nowhere to be found, and the cavalry which I had sent out as flankers had also disappeared. He and his force must have lost us in the enclosed country. I rode all along the line of ramparts to try and find them, but in vain. It had no doubt been arranged between us that we should ultimately march to the Summer Palace, but I expected that in the first instance the French would follow us.

Lord Elgin and I took up our quarters in a handsome old temple dedicated to Confucius. As soon as it became dark, I ordered large fires to be lighted to indicate to the French and to our cavalry the position of our camp, in the event of their having lost their way; and the following morning, the 7th October, I caused a salute of 21 guns to be fired from some rising ground outside the rampart with the same object. Even this was of no avail, and so I sent a squadron of the King's Dragoon Guards to find out the exact position of the Summer Palace, and to ascertain if the French and our cavalry were there. Wolseley, Deputy Assistant Quartermaster-General, went with this party, and at 9 A.M. returned with the information that he had found them at Yuan-min-yuan—the Chinese name of the Palace. The French during their march had missed our track, and had therefore proceeded to the Palace. After breakfast Lord Elgin and I rode over to see General de Montauban. In the distance we at last perceived the Palace beautifully situated amidst gardens and woods, and a range of large suburbs in front. We passed the park walls by a fine old stately gateway, and proceeding up an avenue, came to a range of

handsome dwellings roofed over with yellow tiles, turned up at the ends, Chinese fashion. In different parts of the grounds were 40 separate small palaces, in beautiful situations. The park was carefully kept—the footpaths and roads clean and in excellent order, and there were various pretty pieces of ornamental water. We found that the French had encamped near the entrance of the Great Audience Hall, and it was pitiful to see the way in which everything was being robbed.

.

The principal Palace was filled with beautiful jade-stone of great value and carved in a most elaborate manner—splendid old China jars, enamels, bronzes, and numerous handsome clocks and watches, many of which were presents given by Lord Macartney¹ and ambassadors from other countries. In a building close to the main Palace were two mountain-howitzers² which had been made at Woolwich and likewise presented

¹ Probably in the year 1793.

² They bore the date "1782," and were complete with carriages, limbers, and ammunition.

by Lord Macartney to the Emperor. They had apparently been kept as curiosities and never used. They were afterwards sent back to Woolwich. One room only in the palace was untouched. General de Montauban informed me he had reserved any valuables it might contain for equal division between the English and French. The walls of it were covered with jade-stones, and with ornaments of various descriptions.

General de Montauban told me that the only opposition the French had met with was from a small guard at the palace gates, where two of his officers had been wounded in forcing an entrance. The Emperor and all his *grandees* had taken flight only a short time previously, and had carried little or nothing away with them.

General de Montauban and I agreed that all that remained of prize property should be divided between both armies. A quantity of articles was set aside for us, and I determined to sell them for the benefit of our officers and men. The French general told me that he had found two "joës," or staves of office, made of gold and green jade-stone, one of which he would give me as a present to Queen Victoria, the other he intended for the Emperor Napoleon. In a stable

we found eleven of Fane's horses, two of Probyn's, and one belonging to the King's Dragoon Guards, all of which had been taken from the escort sent with Parkes. On returning to camp we found a letter from Prince Kung, evidently written in great fear, saying that the prisoners would be sent to us to-morrow, and that a high commissioner would meet any delegate we might be disposed to send at a house outside the main gate of the city. The letter was signed by Parkes. A verbal message was returned that Mr Wade would meet the commissioner at the appointed place. Thither Wade repaired, and was informed by Hang-ki, the head mandarin appointed for this duty, that the total number of European prisoners in Pekin was eight—viz., Parkes, Loch, a sowar, and five Frenchmen, one of whom was an officer. He promised that they should be delivered up to-morrow. The Emperor, he added, had fled with the army, and he believed that the remainder of the prisoners were with him.

The next day, the 8th October, a quantity of gold and silver was discovered in one of the temples of the Summer Palace, and a room full of the richest silks and furs. This treasure was divided in two equal portions between the French and ourselves.

At about 3 P.M., to our inexpressible satisfaction, Parkes, Loch and the five Frenchmen came into camp to the temple in which Lord Elgin and I resided. Parkes told me their sad story. On the 18th September, Loch and Brabazon, having ridden into Tang-chow, collected all the party, consisting of De Norman, Mr Bowlby ('Times' correspondent), Lieutenant Anderson, nineteen sowars, one man of the King's Dragoon Guards — Phipps by name — and Parkes himself, and started on the way back. Ere long, however, they were fired at from the Chinese lines, and on riding round a field of high maize they came across a body of infantry, who, levelling their matchlocks at them, desired them to halt. Parkes spoke a few words of remonstrance, but was told that no one could be allowed to pass without an order from Sang-ko-lin-sin, who was not far distant, and to whom he was referred. Loch and a sowar accompanied him, and thus they became separated from the rest of their party. That general, however, turned round upon him, abused him, said that all the evil of the war had been brought upon the Chinese owing to his misconduct, and ordered both him and Loch to be made prisoners. They were then made to dismount and forced to kiss the ground.

Their arms were tied tightly behind their backs, and they were taken to the rear, where their custodians began to ill-treat them, and they expected every moment to be killed. They were, however, put into a cart and driven to Peking, thrown into a common prison in company with seventy-five common malefactors, murderers and robbers, and loaded with chains, one round their necks, one round their bodies, two round their arms, and two round their legs. These were connected by a main chain to a ring in the roof so tightly, that they could not sit down. It was afterwards lengthened, which relieved them considerably. Parkes told me that they were treated with the greatest kindness by the wretched people who were in the same prison with them, who gave them a part of their miserable food. A jailer kept close to each of them day and night. In this state they were kept badly fed for nine days, when they were released from their chains and put into a prison by themselves, where they were interrogated by inquisitors as to the strength of our force, and other matters connected with us; but the two Englishmen refused to answer. At length they were taken away and placed in a very excellent joss-house, where, up to the time they,

were brought back to us, they were fed like turkeys preparatory to a Christmas feast. The poor sowar was kept chained in a separate dark dungeon. For three days no one came near him, and he had nothing to eat. At last coarse grain and some water were given him to keep up life. The endurance of these poor natives of India was wonderful, and they stand hardships which would break down a European. Three only of our prisoners had been saved, and the fate of the others was not known until the 13th October, when eight Sikhs and one Frenchman, the sole survivors, were given up to us. They were in a sad state, and their hands and wrists were ulcerated from the manner in which they had been tied up. They then gave us a shocking account of the way in which they had been treated.

When Parkes and Loch left to remonstrate with the Chinese general, a crowd of soldiers set on them, and tied their feet and hands together behind their backs as lightly as possible, afterwards pouring water on the cords to increase the tension, and they were kept in this terrible position until the condition of their hands and wrists became too horrible for description. Poor Anderson was

affected by delirium, and died after nine days of captivity. De Norman suffered still more, and lived for seventeen days. Anderson was a noble fellow, clever, amiable, and much looked up to by his brother officers. De Norman and Mr Bowlby were also great favourites. In course of time all the others died, or were put to a violent death, with the exception of those whom I have already mentioned. Private Phipps, of the King's Dragoon Guards, was especially distinguished by the fortitude with which he endured his sufferings, and with which, up to the day of his death, he strove to keep up the courage of his fellow-captives.

The following report shows the sanitary condition of the British troops serving in the north of China on 25th August 1860:—

Remained,	482
Admitted,	155

Principal Medical Officer.

Extracts from information concerning the city of
Pekin, obtained from his Excellency GENERAL
IGNATIEFF, the Russian ambassador.

“ HEADQUARTERS, PA-LE,

September 25, 1860.

“ A road runs along the parapet on the summit of the thickness of the wall. This communication, however, is broken at intervals by large towers, some of which are armed ; but many of them have only guns painted on wood. It is possible to breach this wall, but it would entail the expenditure of time and ammunition. The simpler form would perhaps be to mine and blow it down.

¹ I take this opportunity of mentioning that, for the returns and the greater number of the statistics contained in this volume, I am indebted to the kindness of Major-General F. C. A. Stephenson, who, as Colonel Stephenson, served as Deputy Adjutant-General to the British troops during the campaign of 1860.—H. KNOLLYS.

“ Outside the north-east angle of the imperial city, which is in the centre of the mandarin quarter, are living 60,000 men of the royal Tartar Guard, with all their families. It is probable that considerable street-fighting may take place here, should the allied forces assault the city.

“ All the preparations for defence have been made along the east face of the two cities ; and it is deemed very probable that an attack directed at almost any other point of the city would be unopposed. The Chinese city is the Paris of Peking. There are all the theatres, parks, merchants' houses, wealthy shops, &c. It is much cleaner than the Manching city, and the streets are broader and better paved.

“ General Ignatieff considers the north side of the city the weakest point. He says that the ground at this part outside the walls is very high. Here is the imperial parade-ground. A force in position could entirely cut off the retreat of the Emperor from the capital by the main roads running from north-east-by-east, north-north-west, and north-west-by-west gates. The Emperor is reported to have arrived in Peking two days ago.

“ H. HOPE CREALOCK,

*Lieutenant-Colonel, Military Secretary to H.B.M.'s
Special Embassy in China.”*

CHAPTER VI.

LETTERS FROM LORD HERBERT—CHINESE OFFICIAL CORRESPONDENCE RELATING TO THE WAR.

THE following correspondence has been selected from amongst the numerous letters placed in my hands, addressed by Lord Herbert to Sir Hope Grant. Irrespectively of the fact that they deal with the main points connected with the China campaign, they may perhaps possess an interest of their own, as illustrating the disposition of one who was probably the best War Minister England ever possessed.—H. KNOLLYS.

From Right Hon. SIDNEY HERBERT, Secretary of State for War, to Lieut.-General Sir HOPE GRANT.

“WAR OFFICE, *Nov.* 26, 1859.

“DEAR SIR J. HOPE GRANT,—I trust that an early mail will bring your acceptance of the appointment to the command of the expedition to

China. In that case, our relations will henceforth be of such an intimate character that I feel I may without scruple address you as I have done in this letter.

“The force under your command will consist of . . . [Here follows the detail of troops, the total of which is estimated at 10,000 men.]

“The French send 5800 infantry, four batteries of field-artillery (with a double set of guns), and some ‘*compagnies de débarquement*,’ consisting of seamen trained to land manœuvres—in all, about 8000 men. Your formal instructions will go out by the next mail ; but it is necessary to have an understanding with the French Government upon them, before they are finally despatched to you.

“The command which has been offered to you is one requiring, from the peculiar circumstances which surround it, both temper and judgment ; and I do not think the Queen could have chosen an officer more likely than yourself to discharge its duties successfully.

“There are two difficulties which beset our course—one as regards our enemy, the other as regards our ally.

“As regards the Chinese, the deplorable mishap

at the mouth of the Peiho¹ makes retaliation unavoidable, unless we could in the interim receive—which I fear is very unlikely—a disavowal of the act and some offer of reparation.

“But our quarrel is not with the people, but with the Government. At the ports where we trade our peaceful relations have remained unimpaired. Our object in going to China is to trade; and they trade with us uninterruptedly, though the central Government fires on our ships, and arrests the progress of our ambassador. It is important to maintain, if possible, this good understanding with the Chinese people at the trading ports.

“The pressure, therefore, whatever it be, should be as far as possible confined to the central Government. They can be approached by the Gulf of Pechili and the Peiho. I trust that the reduction of the forts at the mouth of the river, or if that operation, though successful, should fail to bring them to terms, an advance up the Peiho to Tien-tsin would probably enable us to dictate a peace to the Chinese emperor.

“Our object is to get our peace ratified without being obliged to have recourse to an advance on Peking itself. With the numbers which the Chinese

¹ In 1859.

Government have at their command, the advance of what, after all, is but a handful of men, into an enormous capital, is hazardous; and the operation, if successful, might possibly in the present disorganised state of the Chinese empire, end in upsetting the existing dynasty, and throwing the whole country into a state of anarchy, fatal to the interests of commerce, because destructive of all production.

“ Again, the Chinese capital is so situated that it is, first, from ice, and, secondly, from the north-east monsoon, almost unattackable till the beginning of May; and the great heats of June and July are almost as powerful for its defence. Add to this, that the Government are most anxious, whether from China or from India, to effect a greater concentration of our troops in England as soon as possible.

“ An early termination of our Chinese difficulty is therefore most desirable. Our allies probably have different views. They have no great commercial interests at stake. The goodwill of the Chinese or the stability of the Chinese empire is not important to them; but the prestige of a bulletin dated from Peking would give great satisfaction to the French people.

“Our plenipotentiary, Mr Bruce, may therefore have difficult cards to play. I need scarcely impress upon you the necessity of a most open, cordial, and conciliatory bearing towards the commanders of the French forces. Although the two Governments are on perfectly friendly terms, it is impossible to deny that there exists between the two nations a jealous and uneasy feeling.¹ A perfectly frank and unreserved course of conduct is, as in all such cases, the best and safest.

“I enclose two memoranda which will form part of the letter of instructions, which you will receive by a later mail.

“The first was one which was issued as a guide for the conduct of the general and admiral when General Ashburnham was sent to China,² and which is a copy of the memorandum drawn up by the Duke of Wellington for the guidance of Lord Gough and Sir William Parker in the previous China war. The second . . . [Here follow general instructions and information relative to rendezvous, transport of troops, tonnage, &c.]

“I will now only further add, that at this dis-

¹ This was written shortly after the attempt of Orsini to assassinate the Emperor Napoleon. The consequent excitement against England gave rise to the first formation of Volunteer corps.

² Previous to the outbreak of the Indian Mutiny in 1857.

tance it is impossible to give directions as to the operations to be undertaken. It is left to the discretion and judgment of yourself and colleagues, naval and military, French and English, all acting—which is most important—in concert with the two plenipotentiaries, upon whom the ultimate question of peace or war must rest.

“All I can undertake is that you shall be honestly and heartily supported at home.

“As regards the troops, you will have full authority to make any alterations or additions as to clothing, rations, &c., &c., which, after consultation with your medical and sanitary officer, you may deem right. The list of reinforcements to the existing garrison of Hong-Kong, and of all stores, munitions of war, &c., sent out there, have already been forwarded to you. I will write again by the next mail, which I hope will carry out your formal instructions, a duplicate of which will be sent to Singapore and Hong-Kong.

“With every wish for your success, and a firm belief that you will do all that can be done to attain it, I remain sincerely yours,

“SIDNEY HERBERT.

“P.S.—In addition to the force I have enumer-

ated, a siege-train of thirty guns, with proportionate amount of ammunition, will be despatched from this country forthwith."

"WAR OFFICE, *December 10th, 1859.*

"DEAR SIR J. HOPE GRANT,— . . . The battalions going to China are weaker than we had assumed they would be. I see by Lord Canning's letter that they numbered no more than 780 men, and those now going out will not be above 850 men. . . . The whole force will be larger than was first contemplated. Under these circumstances the Government have considered the necessity of sending out a second general officer, and have selected Sir William Mansfield to serve under you in command of the infantry division.¹ I have no doubt that you will find him in every way most useful to the public service.

"We expect by the next mail to hear from Lord Elphinstone that he has arranged for a steamer to meet the two batteries of Royal Artillery going out from here *via* Suez, with the Armstrong guns. These guns are all ready, and the batteries are to be inspected by the Duke of Cambridge on Friday. I am very anxious that

¹ See page 3.

they should be thoroughly tested on service. I have the greatest confidence in their merits; but for fear of accidents, we have sent duplicate batteries of the ordinary brass field-pieces by long sea.—Pray believe me, &c.,

“SIDNEY HERBERT.

“P.S.—I am not sure whether I mentioned in my last letter that, as a matter of course, you would have the local rank of Lieutenant-General in China.”

“WAR OFFICE, *April 9th, 1860.*

“DEAR SIR HOPE,— . . . As regards the question which you put to me, whether my statement of the risks of an advance on Peking¹ is to be taken as an order not to go there, I thought it best to consult Lord Palmerston upon it. He says, ‘I should be for leaving to the military commanders (who should, of course, consult with the diplomatists as to the diplomatic bearing of the question) full latitude of discretion as to advancing on Peking.’

“Lord Palmerston thinks that the belief that an occupation of Peking might lead to the over-

¹ Probably referring to letter of November 26, 1859.

throw of the dynasty, and by plunging everything into confusion, destroy our trade, is unfounded.¹

“It is clear, however, that we could not winter there, and we should have to leave almost immediately after our arrival.

“You, however, on the spot, will be able to judge far better than we can here of the prudence of the advance. I doubt now whether the French are much bent upon it. They have, apparently, some other designs in the way of settlement in some part of the China seas. I still cherish the hope that the Chinese Government will see the wisdom of an early concession to our demands, which certainly are not immoderate after so great an outrage as that perpetrated at the Taku Forts.²

“Lord Elgin leaves England this month for China.—Pray believe me, &c.,

“SIDNEY HERBERT.”

“LONDON, *May 10th*, 1860.

“DEAR SIR HOPE,—I am very glad to hear by your letter of the 14th March that you have

¹ Lord Palmerston's opinion was verified by subsequent events.

² In 1859.

formed good expectations of your French colleagues. Admiral Hope seems to have well studied the coast on which he has to operate, and to have a clear perception of what may be done.

“We have been surprised here at the large amount of native force despatched from India to China, making the whole forces 18,000 or 19,000 men. Our agreement with France included no more than 10,000 altogether, exclusive of the then garrison at Canton and Hong-Kong. We were of opinion that, in a country in which the climate will not permit military operations by Europeans for much more than three months, and that period intersected by a spell of intolerable hot weather, a small force, compact, but well appointed, would have been more effective. Almost the whole operation will be on the coast or up rivers. We therefore spoke of a small proportion of cavalry, and a reduced number of followers. In fact, I fear that you will find that you have not steamers enough to move rapidly so large a force. I trust you will not find difficulties as to feeding them; but we know very little of the country, or of the possibility of drawing supplies from Japan or the neighbouring localities.

“Lord Elgin will be with you before this. He is, I think, too sanguine as to the probability of the Chinese yielding to mere demonstrations. But his arrival—not having been mixed up with the Peiho affair,¹ and having successfully negotiated before—may have a good effect on the policy of the Chinese.

“We have been advised here, first, that it is difficult to send furs or skins by the long sea route without great risk of injury; secondly, that they are very difficult to get good here, where such things are little worn, and the mode of preparing them therefore not understood. But excellent sheep-skin clothing can be obtained at Bombay in great quantities at low rates, with a comparatively short voyage. But I should think that the intense cold in China itself would cause the use of garments fitted to resist it, and that a supply of some description of warm clothing could be found there.

“Sir Edward Lugard mentions that the Military Train made excellent cavalry in India² when not wanted for train purposes. You will have been aware of this, and may possibly find them again useful in the former capacity.

¹ In 1859.

² During the Indian Mutiny in 1857-58.

“We shall soon be looking for the first indications of the effect of your preparations on the Chinese Government. Though the war is not popular here, every one sympathises with the men who compose and the officer who commands the expedition.—Pray believe me, &c.,

“SIDNEY HEBERT.”

“LONDON, *June 10th*, 1860.

“DEAR SIR HOPE,—The Chinese are certainly the most extraordinary people on the face of the earth; and your excellent arrangement with regard to the peninsula of Kowloon¹ certainly would prove it had we no other evidence on the subject.

“The commissariat speak of readiness to provide supplies; but I fear that, as you get farther north, you will meet with a more patriotic but less convenient spirit on the part of the Chinese population.

“I have read with the greatest interest your account of the meeting and discussion with the French officers; and the Government entirely approves of the arrangement you have made.

¹ See p. 4.

By it you seem to have secured what is best for both. Each will act on the plan they themselves advocate.¹ There will be complete co-operation; but each army will act under the sole direction of its own general in the particular operation. There will be a common object separately attained, and no collision or jealousies on the road to it. Last, but not least, you seem to have the best plan and the least hazard.

“ We have, I hope, removed the difficulty as to pay and allowance which you have very properly brought to notice. You will get by this mail what, I hope, will prove a satisfactory answer as to the rates to be paid on Indian allowances throughout. . . . You will have received a letter from the War Office, disallowing the full increase of the coolie corps proposed. You may, however, have reason for exceeding the number fixed by the War Office, in which case I send you an authority so to do, now that you have so large a force under you, and may not have received from India the number of camp-followers, &c., you expected, as I see an account

¹ Referring to General de Montauban's intention, subsequently abandoned, of landing independently on a point south of the Peiho.—See p. 34.

of difficulties experienced in inducing them to embark. But I shall be glad to have reports of the number raised, as it is of course difficult to estimate for the forces to be employed which are not included in the combatant corps.

“We shall, I apprehend, have to raise at least an additional three millions sterling; but at this distance it is mere guess-work. I trust you will prove right in the hopes you entertain of a bloodless termination to all our preparations, and that the Chinese, who have rejected rather contumeliously the ultimatum of a distant enemy,¹ will yield to a visible force appearing off Taku; but I fear that their success last year, and their numbers this year, may encourage them to hold out. I should be very glad to have some of your battalions home in the winter; but it is too good to hope for.—Pray believe me, &c.,

“SIDNEY HERBERT.”

“WAR OFFICE, *July 21st, 1860.*”

“DEAR SIR HOPE,—I am very glad you have retained the additional force which Lord Canning proposed to stop. Once the expense has been incurred of their transport to your seas, it is well to

¹ See p. 9.

get all the good out of them which is possible, and you have exercised a sound discretion in keeping them and turning them to the best account. Clearly, by your account of the French, we shall have to do the work, and the more we have to do it with the better.

“I regret very much the loss of the Indian commissariat. I fear that our people will make blunders as to native caste prejudices, and so on, which would be serious. It is another instance of the great inconvenience of having two separate civil jealous services, in lieu of one with a common interest and object.

“We got our China vote not without the display of a good deal of dissatisfaction from all parties in the House of Commons. We have now taken on the ordinary estimates, about £1,200,000, by a vote of credit, at the commencement £850,000, and £3,300,000 now. The war was, in my opinion, after the Peiho affair, inevitable; but though the country was keen for war on the miserable lorcha affair,¹ in which we were in the wrong, it is now weary of the expense and unsatisfactory results, and ready for any

¹ Alluding to the boarding of the lorcha Arrow by Sir John Bowring in 1858.

means of escape from the difficulty. There is no fear, however, but that the good conduct of the forces engaged will meet with all the approbation and reward they deserve.—Believe me, &c.,

SIDNEY HERBERT."

"WAR OFFICE, *August 10th, 1860.*

"DEAR SIR HOPE,—I write a very hurried line before I go to the House of Commons. . . . I hope you will find the Armstrong guns better than you expected. We have now tried a great many of them, and we have found all, in point of accuracy, as near perfection as possible. They have other faults, but in this respect I should think the fault lay in the laying of the gun rather than in the gun itself. . . . —Believe me, &c.,

"SIDNEY HERBERT."

"WILTON, *October 24th, 1860.*

"DEAR SIR HOPE,—Your last mail was very tantalising; and we are in a state of anxious suspense, only knowing that your attack on the Taku Forts was about to be made. God grant the next may bring us good news. . . . One thing has made me rather anxious—namely, the

postponement of sending for warm winter clothing. . . . I trust you may winter south ; but if not, you will have a fearful climate to contend with. At Bombay a great supply of sheep-skin clothing can, I understand, be obtained. No doubt in China the same skins or furs can be got but can they be got by an enemy? However, I have no doubt you will have thought of all this.

“I earnestly trust that your operations may have a good and speedy result. Every one speaks in the highest terms of the admirable discipline of your army, of its perfect efficiency, and admirable arrangements as regards supplies. You deserve success ; but your difficulties are great, and will require all your skill and tact to surmount.—Pray believe me, &c.,
S. HERBERT.”

“WAR OFFICE, *November 10th, 1860.*”

“MY DEAR SIR HOPE,—I must add to the public despatches which go out to you by this mail my own congratulations on the brilliant success which you have achieved.¹ There is really not a drawback to it. All the departments seem to have been well up to their work—good com-

¹ The capture of the Taku Forts.

missariat—good medical staff—good health, and good discipline—things not to be attained without vigour and vigilance on the part of the commander. You have every reason to be proud of the force under you, and never was Grand Cross better won. . . .

“ I trust no rancour is left in the minds of our allies. At any rate, the joint success *should* remove any if it existed.

“ We are looking eagerly for your next despatches, which will give us the complement of your last one's, by specifying the names of those who most distinguished themselves, and bring us, I have no doubt, the account of important events as regards the prospects of peace.—Pray believe me, my dear Sir Hope, &c. &c.

“ SIDNEY HERBERT.”

“ WAR OFFICE, *November 10th, 1860.*

“ MY DEAR SIR HOPE,—

“ I am inclined to think that the Military Train has been made too military in its organisation, and too much like a combatant corps. They will not consider themselves as acting under the various departments whose transport they are to

carry on. They ought to be like a postmaster, who supplies with post-horses any one who wants them. The commissariat at Aldershot have been applying for a transport of their own, separate from the Military Train, and entirely under their own control. — is strongly for it; — against it. The latter says, justly enough, why maintain a Military Train if you are to have other people to do their work? But then the Military Train should do it themselves, and without making difficulties. I should be very much obliged if you, who have now seen the practical working of the present system in war, would tell me what your conclusions are, what the defects of the system may be, and what remedies you would apply,—whether it should continue to be a purchase corps; whether the officers should more frequently come from among the non-commissioned officers of the army, &c. &c. . . . —Pray believe me, &c.,

“S. HERBERT.”

“WAR OFFICE, *November 27th*, 1860.

“MY DEAR SIR HOPE,—I have again to congratulate you on two successful engagements.¹

¹ On 18th and 21st September.—See p. 112-116.

. . . You have not much margin in the way of time ; and as the Chinese, if they knew how to play their game, could put you into an awkward fix, we here cannot but be anxious as to the future. I am glad to hear that you do not intend wintering in Pekin or near it; so long as you have open and clear communications with the sea, you can do well. . . . So much depends on the conditions of the treaty that it is difficult to give any positive directions at this distance.

“ I expect the Duke of Cambridge in town tomorrow, when we will go over your list of officers recommended. I hear from Lord Cowley that Colonel Foley¹ has been promoted in the Legion of Honour, no communication between the Governments being necessary for the promotion of an officer who has already the lower grade of the Order ; but that they (the French Government) will communicate with us when the operations shall be over as to the decoration to be bestowed on the Commandant Reboul.² The red-tapists here were, I find, much shocked at your specially recommending him for the Bath. I did not see who else could if you did not ; but they say that

¹ English military attaché with the French force.

² French military attaché with the English force.

you should have spoken to his merits, but not specified the reward.

“Your accounts of the Armstrong guns are very satisfactory. The defects noticed in the reports of your officers had, I think, nearly all been discovered in practice here, and have been more or less remedied. The injury to the fuses, as you know, was owing to an unpardonable neglect in storing on board ship, by which they got damaged. The only defect which I think serious is the flying out of the breech-piece, because it can only be prevented by tight screwing up, and you cannot depend upon this being done in great hurry and excitement. Those we now are fitting have a better carriage, and single block trail.¹

“I won't take your judgment on the Enfield as final. At Inkerman, at close quarters, it saved the day; for its penetration was such that it killed not only the front man fired at, but two, three,

¹ It must be remembered that although a few converted rifled guns were used by the French in the Italian campaign of 1859, the breech-loading cannon on the Armstrong principle was in 1860 an entirely new and untried weapon, and was regarded with suspicion and dislike by many of our military judges. The defect in the breech-piece, which Lord Herbert points out, was remedied shortly after; the time-fuses have still much to be desired; but even in the present day the weapon is considered a most admirable one.—H. K.

and even four behind. But if at short distances men fire high, the better the weapon, the less harm they will do. The badness of Brown Bess made the ball drop so soon that a bad aim if too high was corrected. But it proves, I think, that our men want more training still to make the marksman equal to his weapon, . . .—Believe me, &c. SIDNEY HERBERT."

"WAR OFFICE, *December 10th, 1860.*

"MY DEAR SIR HOPE,— . . . On Saturday we had a telegram from Alexandria [announcing the surrender of the gates of Peking, &c. . . .] Militarily everything seems to have been a great success ; but the flight of the Emperor, and the possession even partially of Peking, constitute a great difficulty. The danger most apprehended has come to pass ; but I must say that I do not see how under the circumstances you could have avoided the advance. We have, however, now the prospect of a winter in the north, and very little prospect of a treaty at any time. A protraction of the war, with its enormous expenditure, will, I fear, meet with a doubtful reception in Parliament. Now, however, the first thing to be done is to re-establish the amount

of supplies, which I had checked in some instances and stopped in others. I have therefore brought together again a committee we had formed to discuss and decide these questions.

“ We will take every precaution in packing the Armstrong fuses so as to secure them from damage. Medical comforts, of which half supplies only have been sent lately, will be sent out in full. Warm winter clothing I hope you will have got either from Bombay or in China itself. I fear the winter is rigid ; but with the stores of Pekin under your hand, I hope there is no danger of your being short.

“ Of course you will keep a good force. In case you want more, Lord Canning has a regiment or two ready for you as a reserve. I don't send you out reinforcements, because you had probably rather be without them till the season for operations returns. You will, I assume, keep the Armstrong batteries, guns and men. . . . I write all this on the first blush of the telegram ; the despatches may modify it.

“ I can only wish you God-speed with all my heart. I have perfect confidence in your judgment, and will do my utmost for your assistance, so far as at this distance can be done. The per-

formances of the force under your command are fully appreciated here.—Believe me, &c.

“SIDNEY HERBERT.”

“WILTON, *December 25th*, 1860.

“DEAR SIR HOPE,—We heard last week . . . of the termination of the war in China. . . . The announcement has given immense satisfaction here. The prospect of a winter passed in China by the whole force, and the necessity of a renewal of the campaign next spring, was a subject of serious anxiety; and your position seemed very uncertain and precarious. But the peace seems to have been made with the same skill on the side of the diplomatists as the military operations were conducted by the commanders. I most heartily congratulate you on all you have achieved. . . . The fate of the poor prisoners has created a most painful impression here.¹ Of both Mr De Norman and Captain Brabazon I have heard a high character. The whole proceeding, from beginning to end, seems to have been of the most rascally character; and its wantonness and short-sightedness are even more astounding than its cruelty. I see by the tele-

¹ See p. 131.

gram that the Summer Palace was burnt to the ground. I suppose this had a good deal to do with the fate of the prisoners.¹

“This is Christmas-day: I wish you a happy enjoyment of it, and many still to come. I hope before long to have the pleasure of converting our paper acquaintance into a personal friendship.—Pray believe me, &c.,

“SIDNEY HERBERT.”

“WAR OFFICE, *January 10th*, 1861.

“MY DEAR SIR HOPE,—I hope by the next mail to send you the list of promotions and honours for the China campaign. We were very much puzzled how to select from the large list you sent us, the more so as the limits of the Bath have been more than reached, and there is great unwillingness to exceed or add to the numbers. As soon as the Queen's sanction is obtained they shall be despatched to China.

“The public here are, I think, very much pleased at the way in which everything has been done in China—firmness, temper, skill, success. But they are puzzled as to the future. They

¹ The prisoners had been murdered before the Summer Palace was destroyed.

doubt the stability of any treaty, and have a growing objection to wars which succeed in obtaining indemnities, but which cost far more than the indemnities recovered. I trust, however, that the severity of the lesson, the appearance of a hostile force in Peking, and the rapidity and completeness of the campaign, may produce a lasting effect. In the meanwhile, the whole thing has been so well done that, provided it does not recur, every one seems satisfied. A first-rate general, a capital staff, an excellent commissariat, and a good medical department, are four things which the English public are especially pleased to see, and the more so when all are got together.

“I hope when you are at Hong-Kong you will look carefully over Kowloon. There is a strong feeling among the Hong-Kong civilians that all the advantages of the acquisition must be reserved for them. I have urged on the Colonial Office that merchants go out to Hong-Kong or elsewhere at their own risk for their own good ; but the soldier is sent out to protect the merchant, without any option on his part, probably against his will, and certainly not for his good, and that the duty of the Government is to give them the best chance of health and comfort. . . .

Judging . . . by the tone of your letters, you are looking forward anxiously to a return home as permanent relief from tropical service. If I should be in office, of which my tenure is precarious, the earliest opportunity of employing you at home, if you wished it, would be taken advantage of.

“I see that your occupying force amounts to something about 10,000 men. Whenever a reduction takes place, the Indian troops should, if possible, be sent home first, as their employment under us is an exceptional proceeding, and is objected to by some on constitutional grounds, as not being included in our estimates, nor under our Mutiny Act,—not that the objection is worth much if put in the scale against practical convenience.

“I am about to change my appellation under circumstances which are far from agreeable. I had a very hard session last year, and got through it apparently well enough; but I have suffered from it since so much that I am forbidden to try another in the House of Commons, and I am forced therefore to take refuge in the Upper House, by the title of Lord Herbert. It has been a great blow to me; for I was fond of the

House of Commons, and had many and old friends in it, beside whom I have been fighting through various fortunes for a quarter of a century.—Pray believe me, &c.,

“SIDNEY HERBERT.”

EXTRACTS from CHINESE OFFICIAL DOCUMENTS found in Sin-ho by Mr PARKES on 12th August 1860.

MEMORIAL from HO-KWEI-TSING, Imperial Commissioner, commenting on the ultimata of England and France.

.
“Your servant would observe that, while there is no proof that statements made in the newspapers are true, it is by no means certain that they are utterly without foundation, and that it would not be right, when an increase of the English and French force is spoken of, not to be prepared against them. The report that the object of the English is Tien-tsin, and that the French desire to take possession of Chusan, tallies with what has been observed before. . . . Bruce

and Bourboulon are inseparable in wickedness, and their character is indeed sanguinary and treacherous. Still, utterly objectionable as the eight propositions of the Barbarians may be, your servant, feeling that it would not be so easy at a moment's time to dissolve the hardness of these chiefs, . . . and that, if he were to keep them quite at arm's-length, he would lose all chance of gaining the day, had resolved on receiving the commands your Majesty deigned to issue, authorising their admission into Peking to exchange treaties in the same manner as the American Barbarians to Tientsin, then to proceed in person to Shanghai, to confer with them and make the necessary arrangements."

[Ho then speaks of the sudden arrival of the allied ultimatum, "the language of which he found to be detestably extravagant and insubordinate;" and, after discussing the various concessions demanded, thus proceeds:—]

"Wei-hu and his colleague further confidently report that the war-ships of these Barbarians have indeed been despatched from their country one after another, but that they are much afraid of our military prowess at Tientsin; that the presentation of the despatch beforehand is merely

for the purpose of making it appear that the commencement of hostilities does not lie with them, the English, but with us ; and that this is another empty stratagem of Bruce's, who thereby takes such ground, that if, as he apprehended, another defeat be sustained by him, the whole of his nation will be obliged to send troops to the rescue ; at the same time, that by this means he constrains the Barbarian merchants not to do what will serve us.

“The French Barbarian, not being in fact the person who began the quarrel, is merely mixing himself up in it at the instance of the other. . . . As they [the Barbarians] have named thirty days as the time they ought to wait for the Secretary of State's reply, no smash¹ will probably take place within the thirty days. It becomes the duty of your servant, on the one hand, to request instructions from your Majesty ; and, on the other, in obedience to your commands, to direct Sien Kwan to repair before the time expires to Shanghai, and, in company with his subordinates, confidentially to instruct the Chinese merchants to get round the Barbarian merchants, with a view to devising means of holding them in a pair of

¹ *I. e.*, Nothing serious.

pincers.¹ . . . As regards the war-ships of the English Barbarians at Shanghai, up to the 3d of the 2d moon [24th February], there were in all six still in port; and since that date there have come in six more, and five have left the port. Of the latter, it has been ascertained that two have sailed northward.

“The Heart of the troops² of the French Barbarians, it is ascertained, has reached Hong-Kong, and, it is reported, will arrive at Shanghai immediately. . . . This he has the honour to submit to your Majesty for perusal, and, prostrate, he implores your Majesty’s sacred glance thereon.

“A Respectful Memorial.”

The following are the translations made from the newspaper dated the 10th of the English first moon, or the 18th of the Chinese 12th moon, which he has the honour to submit to your Majesty:—

“The reinforcements being sent out from England to China will amount to 10,000 troops, white

¹ A simile, meaning preventing any movement.

² *I.e.*, the general.

and black. The French, in addition to the 8000 men already despatched, are sending 2000, which will make a total of 10,000 men. The English and French will land 30,000 fighting men. . . . It is the purpose of England in this expedition to put forth all her strength. A great brass mortar will go to China. It has reached Sha-tun-tun,¹ and has been shipped on board the Hai-mi-lei-ya.² Thence it will go A-la-shan,³ and from A-la-shan to So-ho-sy,⁴ as at So-ho-sy there will certainly be a ship to carry this mortar to Hong-Kong.

“The French force has already all started for China.

“There is also an augmentation of the British navy; *apropos* of which there has been a discussion in England, lasting several days, upon the plan of campaign. One party says that the expedition ought not to attack China in the Tien-tsin country, as the Tien-tsin river is hard to enter, and the mud-banks extend several *li*. Peking, even when a landing has been effected, is difficult of access, as the roads are full of impediments, and the

¹ Southampton.

² Alexandria.

³ Himalaya.

⁴ Suez.

water-ways numerous. There are bridges, but these will be sure to be broken up—added to which, great danger is probably to be apprehended from the Mongol cavalry making charges in difficult ground. It were best, therefore, to take the line followed in Tang Kwang's reign, and reoccupy Nankin. No apprehension need be entertained that peace will not be made. . . . On the other hand, it is urged that this plan is not a good one—that [here follow counter-arguments]. . . . Admitting all these difficulties—the impracticability of the mud-flats, the embarrassments of the road, the destruction of the bridges, and the impetuosity of the cavalry—the foreign¹ troops are on this occasion well provided with floating batteries, wooden causeways for the mud-flats, scaling-ladders, and flying-bridges. If the cavalry charge, the foreign soldiers have also cavalry to receive them. Need any anxiety be felt that with 30,000 troops Peking shall not be reached? The foreign troops have, moreover, been looking for water in the neighbourhood of Peh-tang deep enough to enable them to land without difficulty; and, once landed, they will

¹ *I.e.*, the Allies.

take the forts in rear, destroy these, and attack Tien-tsin, after which they will advance on Peking, and the business will be over.

“It is said that the newly-appointed French chief, Man-tau-pan,¹ has reached Hong-Kong, and will arrive at Shanghai shortly.”

The following documents, so characteristic of the Chinese Government and nation, fell into the hands of the allies at the capture of the Summer Palace on the 9th of October, two days after the sack of the palace by the French army. They were translated from the original by Thomas Wade, Esq., Chinese Secretary, whose name has so frequently appeared in this volume. Some complimentary and formal phrases occurring in the originals are omitted in the translations.

MEMORIAL by SANG-KO-LIN-SIN.

“7th month, 10th day (August 26th).

“Your slave Sang-ko-lin-sin, kneeling, presents a memorial. Judging that the changeable disposition of the Barbarians will make it impossible to carry into effect the pacific policy, he, in

¹ Montauban.

the name of the princes and dukes of the six leagues, prays your Majesty to proceed on a hunting-tour, in order that measures for attacking and destroying the Barbarians may be facilitated. Your slave lately lost the position at Taku, where he commanded, in consequence of the unforeseen explosion of the powder-magazines at two of the north forts simultaneously, and not from any slackness in the defence or insufficiency of means. Therefore he apprehends that now it will be difficult to make the Barbarians submit; and yet that their demands can hardly be granted. Your slave has made the necessary dispositions along the road between Tien-tsin and Tung-chow. If fighting should take place near Tung-chow, it is to be feared that the minds of the inhabitants of Peking would be greatly agitated. Victory or defeat may depend on the circumstances of a moment. Should a reverse possibly occur, the trading people who congregate in the capital would desert in multitudes; and if perchance the heart of the soldiers should fail, the consequences might be momentous.¹

“Your slave has received the greatest favours

¹ Note by the interpreter, Mr Wade—“This means that the Emperor might be made prisoner.”

from your Majesty, and has shown no return for them. After the most anxious reflection on the present critical state of affairs, the best course which has suggested itself to him, and which he has adopted, appeared to be to write to the princes and others of the six leagues, desiring them to repair to the capital with the *élite* of their troops, so that they might receive your Majesty on your route with the proper honours, and then join the rest of the forces. He humbly begs your Majesty to follow the precedent of making a hunting-tour in the autumn, and accordingly to leave the capital for a time ; and further, that the princes and state officers left at the head of affairs may be commanded to see that the army keep the city in the most perfect state of defence until they be joined by the troops of the six leagues, when all together may attack and exterminate the enemy. If at that time your Majesty should be in the capital, not only might the execution of needful plans be impeded, but also alarm might unfortunately be excited in your own mind. Your slave does not shrink from thus, in the name of the princes and others of the leagues, expressing his and their obscure views, and which he yet urgently so-

licits your Majesty to permit to be carried into effect.

“ He would then be at liberty to choose his own time and mode of attack, and might advance or retire as events should make necessary. Without any doubt he would sweep the vile blood from off the earth, and redeem his previous shortcomings. He addresses this secret memorial to your Majesty for your decision thereupon, &c. &c.

“ He does not venture to forward this by the regular express, but, reverently sealing it, he intrusts it to Kwo-shung, to deliver it in person,” &c. &c.

Extracts from a semi-destroyed fragment of a Decree in Vermilion,¹ dated 10 P.M., 7th September, found in one of the Emperor's private apartments in the Summer Palace on the 8th October 1860, drawn up by the Emperor of China.

.....
“ As the Ministers have conceded trade [at the port of Tien-tsin], the only course will be to assent to the proposition under consideration, and so to

¹ Decrees emanating from the direct authority of the Emperor are written in vermilion-coloured pencil.

keep the Barbarians in hand for the time, and when negotiation breaks down altogether, to recall Kweiliang and his colleagues or degrade them. . . . As to their exaction of (war) expenses, . . . such a thing is utterly out of the question. From of old it has been held a disgrace to make a treaty under your city wall ; and if one is again¹ to tender gifts while one's face is ashamed, will China be still thought to have a man ?

“ If Kweiliang and his colleagues have so madly lost themselves as to presume on their own authority to concede these last two points,² they have not only disobeyed our written commands, and shown fear of the Barbarian,³ but they have simply taken up the empire and put it into his hands ; and we will at once vindicate the law by the execution of these ministers, and then fight it out with the Barbarians.

“ As to the admission of the chief Fa⁴ into the capital, peace once negotiated between the two countries, orders will of course have to be given

¹ “ Again”—viz., as in 1842 and 1858.

² Viz., the payment by the Chinese of a war indemnity, and the entry of the allied troops into Peking.

³ Mr Parkes.

⁴ Mr Parkes.

to the proper departments to make satisfactory arrangements for the supply of all requisites. What need will there then be for Fa's personal inspection? Besides, this rebellious chief, idly yelping, frantically barking, is certain to bring forward other restrictive conditions, and once he is come will not go away. . . . Is it reasonable (of the Barbarians) to exact compensation by holding a knife to the throat? . . . Lastly, as to war to the knife, it is essential that this should begin soon—that it should not be postponed. We should avail ourselves of the autumn and winter, using therein our advantage, and pressing them on their weak side. If we wait until the spring and summer of next year, these Barbarians will of course raise large bodies of black Barbarians, and will bring the force of all the world to try conclusions with us. And they will league with the long-haired rebels; and then between war with those from afar and those close at hand, we shall have trouble enough to hold our own.

“The remarks above, which exhaust our opinions, we have written with our own hand. . . .

“A special decree.”

MEMORIAL by KIA-CHING, and signed
by 25 others.

"7th month, 24th day (9th September).

"Your Ministers, Kia-ching and others, kneeling, present a memorial, plainly expressing, in obedience to the imperial command, their opinions on the present critical conjuncture.

"On this 24th day of the month (9th September), they have received a vermilion decree, together with a secret memorial by Sang-kolin-sin. . . . They reverently read that their Emperor proposed to command in person the battalions of the empire, and to proceed to Tung-chow to exterminate the vile brood of Barbarians; and in this they observe the firm resolution of the sacred son of Heaven. But they remember that . . . (here follows a lengthy allusion to some historical circumstance which occurred about the year A.D. 1000). The mist of the sea would be dissipated before the celestial wrath; but still they consider that the course proposed is not that which would best conduce to the interest of the State; and they deem that it ought not on any account to be lightly adopted.

And Sang-ko-lin-sin's proposition regarding a hunting-tour your Ministers hold to be even more objectionable. If the capital, which is encircled by an uninterrupted line of strong fortifications, is not secure, what shelter is to be looked for in open and unfenced hunting-grounds? But further, your Majesty's departure would excite the wildest agitation in the people's minds. . . . Since the Barbarians have been able to reach the port of Tien-tsin, what is to prevent them from likewise penetrating to the Loan River [at Gehol]? Your Ministers cannot endure to dwell on the ideas which these reflections awaken in their minds. . . . They propose that your Majesty should issue an edict to reassure the people, and invite them to courageous action, that high rewards should be promised to all who distinguish themselves, and that special attention should be given to placing the army in a state of perfect efficiency. . . ."

.

[Note by the translator, Mr Wade.—“I believe that Kia-ching, whose name heads this paper, became Prime Minister soon after the Emperor's flight, his predecessor having escaped.”]

MEMORIAL by AI-FIN, a Censor, and 74 others.

" 7th month, 27th day (September 12th).

" Your Minister Ai-fin, and others, respectfully submit their opinion that the capital and Court ought not to be forsaken on light grounds.

" On the 24th day of the present month, the Princes and Ministers of the Inner Council received a vermilion decree, stating that your Majesty intended proceeding for a time on a hunting-tour. Your Ministers heard of this with extreme astonishment and alarm. They would humbly remark that, although the Barbarians' vessels may have reached Tien-tsin, the circumstance has not excited much fear in the capital. The throne is that in which all things centre, and to which the eyes of all men turn. One step of the Emperor's foot shakes the earth. The project in question, then, must have arisen without due thought of the dangers which would ensue therefrom. It is impossible that your Majesty's household, and the princes and grandees who will form your escort, and whose families lie in Peking, can be well disposed to leave a place of security, even in attendance on the imperial person. Commencing their journey in haste and confusion, the

crowd of followers would be alive to everything which might excite their fears ; and if they should disperse in mid-journey, no means might be found of going back or forward. Since 1820, the year in which his late Majesty discontinued the hunting-tour [the 25th year of Kia-king, and the year in which Tao-kwang succeeded] it is said that the country has become very desolate, and that the travelling palaces have fallen into disrepair, and are unfit to live in. Nor do your Ministers know what the character of the inhabitants may now be, but they may safely say that it cannot be as loyal as that of the inhabitants of the capital city, which has been established for 200 years. Again, Gehol is at no great distance from the Shan-hai-kwan [pass near the terminus of the Great Wall] and New-chwang, and other places which are quite accessible to the Barbarians. It is also near the Russian Barbarians ; and such being the case, who can deem it secure ? Our troops now are several times more numerous than those of the Barbarians ; but if your Majesty were to leave the Court, every one would be disheartened ; a panic might break out ; the Barbarians would use the opportunity to take the city ; and we should become victims to their wiles. . . .

“ From the first establishment of our dynasty, there has been a great intermingling of natives and foreigners, and they have flourished in mutual prosperity. Of this we have had no previous example. The Barbarians of the present day are nothing comparable in ferocity to those of the time of Yung-kia [A.D. 309] or Tsung-kang [A.D. 1127]. If then, giving ear to loose gossip, and on the impulse of a moment, the empire of the world is thrown away like a weed, the duty to the spirits of the saints in the other world will have been left undone. . . .

“ A puff of breath is now sufficient to decide the balance in which hangs the loss or preservation of the succession of your ancestors and the repose of the tutelary gods. . . .

“ Your Ministers ask one more act of grace. As your Majesty's intention to travel was publicly announced, and men's minds have been so much disturbed that it would be difficult to reassure them, they beg that you will promulgate your intention to return to your palace, that false rumours may be at once extinguished, and tranquillity be restored. The national decline may be arrested, and the Government may recommence a course of success.

“Your Ministers, and the others, being by their office obliged to call attention to national points, have accordingly thus expressed their imperfect views with all humility, and they await your Majesty’s commands.”

The following are EXTRACTS from a MEMORIAL dated September 13th, in continuation of the preceding.

“For the Emperor to command the army in person is a thing which may not lightly be undertaken. In 1853, when the Cantonese rebels overran the country, advancing impetuously towards the north, the alarm occasioned in the capital was many times more serious than that manifested. Happily your Majesty appointed generals able to cope with the enemy, and the rampant outbreak was quelled. Why should not now the Barbarians, hardly 10,000 in number, be easily vanquished and expelled from the country by the many times larger army under our generals? Would not the assumption of command be a derogation from the imperial dignity, and likely to astonish all who should hear of it? . . . Again, the tranquillity of people’s minds depend upon your

Majesty's presence at the seat of government. . . . Again, your Majesty's proceeding to the northward, while the enemy was at the south, would be another circumstance producing much doubt and disturbance. . . . This troublous season is not at all to be compared with peaceful times. It would be most difficult to find men to whom the superintendence of government could be safely intrusted. The gravest evils might arise, . . . and it is fearful to think of them."

MEMORIAL by ISINEN KING, and 40 others,
dated 12th September.

[This State paper from the Emperor's Ministers reiterates with wearisome prolixity the reasons, set forth in the other documents, against his Majesty's quitting Peking for the ostensible purpose of proceeding on a hunting-tour to Gehol. The conclusion, however, illustrates very strikingly the light in which the Chinese Government regarded their invaders.]

"Granting that the whole force of the Barbarians hardly exceeds 10,000 men, and that Sangko-lin-sin commands more than 30,000, they [the Ministers] make no question that the many might

not defeat the few. But they desire to notice the fact, that the Barbarians, who have come far from across the ocean, have hitherto shown that their object was merely to trade. Their creeping into Kwang - tung, Fo - kien, Shanghai, and other places, was only to besiege the ports, and not to take possession of the country. Nor have they attempted any conquest of China. Even the point of entry into Peking is one which might be satisfactorily disposed of. . . .

“ Such are your Ministers’ obscure views.”

EXTRACTS from a MEMORIAL by ISINEN KING,
a President of the Board of Civil Office, and
signed by 26 others. Date, 13th September.

The Ministers, after attempting to dissuade the Emperor from his proposed visit to Gehol, prior to his taking the field in person, proceed : “ They admire the awe-inspiring demeanour and the well-devised strategy thus displayed. But the common people are extremely slow of comprehension—they easily suspect, and with difficulty appreciate. . . . If defence and holding out in words are to mean flight and dispersion in fact, your Ministers, without urging on your Majesty

that thus the temples of your ancestors and the altars of your tutelary gods will be abandoned, only ask, Where else could your Majesty's personal safety be better assured than at the capital? Beyond the Hoo-pe-kow pass [in the Great Wall] is the haunt of numbers of Russian Barbarians, some of whom have been for a long time pretending to deliver communications at Peking for the furtherance of some treacherous designs. . . . If commotions were to arise within [the capital], the authors of our calamities would be not the Barbarians but ourselves. . . . Your Majesty is well familiar with the maxim, that the prince is bound to sacrifice himself for his country. But far be it from your Ministers, at such a time as this, to desire to wound your Majesty's feelings by adverting to such thoughts; and, indeed, the crisis is in no degree so serious as to make it necessary. The great danger now to be avoided is that of disturbances arising from within. . . ."

EXTRACTS from a MEMORIAL by TSAI-TANG-YUNG, ex-Censor of the Hoo-kwang Provinces, dated 13th September.

This document is chiefly remarkable for the manly outspoken terms in which the writer ad-

dresses the Emperor, who in China is generally treated as a kind of divinity. After alluding to the rumours of disasters which were causing so much terror, Tsai writes: "The confusion and alarm are indescribable. But there has been nothing so strange as the report now heard, that your Majesty intended making a tour to Gehol. This has caused the utmost consternation; but your Minister does not believe in it. . . . If, indeed, the report is true, the effect produced will be like a convulsion of nature, and the mischief must be irreparable. In what light does your Majesty regard your people? in what light the shrines of your ancestors, or the altars of the tutelary gods? Will you cast away the inheritance of your ancestors like a damaged shoe? What would history say of your Majesty for a thousand generations henceforward? It has never been known that a sovereign should choose a time of danger and distress to make a hunting-tour, supposing that thereby he would prevent trouble. If the capital should be disturbed, what would there be to save Gehol alone from being disturbed? Your Majesty is besought to return without delay to your palace, in order that the people's minds may be reassured against the enemy. Let the Hwey-

tsin-wung [the Emperor's uncle] give orders for the proper distribution of the garrison of Pekin. If the enemy is met between Tung-chow and Matow we shall proceed, as originally intended, to the northward of the capital, and take up a position with a strong force. The spirit of our army leaves us no reason to fear that the handful of Barbarians, not amounting to 10,000, shall not be completely destroyed. Let this decree be read by the princes, and the other officers of state.

“From the above, it appears that your Majesty's northern tour is positively decided on. Does our Emperor, then, think nothing of his people? of the temples of his ancestors? and of the altars of the tutelary gods? . . . The grand army under Sang-ko-lin-sin is quite sufficient to conclude the war with success; and why, therefore, should your Majesty expose yourself to the fatigues and dangers of a campaign? The gravity of the crisis does not allow of much speech. Your Minister only entreats that you will consent to the advice and desires of all, and return to your Court to superintend the defensive preparations, and rejecting doubtful counsels, &c. &c. . . .

“ The capital is most strictly guarded ; the spirit of all the inhabitants is roused to the highest pitch, and even women and children are determined to fight to the last. Above all, Sang-ko-lin-sin is now at the head of several tens of thousands of Mongol troops. . . . Your Majesty might make a public confession of your own error, and thus fortify the national resolution. . . . The enrolment of volunteers in the Tien-tsin district is a step to be recommended. . . . The Barbarians do not exceed a few thousands in number, and a considerable portion of their force consists of hired traitorous Chinese. . . . If money were judiciously employed, and an appeal were made to the patriotism of the mercenaries, the whole of this body might be dispersed without recourse to arms. Your Minister cannot imagine why this has not been attempted. . . . *Post-script.*—While your Minister’s memorandum was being written, he reverently read the vermilion edict of this day, as follows :—

“ Considering that the approach of the Barbarians, and the various circumstances of the present crisis, demand from us a course of action calculated to fortify the resolution of our people, we have directed that the arrangements for our pro-

posed hunting-tour shall serve as preparation for our taking the field in person.'"

The following is either the actual draft, or the memorandum from which the draft was to be prepared, of a decree alluded to in more than one of the captured memorials. It was in the vermilion pencil, and bears no date.

"We have perused the memorial of Kweiliang and his colleagues, detailing the breaking down¹ of the Barbarian question, and our indignation is greater than we can bear. To save the people of this the territory of our capital from the pernicious effects of the poison (of war), we had in our extremity obliged ourselves to assent to a scheme of conciliation. These Barbarians have, notwithstanding, again and again, with wanton violence, insisted on various concessions, right or wrong, until there is nothing left for it but to fight them to the death. Besides, it is impossible but that our Ministers and servants, Manchu and Chinese, who have for generations received of the bounty of (our family), should feel the enmity we feel, and share our hatred—should unite to do justice to their long accumulating wrath.

¹ Or in original, "Grand smash."

“ We shall now move straight to Tung-chow at the head of our army, there to take the vengeance heaven requires—to do an act of punishment and subjugation, the effect of which shall be widely felt.

“ We command the princes who have the *entrée*, the high officers of the guard, the members of the Great Council, and high officers of the household, to enter upon the consideration (of this question) with all speed.

“ We have also perused the confidential memorial of Sang-ko-lin-sin, for the discussion of which as well, let the Ministers *not* having the *entrée*, who have this day memorialised us on the same question, meet in conference.

“ A special command.”

CHAPTER VII.

BRITISH TROOPS DIRECTED TO GIVE UP "LOOT" FROM SUMMER PALACE—THEIR READY COMPLIANCE—AUCTION TO INSURE AN EQUAL DIVISION—SUBSEQUENT CONFIRMATION OF THE STEP BY THE HOME GOVERNMENT—HAN-KI'S SEARCH FOR THE GOVERNOR OF THE SUMMER PALACE—ESTABLISHMENT OF BATTERIES TO BREACH PEKIN WALLS—INHABITANTS WARNED OF APPROACHING CONFLICT—PRINCE KUNG'S COMPLAINT OF THE LOOTING OF THE PALACE—HE PROMISES THAT OUR TERMS SHALL BE AGREED TO—THE PRISONERS GIVEN UP—DETAIL OF THE BATTERIES—EXTRAORDINARY STRENGTH OF THE WALLS—FUNERALS OF THE MURDERED PRISONERS—BURNING OF THE SUMMER PALACE—RUMOURS OF TREACHERY, AND PROBYN'S CONSEQUENT RECONNAISSANCE—ENTRY OF SIR HOPE GRANT, LORD ELGIN, AND BRITISH TROOPS INTO PEKIN—THE SIGNING OF THE TREATY—PRINCE KUNG'S TERROR OF THE PHOTOGRAPHIC APPARATUS—PREPARATIONS FOR DEPARTURE—THE TOWN OF PEKIN—THE TROOPS BEGIN THEIR RETURN MARCH TO TIEN-TSIN AND TAKU—REMARKS BY THE EDITOR ON THE MARCH TO, AND DESTRUCTION OF, THE SUMMER PALACE—RESULTS ATTAINED BY THE WAR.

A GREAT change of temperature now took place, and on the 9th October the rain fell, and a cold north-east wind set in like the blasts of Edinburgh

in March. I went to Sir Robert Napier's quarters, and in the course of conversation he told me that his aide-de-camp had brought away from the Summer Palace a large piece of gold, which he had found lying on the ground, and which at first had been taken for brass. Sir Robert asked whether I had any objection to his giving it to the men of his division. I did not, however, think that, in justice to the other division, I could accede to this request; and I therefore decided to issue an order directing the officers to give up any valuables they might have obtained from the Summer Palace for the purpose of putting them into a general stock, which would afterwards be divided equally. These directions were accordingly promulgated; and I was greatly pleased to find that a quantity of articles of value were given up by a number of gentlemen who, when they found the French making such havoc among the treasures, had thought there could be no harm in appropriating a few things to themselves. I felt very proud of their liberal and honourable behaviour; and I therefore resolved to take a great responsibility upon myself, and at once to divide the spoil amongst the officers and men of the British force at that moment at Peking. It was sold by auction,

and, together with what had been handed over to us by the French, realised a good round sum. Colonel Walker, Major Wilmot,¹ and Captain Anson were appointed prize agents. Their task was a difficult and an arduous one, but they performed it with great ability. Wilmot took sole charge of the accounts, and kept them with admirable regularity. I declined to take my own share of the proceeds of the sale; and the two generals of division, Sir John Michel and Sir Robert Napier, in the handsomest way waived their claims. Strictly speaking, I had of course no right to take this step; but considering the lenient laws of France on the subject, and the strict way in which I had as much as possible prevented the men from plundering, I thought I was justified in thus acting. I wrote to Mr Sidney Herbert,² Secretary of State for War, informing him of my intention, which I hoped, I said, would be approved of. In course of time I received an answer from Lord John Russell, saying that "I had taken a grave responsibility upon myself;" but her Majesty had, under the circum-

¹ Now Major Sir Henry Wilmot, V.C., member for South Derbyshire.

² See despatch at end of chapter.

stances stated by me, approved of what I had done. [The sum realised by the sale amounted to about £8000, which with £18,000 in specie, handed over to us by the French, was divided into three shares. One share was reserved for distribution among the officers at a more convenient date, and the other two were on the spot divided among the men, so that by the 16th October every private soldier with the army before Peking received about £4; and thus for the first time, perhaps, British troops rejoiced in the speedy apportionment of the spoils of war. Probably the general considerations by which Sir Hope Grant was actuated, are best made apparent by the following extract from a despatch written by him at the commencement of the campaign, in defence of a subordinate who was supposed to have exceeded his powers: “. . . must be aware that officers of her Majesty's army and navy are called upon to take on themselves certain responsibilities, and that an illegal act done to avert a great public evil is not only justifiable, but praiseworthy.”—H. K.]

Numbers of beautiful ornaments were now put up for sale; and the officers, knowing they were to get their prize-money, at once bid freely, and the

articles sold for great prices. A small, yellow, Chinese tea-cup realised £22. I bought several beautiful jade-stones, and also a necklace of the finest green jade, with rubies, which, by a label attached to it, we ascertained had been presented to the Emperor by a famous Tartar chief. Nobody seemed to take a fancy to the ornament, and I paid for it only fifty dollars. I also bought a fine carving of lapis lazuli. The prize committee secured a beautiful gold jug, from which the Emperor of China used to pour rose-water upon his delicate hands, and this they presented to me in a very handsome manner. There were two beautiful large enamel vases which had been given up by Major Probyn, and they were so handsome that I requested him and the prize committee to allow me to send them to the Queen, to which they readily agreed.

On the 10th October, the Commissioner Hangki begged to be allowed to visit the Summer Palace in company with Parkes. I consented, and gave him an escort. Parkes told me it was most distressing to see the poor man. He seated himself upon the edge of one of the little lakes, put his head between his hands, and burst into tears, saying that everything was lost, and that he should

destroy himself. His principal object in coming, however, was to discover the body of the governor of the palace, who was a great friend of his, and who was supposed to have drowned himself. The body was afterwards found in one of the lakes, and Hang-ki returned to Peking.

This day, 10th October, General de Montauban and I, with the approval of Lord Elgin and Baron Gros, sent a letter to Prince Kung, informing him that unless he chose to give us up one of the gates of the Tartar town, we should batter down an entrance for ourselves. We gave him until twelve o'clock mid-day on the 13th to consider our proposal, and if it were not then agreed to our guns would open fire. The French general and I then started off to the An-ting Gate to reconnoitre. White flags were hoisted in every direction, and Tartar soldiers lined the parapets; but they took no notice of us, and I rode so close up to the walls that I was able to let my horse drink out of the ditch. Within 200 yards of the town was the "Temple of the Earth," a set of hand-^{made} some buildings surrounded with high massive ^{Chinese} walls; and opposite this point the water in the ditch was scarcely a foot deep. I fixed on this spot for my breaching batteries, and I ordered

the heavy guns which had been brought up from the depot to be taken within the temple, and covering earthworks to be thrown up. The French established their batteries a little higher up, and within 60 yards of the wall. They had only field-artillery, brass rifled guns, throwing a 24-pounder shot; and their commanding officer of artillery, Colonel de Bentzman, told me he much doubted their power to effect a breach, but that they would serve to distract the attention of the enemy. On 12th October, a proclamation was published for the benefit of the inhabitants of Peking, warning them that if peace were not made by mid-day on the morrow, the attack against the place would begin, in which case they were recommended to quit the town, as we could not answer for the consequences. The merchants realised the peril of their situation, and went in a body to Prince Kung, whom they urged to give up the gate. Poor Kung, in an agony of distress, replied that it might cost him his life to comply with their request; but that, nevertheless, if they would support him, and declare their earnest desire that our demands should be agreed to, he would yield. Parkes accordingly went to meet Hang-ki by appointment, and was informed by him that the

Chinese agreed to our terms, and that the An-ting Gate would be given up on the following day, on the understanding that if the treaty were signed and the prisoners returned to us, the town should be uninjured, and our soldiers should not enter it in greater numbers than might be required as an escort for the ambassadors. To all this we agreed, and then Hang-ki delivered up nine of the still missing prisoners—viz., eight Sikhs and one Frenchman.¹ Late in the evening of the 12th, a letter arrived from Prince Kung for Lord Elgin, wherein he bitterly complained of the state to which the Summer Palace had been reduced—the more unjustifiable, he said, because peace had been concluded. This was false, because it was as yet by no means even certain that the terms would be agreed to.

The 13th October was the great day on which the question of peace or a continuation of the war was to be decided, and all was made ready to recommence hostilities should the gate not be given up. At 10 A.M., Parkes set off for another interview with Hang-ki. The guns were placed in

¹ In all probability the current report of the rebel army being only 100 miles north of Peking, and about to march on the capital, powerfully influenced Hang-ki in coming to terms with us at any price.

position ready for breaching the wall—viz., four 8-inch guns for battering, two Armstrong guns to play also upon the breach, two to fire down the road, and two in reserve. The 9-pounder battery, about 400 yards to the right of the heavy guns, was destined to keep down the fire from the walls. The mortars, in the south-west angle of the Temple of the Earth, would supplement the fire on the breach; and a ledge in the temple wall served as a banquettes for our infantry.

However, by noon¹ on the 13th October, the An-ting Gate was given up, and Sir Robert Napier marched in with 300 of the 67th Regiment, and with 100 of the 8th Punjaub Infantry. Our force took possession of a portion of the wall, extending from the right of the gate; and the French occupied that to the left. We, both of us, posted a battery so as to command the approaches. The gate itself was a fine massive structure, with a three-storied guard-house on the top of it. The wall round the town, which, as far as I could ascertain, extended over a circumference of sixteen miles, was indeed a wonderful sight. Ancient history tells us the walls of Babylon were so broad that several chariots could be

¹ At a few minutes only before twelve o'clock.

driven abreast on the top of them ; but I really think those of Pekin must have exceeded them. They were upwards of 50 feet in breadth, very nearly the same in height, in excellent repair, and paved on the top, where, I am sure, five coaches-and-four could with a little management have been driven abreast. Lieut.-Colonel Thomas,¹ 67th Regiment, was placed in command of our troops at this gate ; and the position was further strengthened by Sir R. Napier, by a traverse, with a couple of guns.

On the 14th October, two more sowars, the only remaining survivors of our prisoners, were sent in. They reported the deaths of Mr Bowlby, Private Phipps of the King's Dragoon Guards, and two sowars. The bodies of eight of the victims—six English and two French—were brought in in coffins, which contained little but mere bones. By the clothes, however, we were able to identify the remains as those of Lieutenant Anderson, Messrs De Norman and Bowlby, and two sowars. General Ignatieff very kindly expressed his hope that the bodies of our countrymen might be buried in the Russian cemetery at

¹ Now Colonel Thomas, C.B., commanding a Brigade Depot, Winchester.

Pekin, and asked to be allowed to attend the ceremony. We were, of course, very grateful for the offer; and on the 17th October the funeral took place. General de Montauban and his staff were present. The Russian ambassador was, owing to indisposition, unable to attend, but was represented by his suite. Lord Elgin and I were the chief mourners; and a procession, consisting of a troop of the King's Dragoon Guards, a troop of Fane's Horse, and one officer with 25 men from each English regiment, followed in the *cortège*. The band was furnished by the 60th Rifles.

I shall never forget the bitter cold of that day—the hills were white with snow, and a north-east wind blew with the cold piercing blast of winter. We marched down to the cemetery, which was situated just outside the walls of Peking; the coffins were laid in one large grave; the burial-service was read without any pomp or display; and we then left the bodies of our poor countrymen in their last sad resting-place.

General de Montauban was not prepared for such a simple ceremony, and expressed his surprise when it was concluded. It was certainly a contrast to the funeral of the French soldiers, which took place on the 28th October. Of course

I attended with many of my officers ; and I also sent a squadron of the King's Dragoon Guards. General Ignatieff, his staff, and that of the British embassy, accompanied the procession ; but Lord Elgin, owing to a severe attack of influenza, was confined to his house. We passed under the walls of the city—which by this time was in our possession—and through the suburbs, to the old French Jesuit cemetery, a handsome enclosure, wherein was dug one large deep grave, with a ramp down which the coffins were conveyed, thus sparing the awkwardness and annoyance of lowering by ropes, and laid side by side. Then the ceremony was begun by an old French abbé,¹ who had been so long at Peking that he had almost forgotten his own language. Sundry other priests, attended by Chinese boys, assisted—all in full canonicals. One of them came forward and made an oration on the merits of the deceased ; this was followed by reading the service, accompanied by continual tinklings of bells. Then General de Montauban put an instrument into my hands, which contained the holy water, and with which I was requested to sprinkle the coffins. This went rather against the grain ; but

¹ The Abbé de Luc.

as I perceived Sir Robert Napier—an excellent man—occupied with the same business, I no longer hesitated. Next Colonel de Bentzman read a funeral oration; and General de Montauban made an excellent speech, winding up by saying, “Adieu, mes amis, adieu!” Now came the most singular part of the whole ceremony. Every French soldier present marched past the tomb singly, firing his rifle against the coffins, which in a short time were covered with exploded cartridge-papers. This concluded the funeral.

In consequence of the murder of the greater number of our captured countrymen, and the barbarities committed on all, Lord Elgin and I thought it was necessary that the Tartar Emperor should be visited with some severe punishment and signal mark of retribution, and we therefore decided to burn his splendid Summer Palace to the ground. General de Montauban objected to this destruction, and would not co-operate with us.

By this time the prisoners had been delivered up into our hands, or had been otherwise accounted for, and therefore their fate could not be affected by any retaliatory measures I might adopt.

[Sir Hope Grant's reasons for thus acting are explained in detail in the following despatch:—

“HEADQUARTERS, PEKIN,
18th October 1860.

“SIR,—With reference to your Excellency’s letter of yesterday’s date, No. 123, I have the honour to state that my reasons for wishing to destroy the palace of Yuan-min-yuan are—first, because it was in that place that the prisoners were treated with such barbarity, being bound hand and foot together for three days, with nothing to eat or drink ; and, secondly, because the English nation will not be satisfied unless more lasting marks of our sense of the barbarous manner in which they have violated the laws of nations be inflicted on the Chinese Government.

“If we were to now make peace, sign the treaty and retire, the Chinese Government would see that our countrymen can be seized and murdered with impunity. It is necessary to undeceive them on this point.

“The Summer Palace of the Emperor has certainly been plundered, but the damage inflicted upon it could be repaired in a month. The very day the French army left Yuan-min-yuan, the palace was again taken possession of by the Chinese authorities, and five Chinamen caught plundering there were executed by them. My

patrols have since found the place locked up, and the houses not destroyed.

“It has been well ascertained that the palace of Yuan-min-yuan is considered as a most important place. The destruction of it is a blow aimed entirely at the Chinese Government, by whom, and not by the people, have these atrocities been committed; and it is a blow that will be felt most severely by the Chinese Government, whilst on the score of humanity there can be no objection urged against it.

“I beg further to add that Lord Elgin holds the same opinions as I do on this subject.—I have, &c.

(Signed) “J. HOPE GRANT, Lt.-Gen.
Commander of the Forces.”

“To His Excellency Lieut.-Gen. de Montauban,
Commanding H.I.M.'s Forces, China.”

A despatch to the same effect was written by Sir Hope Grant to the Secretary of State for War, London.—H. K.]

On 18th October, Sir John Michel's division, with the greater part of the cavalry brigade, were marched to the place, and set the whole pile of buildings on fire. It was a magnificent sight.

I could not but grieve at the destruction of so much ancient grandeur, and felt that it was an uncivilised proceeding ; but I believed it to be necessary as a future warning to the Chinese against the murder of European envoys, and the violation of the laws of nations.

We had written to Prince Kung stating our intention to burn the palace, and demanding an indemnity of 300,000 taels,¹ which would be given to the families of the murdered prisoners. The French demanded 200,000² taels for a similar purpose. The money was at once paid, and the signature of the treaty fixed for the 23d October.³

[The following is the letter written by Prince Kung in reply to Sir Hope Grant :—

“The Prince of Kung, Imperial Commissioner, makes a communication in reply.

“The Prince is in receipt of H.E. the British Commander-in-Chief’s communication of the 4th

¹ £100,000.

² £66,666.

³ On 22d October. This was in addition to the sum demanded for the expenses of the war, amounting to 8,000,000 taels = £2,666,666. It was further guaranteed on the part of the English that out of this sum, 2,000,000 (£666,666) should be given to the British Canton merchants for losses sustained by them. The whole of this money was paid in.—H. K.

day of the 9th moon (19th October), stating that 21 British officers had been sent back, but that five other persons taken at the same time were still unaccounted for ; and requesting an explicit reply from the Prince upon this point.

“ The Prince, as soon as he took charge of affairs, behaved to the eight British officers in the capital with all proper attention, and sent them back. He had not, when he took charge, any knowledge of the others, nor was it until after some days of continued inquiry that he ascertained by degrees that they had all been sent to such and such places. On this he gave orders that they should all be handsomely treated, and he has now sent back from one place or another, living and dead, 29 persons, which number, it appears to him, corresponds with that given in the despatch he has received from H.E. the British Minister, Elgin. He has also promised the British Minister, Elgin, that the sum of 300,000 taels H.E. has applied for as compensation money shall be paid.

“ A necessary reply addressed to H.E. General Grant, commanding H.B.M. land forces.

“ KIEN-TUNG, 10th year, 9th moon, 6th day.
(19th October 1860.”)]

On the 22d October, a report was brought to me through the French Roman Catholic missionary, Monsieur Mahé, that treachery was intended on our entering the town. He stated he had heard from many Chinese converts on whom he could rely, that infernal machines were placed in different houses by which we should have to pass, and that the guns on the walls were turned against the building in which the treaty was to be signed. He added that a large force of the enemy was encamped on the west side of the city. As I thought there might be some truth in all these rumours, I sent Major Probyn, with the two Irregular Cavalry regiments, to reconnoitre in the direction alluded to. The force suddenly came upon an intrenched camp, where further progress was stopped by infantry lining a bank, and who with levelled matchlocks threatened to open fire. As Probyn had obtained all the information that was necessary, and as nothing was to be gained by bringing on a collision, he very wisely retired. This decided me to make every preparation for emergencies, and on the morning of the 24th October, to which date the signature of the English treaty had been unavoidably postponed, I directed Sir Robert Napier to march in, and with

the 2d division to occupy the main street leading to the "Hall of Ceremonies," a task which he performed with great accuracy and judgment. I also posted a field-battery at the An-ting Gate, ready for action at a moment's notice. Lord Elgin started in the afternoon, accompanied by myself and staff, 400 infantry, 100 cavalry, and two bands playing at the head of the procession. I rode alongside our ambassador, who was conveyed in a richly-ornamented sedan-chair, to the hall, a distance of three miles. The main street was broad and handsome, but the roadway was atrocious. The centre was raised high and much broken, and was flanked by two minor tracks, almost impassable from holes and pools of water. There was a vast concourse of spectators, men, women, and children, but none of them showed the slightest animosity against us. It took us about an hour to reach the Hall of Ceremonies, where the treaty was to be signed, and which was quite separate from the Tartar portion of the town. We entered the gates of the hall, marched through gardens, up the paved way, and on approaching the grand entrance were met by Prince Kung and about 500 mandarins, some of whom were princely looking fellows, dressed in silk robes of state. The

Prince came up and closed his hands in front of his face, according to the Chinese salute; but Lord Elgin returned him a proud contemptuous look, and merely bowed slightly, which must have made the blood run cold in poor Kung's veins. He was a delicate gentlemanlike-looking man, evidently overpowered with fear. We were placed in chairs of state, in the most honourable position, the left-hand side, and the convention was laid before the Imperial Commissioner, who on this occasion was invested with full powers. After talking over several points, he signed it and ratified the former treaty. Hang-ki, the other commissioner, was evidently a clever and clear-headed person, old in appearance, pale, delicate, and very thoroughbred-looking.

In the midst of the ceremony, the indefatigable Signor Beato, who was very anxious to take a good photograph of "the Signing of the Treaty," brought forward his apparatus, placed it at the entrance door, and directed the large lens of the camera full against the breast of the unhappy Prince Kung. The royal brother looked up in a state of terror, pale as death, and with his eyes turned first to Lord Elgin and then to me, expecting every moment to have his head blown off by the infernal machine

opposite him—which really looked like a sort of mortar, ready to disgorge its terrible contents into his devoted body. It was explained to him that no such evil design was intended, and his anxious pale face brightened up when he was told that his portrait was being taken. The treaty was signed, and the whole business went off satisfactorily, except as regards Signor Beato's picture, which was an utter failure, owing to want of proper light. Refreshments were offered to us, which Lord Elgin declined, and, after a proper amount of bowing, we took our departure. The following day the French treaty was also signed. The war was now at an end, and the good tidings were conveyed home by my aide-de-camp, Anson.

The weather became bitterly cold, some of the hills being covered with snow ; and as—according to the information which General Ignatieff, with his usual extreme kindness, furnished me—the Peiho would soon become frozen up, and as it would be unsafe to linger at Peking, I was anxious to return as soon as possible to Tien-tsin, there to make preparations for embarking our troops. In the first instance, therefore, I settled to start on our return journey on the 1st November ; but Lord Elgin was very desirous that we should

remain eight or ten days longer—by which time, it was hoped, an edict would have arrived from the Emperor at Gehol, on the north side of the great wall of Tartary, and 130 miles from Peking, to which he had retreated. Without this edict the proclamation of peace could not be published; and Lord Elgin was very anxious that the terms should be made known to the Chinese at Peking before his departure. I therefore agreed to postpone our march until the 7th and 8th November. The French General, however, would not wait, and started on the 1st November, leaving a battalion of 450 men as a guard for Baron Gros, who had taken up his residence in the town.

As a general rule, our soldiers were not allowed to enter Peking, but commanding officers were empowered to give passes to non-commissioned officers and very steady men. Thus order was maintained, and the inhabitants soon gained confidence. In this, as in all Chinese cities, there was a street occupied by curiosity-shops, and it was amusing to see the way these houses were beset with English and French purchasers; and the sums they paid away must have been very great. There were quaint articles of antiquity in

carved rock, jade-stones, enamels, porcelain, and bronzes.

On the 2d November, the edict arrived from the Emperor, giving full powers to publish the treaty. The printing of it was a tedious and troublesome affair; but Parkes and Wade set to work Chinese carvers, who cut it out on wooden blocks, and it was ready for circulation on the 7th. Sir Robert Napier's division had already started; and on that day, Bruce, Lord Elgin's successor, arrived at Peking, and on the 8th he was formally installed as ambassador. On the 9th, I marched away from the place with the remaining (Sir John Michel's) division—as did likewise Baron Gros with his escort. Both forces moved off without any attempt to annoy us on the part of the people, who indeed seemed rather sorry than otherwise at our departure. At the end of the third day's march, I hastened on to Tientsin, the place of embarkation, and on the arrival of the infantry, I instantly sent them off.¹ It was fortunate that I thus acted, as, shortly after their departure, the frost set in with such intensity, that in three days the river was frozen over, and navi-

¹ To England, India, and some few regiments to the garrisons in China.

gation rendered impossible. The cavalry waited to the last, as I intended to march them down from Tien-tsin to Taku, 34 miles distant, in two days, where they were to embark. A severe snowstorm, accompanied with frost, came on, with symptoms of the water communication being closed, and I became very anxious to hurry them down as soon as possible. I therefore gave orders that the whole distance should be accomplished in one day's march—somewhat to Brigadier Pattle's dismay, who was apprehensive for the wellbeing of his horses. I was confident the journey would not hurt them; and on the 23d November, the two regiments—King's Dragoon Guards and Probyn's Horse¹—marched independently, each commanding officer taking his own time and making his own arrangements. Every man and horse reached their destination the same evening, although the roads were certainly in a fearful state; and in two days after they were all safely on board ship.² The Taku Forts, Tien-tsin, Shanghai, Hong-Kong, and Canton, were, for the present, occupied by strong

¹ Fane's Horse, with some other troops, remained at Tien-tsin for the winter.

² A similar feat was performed by Stirling's Battery (B 14) *minus* their guns.

English garrisons; but the greater part of our army was now embarked, and on the way either to India or England.

Remarks on the French march to Yuan-min-yuan, and on the pillage and destruction of the Palace. Results attained by the war. By the Editor.

So far, perhaps, as English officers are concerned, they would have been willing that the subject of the march to, and the looting and the destruction of, the Summer Palace, should be allowed to sink into oblivion. From time to time, however, it has been persistently brought before the public, our silence has been misinterpreted, and a mistaken colouring has been given to facts. In March 1874, especially, the discussion was revived, when the claims put forward on behalf of the estate of the late Emperor Napoleon, including that of the Empress Eugénie, to the Chinese collection, were referred to the committee appointed at Paris for an investigation. It would now be almost an affectation of silence to write any narrative, however incomplete, of the China war without bringing forward the topic.

Sir Hope has in his Journal treated it with the utmost tenderness ; but I trust that, in my capacity of Editor, and with a view of refuting unjust aspersions, it may be allowable for me to enter at greater length on the points at issue. There surely cannot be the smallest doubt that the march of the French on the Summer Palace took us completely by surprise. It is certain that, about 9 A.M. on the 6th October, Sir Hope Grant and General de Montauban agreed that their joint forces should make Yuan-min-yuan their objective point, whither Sang-ko-lin-sin's army had, it was reported, retreated ; it is certain that, at the same time, the British cavalry was pushed well forward to the right front, with instructions to endeavour to cut off the enemy's retreat on the palace road : but it is equally certain that, when this plan of operations was concerted, the English General did not for an instant anticipate that his coadjutor would accomplish alone that which they had settled should be carried out hand in hand. When the armies, after a halt for breakfast, resumed their march at 10.30, the French, according to the arrangements for precedence for that day, were on our left, next to Peking. Between them and the road leading to the Summer

Palace was the entire British force, and Sir Hope assumed, as a matter of course, that this relative position would be maintained. During the march the French dropped a little behind, crossed our rear, and then made straight for Yuan-min-Yuan.¹ No intimation had been given by them that they contemplated any such change of direction; and the English, utterly unacquainted with this movement, continued their march in search of the enemy, and halted late in the afternoon, not far from the north-west gate of the city of Peking. There they expected to find the French in position on their left, and we fully anticipated an attack from the Tartars. But their allies had disappeared.²

The presence of our cavalry with the French might at first sight lead to the inference that the latter assumed Sir Hope Grant to be aware of the fresh route taken, and to have tacitly agreed to the change of programme. Such a chain of reasoning is rendered entirely untenable by the following statement.³

¹ Letter to 'Times,' March 13, 1874, from "One who was there."

² Letter to 'Times,' March 18, 1874, from "An Eyewitness." See also Sir Hope Grant's Journal, p. 126, and compare with plan.

³ Letter to 'Times,' dated March 14, 1874, signed "Robert K. Douglas."

Brigadier Pattle was ordered to march to some convenient place on the broad northern road leading to the Teh-shun, or second gate, on the north face of Peking, as it was thought that in all probability the Tartars would retreat along this road whenever the design should be put into execution of attacking their encampment outside the city with British and French infantry from the east. The cavalry brigade, on reaching their destination, found, to their surprise, that the French had arrived before them. General de Montauban expressed his determination to march on to the Summer Palace; and as Brigadier Pattle had been ordered to endeavour to keep up a communication with the French on his left, it is to be presumed he thought that, under the altered circumstances, he could not do wrong by now feeling into them on his right; and he therefore followed them in their march. "On arriving at the Summer Palace, the French Commander-in-Chief persuaded the Brigadier to move on with the English cavalry to more open ground, while the French encamped just outside the palace, and French guards were put over the entrances to the palace instead of joint French and

English guards, as might easily have been done."¹

It is only fair to say that Major-General, then Colonel, St George Foley, Commissioner at the French headquarters during the Anglo-French war with China, asserts that General de Montauban merely acted up to the arrangement agreed upon before marching to the Summer Palace;² but the evidence to the contrary seems to be conclusive, which, if necessary, may be still further confirmed by the following extract from Lord Elgin's 'Letters and Journals,' p. 361: "Strange to say, our cavalry, which went off far to the right in the morning, has not been heard of yet, and we cannot discover what has become of the French. . . . *Sunday, October 7th.*—We hear this morning that the French and our cavalry have captured the Summer Palace of the Emperor."

Let us now turn to Count Palikao's evidence before the committee.³ The bulk of the army, he says, including the whole of the English, was at Peking protecting the baggage and keeping in awe the three cities—the Tartar, the Imperial, and

¹ "One who was there," 'Times,' March 13, 1874. See also Narrative of the China War, p. 220.

² 'Times,' March 14, 1874.

³ 'Times,' March 10, 1874.

the Chinese—when he set out with a detachment for the Summer Palace. He surely cannot dispute the fact that even the enceinte of the fortifications was not crossed until seven days later. Again, he declares that the palace itself was never sacked. “When we had driven away the Tartars¹ who took refuge at the extremity of the enclosure, I had sentries posted, and directed two officers, with two companies of marine infantry, to protect the palace from depredation, and to allow nothing to be removed until the arrival of the English commanders, to whom I immediately sent. Thus there could be no pillage.” “Nothing,” the General distinctly asserted, “had been touched in the palace when the English arrived.” Evidence to the contrary, however, exists in overwhelming abundance. Major-General Foley says:² “I cannot agree that the palace was not sacked. It is true that General de Montauban gave orders that nothing should be touched until the arrival of Sir Hope Grant; but I saw a woful difference in the appearance

¹ About twenty badly-armed slaves made some pretence at resistance, but were quickly disposed of.—See Narrative of the China War, p. 224.

² ‘Times,’ March 14, 1874.

of the wondrously magnificent collections which met the eye upon the first entrance into the palace, at 6 A.M. on the 7th October, of General de Montauban, his staff, and myself, and that which presented itself upon our return to the palace after breakfast about 11.30 A.M. Sir Hope Grant arrived about 1 P.M. . . . On the afternoon of the 8th, an orderly officer informed General de Montauban, with whom I was riding, that the Imperial treasury had been discovered. Upon arriving at the spot we found the French had been in possession some time, and had secured the most precious articles. General de Montauban immediately acceded to my request that the place might be cleared of people, and a guard put over the entrance, until I had communicated with Sir Hope Grant. Sir Hope Grant, with as little delay as possible, sent Major (now Colonel) Anson and 40 sowars to assist me in securing our share in what remained; and I do not think that either Anson or myself will ever forget the rough night we had of it."

All the above is fully confirmed by "An Eye-Witness" and "One who was there." The former writes: "Those who were present when the English Ambassador and the French General met,

will long remember . . . the impressive assertion that nothing in the palace had been removed or injured. But they will remember also the evidence of their own senses. They saw that tents occupied by French officers of all ranks were full of plunder," &c. "One who was there" states: "At the palace I found looting going on everywhere. Officers of the French army of all ranks, French non-commissioned officers and men, were looting systematically." Lastly, the following is an extract from the note-book of an officer on the English Headquarter Staff: "October 7th.—The General and Lord Elgin rode over to the palace. The French were looting it from end to end. . . . October 8th.—The looting in the palace [is being carried on] to a frightful extent to-day. Many of the things put aside for the Queen had been looted by the French."

As regards the burning of the palace, we have never at any time hesitated to assume the responsibility of the deed, but not from the motives attributed by General de Montauban, who now justifies an act in which at the time he refused to participate. The General states: "We hoped, therefore, that this vigorous demonstration would have a good result. Unfortunately, our hopes

were not realised soon enough to save some unfortunate European envoys from frightful tortures; still more, the correspondent of the 'Times' was put to death; and it was when the bloody fragments of his body were found that the English resolved to burn the palace in revenge for the murder of their countryman. I perfectly remember that I then made some observations to Lord Elgin, who replied in a form of discreet confidence, 'What would the "Times" say of me if I did not avenge its correspondent?'" It is indeed difficult to believe that our high-minded diplomatist was prompted to so severe an act of retribution, merely through an apprehension that otherwise he might lack the support of one of the organs, however influential, of public opinion. General de Montauban's argument that the measure was a preventive one, is demolished by the fact that the outrage on our envoys had been perpetrated, and their bodies delivered into our hands on the 16th October, two days before the palace was destroyed.

It has been stated that, on the 17th October, the plenipotentiaries threatened that if our demands were not accepted by the 20th, the allies would burn the Imperial Palace inside Peking to

the ground. I have the best authority for stating that, though the expediency of the measure was discussed, such a threat was never actually held out to the Chinese.

Sir Garnet Wolseley well sums up all that is to be said on the subject as follows:¹ "The destruction of the palaces appears to have struck the Peking authorities with awe. It was the stamp which gave an unmistakable reality to our work of vengeance, proving that Lord Elgin's last letter was no idle threat, and warning them of what they might expect in the capital itself unless they accepted our proffered terms. The Imperial Palace within the city still remained untouched; and if they wished to save that last remaining place for their master, it behoved them to lose no time. I feel convinced that the burning of Yuan-min-yuan considerably hastened the final settlement of affairs and strengthened our ambassador's position. Our allies, who had looted all, and destroyed some of the buildings of that place, objected to our putting the *coup de grace* to their work. It was averred that the complete destruction of the palaces would be a Goth-like act of barbarism. It seems strange that this

¹ Narrative of the China War, p. 729.

idea did not occur to the generally quick perceptions of our Gallic allies before they had shorn the place of all its beauty and ornament, by the removal or reckless destruction of everything that was valuable within its precincts, leaving us, indeed, little more than the bare shell of the buildings on which to wreak our vengeance for the cruelties practised therein upon our ill-fated countrymen."

It is scarcely too much to say that the China War of 1860 may be considered the most successful and the best carried out of England's "little wars," if, indeed, the latter term be not a misnomer. No mistake occurred to mar the outline of the whole, and in the short space of three months the Chinese received three defeats in the open—their strong forts of Taku, on which they based their powers of resistance, were captured—and their capital itself was forced to succumb under the guns of the invaders. The expense involved was great; but, unlike the majority of wars, the consequent return was adequate. We obtained freedom of action for our merchants throughout the whole of the empire; we procured for the civilised world protection from the oppression and barbarous outrages which the

nation had been previously wont to inflict upon strangers; we struck a salutary blow at the pride of China, which, as experience shows, has been successful in convincing her that she is no match for the peoples of Europe; and, above all, we exacted from them the Treaty of Pekin,¹ which has proved far more lasting than any former engagements with that nation.

Had we, on the other hand, refrained from war, we could not have maintained our position at the several ports where we traded; neither property nor life would have been worth a moment's purchase; the laws of nations would have been habitually set at defiance; and the time would have arrived when we should have been compelled to quit the country altogether—conciliatory measures and efforts to obtain our just demands by negotiation having been interpreted by the Chinese as signs of weakness. When at last, in alliance with the French, we had recourse to arms, the advantages obtained for the civilised world were scarcely less important than those insured for our own individual interests.—
H. KNOLLYS.

¹ See Appendix V., p. 260.

Despatch explaining the immediate sale of English treasure captured in the Summer Palace.

“HEADQUARTERS, PEKIN,
October 21, 1860.”

“SIR,—This palace¹ was full of valuable works of art, chiefly of Chinese manufacture; and although an attempt was made to effect a division of the property between the two nations, yet it became virtually a state of indiscriminate plunder. Being unwilling to expose the English army to the demoralising influence of such a state of affairs, I kept them confined to their bivouac in front of Peking, and appointed officers to collect as far as possible what belonged to the English. The whole of the property thus collected by officers was sold at public auction by my orders, realising about £8000. In addition to this, specie to the amount of about £18,000 was discovered in the palace, and the whole amount being comparatively small, I considered it would only be a just and proper thing to divide this money on the spot amongst the army. My principal reason for this was because our men saw all the French soldiers laden with dollars

¹ The Summer Palace.

and sycee silver, and knowing that the palace had been given up to plunder, might naturally feel dissatisfied at not being allowed to participate; whereas, if they saw everything fairly divided, they would have no reason to complain. Moreover, without the prospect of such a division, it would have been difficult to have prevented any but the best men from going to the palace without leave, to plunder for themselves. I have therefore caused the money to be divided in the following manner—viz., one-third between the officers, and two-thirds between the non-commissioned officers and men; the major-generals and myself resigning all claims to share in the prize. The distribution has been restricted to those actually present with the force before Peking.—I have the honour, &c.

“ J. HOPE GRANT, Lt.-Gen.,
Commander of the Forces.”

“ The Right Hon. the SECRETARY of STATE for WAR.”

CHAPTER VIII.

JOURNAL OF A VISIT TO JAPAN.

SIR HOPE GRANT SAILS FOR JAPAN—ARRIVES AT YOKOHAMA—PROCEEDS TO YEDO—ARREST OF THE JEW—DESCRIPTION OF MR ALCOCK'S RESIDENCE—THE FEUDAL POWER—THE DAIMIOS AND THE GOVERNMENT—MURDER OF THE TYCOON—THE ROYAL CONJUROR—PROSPERITY OF JAPAN—VISIT TO THE JAPANESE MINISTERS—DWELLINGS OF THE DAIMIOS—SYSTEM OF UNIVERSAL ESPIONAGE—JAPANESE DEFENCES—THEIR KNOWLEDGE OF WAR—RETURN VOYAGE TO HONG-KONG—THE GRANADA NEARLY FOUNDERS—SHIPWRECKED MALAYS—LEAVE TO RETURN TO ENGLAND—INTERVIEW WITH NAPOLEON—FUNERAL OF THE EMPEROR.

ON the 29th November I started for Shanghai, where I arrived on the 4th December, and where I and my staff were most hospitably received by Mr Webb, of Dent's House. I then sailed on a pleasure trip to Japan, where, owing to Mr Webb's kind arrangements, I spent three weeks very pleasantly, pending the arrival of orders from England relative to my own destination.

On 12th December 1860, my staff I and embarked on board the Granada for Japan. On the 17th, we entered the harbour of Kanagava, where the view was surpassingly beautiful, with the adjacent undulating ground covered with rich crops, and with a lovely background of the snow-topped peaks of Fusi-yama. The next day we landed at Yokohama, three miles distant from Kanagava, and the only place in Japan where foreign merchants are allowed to reside. The little town was neat, clean, and well built, with numerous shops containing the beautiful lacquer-ware for which the country is so celebrated. We forthwith forwarded a letter of introduction, with which we had been provided, to Mr Alcock,¹ Envoy Extraordinary and Minister Plenipotentiary at Yedo, the principal city in Japan, who received us with the greatest cordiality and kindness. He obtained permission for us to visit the town, and kindly offered to put us up at his house. Our journey extended over a distance of about sixteen miles, and we accomplished it with great comfort by means of some excellent ponies lent to us by Captain Vyse, and

¹ Now Sir Rutherford Alcock, K.C.B. Resigned his position in Japan, July 1871.

by a "noriman," a species of silk-cushioned palanquin, carried by eight bearers, divided into two reliefs of four. The whole road from Kanagawa was intensely interesting and beautiful; the villages and detached houses were neat and clean; and there was a general appearance of prosperity and comfort very unusual in these Eastern lands. The route, which was excellent, led us along the sea-shore; different sorts of wild fowl flocked around us in every direction like barn-door fowls, sometimes lighting so close that it would have been easy to have killed them with a stone. Cranes, storks, and snipe were equally numerous. The latter, indeed, were perfectly tame, for no one in the neighbourhood of Yedo is allowed to molest them. We were met on our journey by the Dutch¹ Vice-Consul, who took us to a roadside tea-garden, where we were supplied with tea by some really pretty and pleasing-looking girls. As we approached the town, Mr Alcock, accompanied by some of the Legation, rode out to receive us.

While we were at Yedo, a melancholy occur-

¹ Until a short time previous to 1854, the Chinese and the Dutch were the only foreigners admitted, for trading purposes, within Japanese territory. The exports by the Dutch were limited to two ships' cargoes annually.

rence took place. An English Jew went out shooting, and killed a wild goose, whereupon some policemen came up, demanded his name, and secured the coolie who was carrying the bird. This was resented by the Jew, who cocked his gun, and, presenting it at one of the party, threatened to fire if they advanced any further. The gun unhappily went off, either by accident or with intention, shattered the man's arm, and otherwise wounded him severely. The offender was taken off to prison, but was eventually handed over to the Consul; and after he had paid a fine of 1000 dollars, was deported. Had the victim died, the consequent troubles would have been serious and complicated, for the Japanese are a revengeful race, and act on the principle of blood for blood.

Mr Alcock's house had been converted from a handsome temple into a very comfortable dwelling. It was beautifully situated, with a well-mown lawn behind, about which were dotted shrubs and dwarf trees, leading down to a pretty little piece of water with fantastic bridges. Still further to the rear was a bold hill covered with fine evergreen oaks; and on the side of the acclivity was an old cemetery, laid out with much

taste, and ornamented with handsomely-carved ancient tombstones, and some splendid old trees. I must confess that the cold of the house was biting, for we were in the middle of winter, and the windows as well as the partitions of the rooms were formed of thin paper.

The dress of the Japanese and the Chinese is very similar. Both perpetually carry about with them umbrellas, and both are hard-working and intelligent; but in other respects they totally differ from one another. The Chinese are stolid and sedate; the Japanese, who are a race of Malays, are cheerful and lively. They are, moreover, of a curious, prying disposition; and the system of espionage carried on throughout all orders of society renders intercourse with them extremely troublesome and dangerous. Their head ruler goes by the name of the Tycoon, and all temporal authority is vested in him, with a Ministry under him. He resides in Yedo. Their Emperor, who is called the Micado, is their spiritual governor. He lives at Miako, and, as I understood, is kept secluded from human sight.¹ A strong feudal power exists among the Princes

¹ This government is now altogether changed. The Daimios have voluntarily relinquished their feudal rights, the office of

and the Daimios, or Barons, which in many instances is so great that the Government frequently have hard work to maintain their own authority. Several of these chiefs possess as many as 30,000 armed retainers, ready to do their bidding at a moment's notice. The Daimios entertain a great hatred towards all foreigners, and especially towards the English—and with good reason. They are aware that we have taken possession of the whole of India ; and they have seen China, one of the largest empires in the world, completely broken up by us.¹ The Japanese Government rather encouraged the admission of foreigners into the country, as a counterpoise to the much-feared influence of the Daimios. It was, however, dangerous even for ambassadors to reside in Yedo, where Europeans were constantly murdered. A short time before our arrival, three Russians and a Frenchman had been assassinated, and the crime was imputed to the Daimios.

About the year 1853, when the English first Tycoon has been abolished, and the Emperor of Japan is now virtually as well as nominally head of both "Church and State."
—H. K.

¹ It must be remembered that this was written immediately after we had imposed a humiliating peace on the Chinese.

began to make their appearance in the island, the Tycoon was poisoned by Prince Mito, a powerful noble. The criminal was first banished to his own territory by order of the Government, then sentenced to perpetual exile from the capital, and finally deposed from his principality, his son being allowed to succeed him ; all this rankled in the Prince's mind, and he determined to murder the Regent, whose name was Ikomonono-Kami, and whose office he had hoped to obtain, the new Tycoon being a minor. The Regent's residence, a princely mansion, was situated within the outer wall of the fortress, and about 500 yards from the palace. One stormy day, when the snow and sleet were being drifted about in every direction, he was attacked by a party of about eighteen armed men as he was proceeding in his noriman from his house to the palace. When Daimios go out of doors, however short may be the distance they intend to perform, they always proceed in state, with two standard-bearers, several umbrella-bearers, and numerous retainers, some of whom, according to their singular ideas of dignity, carry a quantity of boxes, supposed to be filled with wearing apparel. In the present instance, the retainers were all armed, many of them with two

swords each ; but in consequence of the cold they were wrapped up in large waterproof cloaks, made of a kind of oiled brown paper, which, with their enormous clumsy hats, rendered the wearers sufficiently helpless. The assassins suddenly attacked the *cortège*, cut down some of the bearers and retainers, and were proceeding to drag the unfortunate Regent out of his noriman, when his guard drew their swords, and a general *mêlée* ensued. Several were disabled on both sides ; and it is stated that the wounded murderers instantly performed the Hara-kiri, or Happy Despatch, which consists in committing suicide by disembowelling themselves, and with which, by the laws of the country, no one is allowed to interfere even to further the ends of justice. During the scuffle a man was seen running away, holding up a decapitated human head by the hair. The retainers supposed it to be that of the Regent, and in order to gain possession of it pursued the fugitive. Meanwhile the assassins availed themselves of the opportunity to behead the real Regent, and to effect their escape. The feudal retainers, eight of whom were still alive, were discovered, and put to the torture. They confessed that Prince Mito had ordered them to commit the crime. After

which they were executed, or allowed to perform the Hara-kiri; and Mito was, by directions of the Government, poisoned. Such were the results of a feudal power, and the absence of an untrammelled Government. Each Daimio's retainers consider it to be their duty to carry out their chief's behest, even though death or torture is certain to be the consequence.

Shortly after our arrival the royal conjuror gave a performance before us. He was a dignified-looking old gentleman, with a deep sonorous voice, extremely refined in his manners, and dressed like a high-bred Japanese. His tricks, which were sleight of hand, were nothing remarkable, with two exceptions. Having rolled up a small piece of paper, he shook it gently upon a fan, and gradually it assumed the shape of a small beautifully-formed egg. It was then put into an empty box, and transformed into a live barn-door fowl. Again, he formed a scrap of paper into the shape of a butterfly, which he set in motion by waving a fan; at a short distance it appeared to fly about exactly like a live insect. After a while he treated a second piece of paper in the same way, and by means of two fans kept both butterflies flying about together, one of them

occasionally lighting upon some convenient resting-place. I never in any country saw a more graceful or charming trick.

The next day Mr Alcock took us to see the pretty tea-gardens at Oh-gee, ten miles distant. The villagers appeared civil and respectful ; and here, again, there were evidences of prosperity and comfort universally apparent which I never expected to meet with in an Eastern land. The gardens were really very pretty, with a picturesque rivulet, neat walks, flowers, and a carefully-kept lawn. We were provided with an excellent breakfast, though one elaborate dish consisted of a large raw fish, and we were waited on by some very pretty modest-looking damsels, whose attractions consisted in dark eyes, a profusion of jet black hair, beautiful complexions, and the freshness of youth. The poor married ladies, however, excited our sincere pity. When subjected to the misfortune of marriage, they are obliged to shave their eyebrows and stain their fine teeth with some horrible ugly black composition, which takes away charms they might otherwise possess. Mr Alcock kindly wrote to inform the Japanese Minister for Foreign Affairs that I wished to pay my respects to the Ministers, and they fixed the

15th December for my visit. Ladies were not allowed to be present. On that day, therefore, I set out with Mr Alcock and his staff on Japanese ponies, and proceeded through the gate of the outer wall, within which were built all the Daimios' houses, each in turn surrounded by a second large wall, with handsome gateways, and the family arms emblazoned over them. The pathways were beautifully kept with streams of pure water flowing along the sides. Within were two other substantial enclosures, one of which contained the Tycoon's palace, and the other that of the Ministers. Each enclosure was encircled with a large moat of transparent water, literally covered with wild ducks, and with stone battlements and banks of beautiful turf. Splendid cedars threw out their wide-spreading branches from the edge of the water to the foot of the wall. We were ushered into a well-built, scrupulously clean palace, carpeted with the finest mats, but otherwise unfurnished. The Japanese nobility pride themselves on being without luxuries, and on dressing themselves in the plainest silks. The males of all classes sit upon their heels, considering chairs and tables effeminate and derogatory to the dignity of a man. In an inner room, however,

these conveniences had been provided for us ; and on this occasion the two chief Japanese Ministers also occupied seats opposite to us, either out of respect, or because they thought that to stand while we were seated would be inconsistent with their rank. The other dignitaries sat on their heels. The appearance of a Japanese is not unlike that of a bantam-cock : small, compact, strutting little fellows, they shave the tops of their heads, leaving a tuft of stiff hair sticking out in the centre of the forehead, which strongly resembles the top-knot of a cock. The nobility are dressed in quiet-coloured silk jackets, with tight pantaloons. On this occasion they were without slippers, and each man wore two swords projecting at right angles behind, just like a cock's tail. Altogether they were the most quaint laughable little fellows imaginable. The Japanese, I understand, have now taken to wear European clothes. We were placed opposite them on the other side of the room, and all our conversation was carried on by means of an interpreter seated on his heels between us. Whenever he translated a sentence to the Ministers, he first bowed to the ground and kissed the dust at their feet. A small table was placed before each of us, on which were

arranged preserved fruits, cakes, pipes and tobacco. After a short stay, and sundry little complimentary speeches, we got up, bowed, and took our departure. I have seen no country, apart from our own, where the inhabitants appear so comfortable and well cared for, and no town so clean and in such good order as Yedo. They seem to delight in cleanliness, and the public baths are numerous and much frequented. The city is twenty-five miles in circumference, and is supposed to contain about two million inhabitants. The houses are built of wood, except the foundations of those belonging to the Daimios, and are seldom even one story high. Very destructive typhoons and earthquakes are of constant occurrence; and a short time ago nearly the whole of Yedo was in consequence shaken to the ground.

As I have before mentioned, the official houses of the Daimios are situated inside the large outer moat which surrounded the palace, and here a certain number of them are obliged to reside for six months in the year. The Government make it a rule that no Daimio shall call upon another that by so doing he lowers his dignity and pronounces himself of an inferior rank. By these means their power becomes limited, combinations

are prevented, and every one is jealous of his neighbour. The system of official espionage also checks their mixing with one another, as each fears his neighbour may be a spy, who will report against him he knows not what. During our stay at Yedo a constant watch was kept upon our conduct, and we were never allowed to go out without being attended by two or three Jakomins — mounted officials, each wearing two swords. Nominally they acted as our guards, but their real object was to watch our doings. One day, however, Biddulph and I slipped out quietly, unobserved, and took a walk along the sea-side. Suddenly the retainer of some Daimio, armed with two swords, galloped up furiously behind us and would have ridden us down had we not slipped aside. After casting at us looks of undisguised defiance, he rode on, and our Jakomins, who by this time had discovered that we had eluded them, came up and resumed guard over us.

On the 27th December we left Yedo for Kana-gava, and on the 28th again put to sea. The harbours of both towns are indifferent, and without sufficient water for vessels of large size. Opposite Yedo are four forts, which extend across

the bay, and are apparently heavily armed; but we were not allowed to enter any of them. There are numerous other similar forts along the sea-coast. When I was on shore I examined one of their works as closely as could be managed, and I found that though strong in front, it could not resist an attack in rear. The nation seems to have made considerable progress in the art of war, though a portion of their army is still armed with bows and arrows. On the occasion of our visit to the Ministers, I inspected the arms of the guard at one of the gates of the fortress. They were armed with Japanese-made percussion light muskets; but on trying the locks many of them would scarcely go off. The guard were seated in a line on their heels in front of the guard-room, and some distance from their muskets. They appeared perfectly immovable, otherwise than that they paid the strictest attention to our movements.

We made our return voyage through the inland sea, and on our way passed the towns of Oyaca and Miako, the chief city in the country. The adjacent country was mountainous, thickly wooded, and inhabited. The numerous fishing-junks, with their large, singularly-shaped, dark-

brown sails, had a very picturesque effect. On the 4th January we arrived at Nagasaki, the third largest town in Japan, situated at the head of a long narrow bay. At the entrance is the small sugar-loaf-shaped island of Pappenberg, from the top of which, 200 years ago, Christians were cast down a perpendicular height of about 100 feet.

On each side of the bay are numerous batteries, the total armament of which amounts to 800 guns. Nagasaki cannot be compared with Yedo in appearance or in cleanliness, and is not nearly so large—not above one-tenth the size. There is a pretty cemetery on a hillside behind the town, not unlike the Paris Père la Chaise. The dead are buried in a sitting position, with the knees tied together. Our next destination was the mouth of the Woosung river, where we had a narrow escape. We were here enveloped in a thick fog, and cast anchor in five fathoms of water; but after a time it began to blow very heavily, and when the tide had fallen we suddenly bumped with great violence against the bottom. We immediately began to weigh anchor, but this operation required some time, and meanwhile we were subjected to five distinct and violent shocks.

We were in imminent danger of foundering, and were only safe when we got up our anchor and steamed into deep water. In this unpleasant vicinity we remained for three days, when the fog lifted, and we made our way to Shanghai. The *Granada's* time was now up, and we were obliged to leave her. We had been most kindly taken care of by her commander, Captain Hazlewood, an excellent sailor, and a good honest Englishman. We embarked on board the *Formosa* for Hong-Kong, where we arrived on the 29th January. On our way we picked up the long-boat and crew of a ship called the *Elizabeth*, which had foundered ten days ago when 300 miles from Hong-Kong. The boat was in tow of a junk which had come across them the same day as ourselves. There was on board a Scotchman, twelve Malays, and some Chinamen. One of the latter died, and the rest of the crew were at death's-door owing to hunger and thirst.

Towards the end of January 1861, I went to inspect our newly-acquired promontory of Kowloon—which, by the new treaty, had been handed formally over to us—and to settle on the measures for putting it in a state of defence. The Hong-Kong merchants wanted to obtain possession of

all the best ground for their own purposes; but of course I insisted on the most advantageous positions being reserved as sites for the projected new barracks.

I received a letter from the Duke of Cambridge desiring me to send back to India as many of the native regiments as could be spared; but, under the circumstances, I could only dispense with the Loodianah Regiment and the 21st Madras Native Infantry—which were despatched to their respective Presidencies. The 60th Rifles were also ordered to England, and Fane's Regiment to the Punjaub.

I was offered the appointment of Commander-in-Chief at Madras, which I gratefully accepted; and His Royal Highness very kindly allowed me to take a run home for six months, which was a great boon. I remember that, some time afterwards, on my return to England, I was introduced to Sir Charles Wood, the Secretary of State for India, at a dinner given by the Duke. His speech to me was: "I am happy to make your acquaintance, but sorry to find you here." I opened my eyes, and thought I had not heard him properly; but he added, "Did you not receive my letter in China?" I replied that I had not.

Dinner was at this moment announced ; but he afterwards took me aside and explained that he had written, desiring me to take up my command at once at Madras, where my presence was much needed to assist in carrying out the scheme for amalgamating the Queen's and East India Company's armies. By some fortunate "mischance" I had never received the letter. What an untimely bit of paper it would have been! I had been for three hot seasons in succession under canvas on active service during the Indian Mutiny, followed by a campaign in China, and I absolutely required a little setting up in my own country before encountering the sultry atmosphere of Madras.¹ I was now made a G.C.B., which is the highest military order in Great Britain, and the Emperor of the French nominated me a "Grand Officer of the Legion of Honour."

It gave me great delight to hear that Admiral Hope had been made a K.C.B., as a finer, more honourable man, or a greater ornament to his profession, does not exist.

Sir John Michel now arrived at Hong-Kong :

¹ The illness of which Sir Hope Grant died—March 7, 1875—originated from his long and trying service in India and China.—H. K., March 15th.

I handed over to him the command of the troops ; and on the 16th March I embarked on board the Pekin for dear old England. On the 24th April I arrived in Paris ; and there I had the honour of being presented by our ambassador, Lord Cowley,¹ to the Emperor Napoleon. We were ushered into a room, where the great autocrat of the world was sitting at a large table covered with papers, in which he seemed profoundly immersed. He rose at our entrance, and with a manner totally unlike that of a Frenchman, came up to me, and shook hands very cordially. After addressing to me some complimentary remarks, he began speaking about the China campaign, and said he thought it would have been desirable for the allies to have put down the rebellion which was devastating the empire ere they left the country. We had a long conversation on this and similar subjects, and he then rose, and we took our departure. There was a stolid sober look about his countenance, and he appeared to weigh every sentence before he spoke.

[In some subsequent pages of Sir Hope Grant's Journal, I find the following account of the next

¹ Now Earl Cowley, K.G. ; G.C.B.

occasion when he was brought into personal communication with members of the Bonaparte family.—H. K.]

The Emperor Napoleon died at Chiselhurst on the 9th January 1873; and considering that I had taken part with his troops during the China war, and that he had given me the Star and Order of the Legion of Honour, I felt that it would be a proper mark of respect which I owed to him to attend his funeral. It took place on the 15th January; and at 9.30 A.M. on that day, accompanied by my aide-de-camp, Barton,¹ I showed my card at Camden House, where the Imperial family resided, and was at once admitted. I was presented by Lord Sydney, the representative of her Majesty, to the Duc de Cambacérés, the late Emperor's chamberlain. At eleven o'clock the coffin was brought out, and placed in a hearse drawn by eight horses, and on the top of the carriage were laid several beautiful wreaths of camellias and violets. The young Prince Imperial, as chief mourner, followed in rear, together with some of the ladies of the Imperial Court, general officers, and other gentlemen. Amongst them was my old ally, De Montauban, now Count Palikao, and Marshal

¹ Captain, Coldstream Guards.

Canrobert, with his left arm in a sling. Marshal MacMahon was not present. I was standing speaking to Sir Linton Simmons,¹ the Governor of the Royal Military Academy at Woolwich, who had brought with him a number of Woolwich cadets, friends of the Prince Imperial, who was studying at the institution, when a well-dressed man came up and asked for the names of the young gentlemen who were to take part in the procession. He then inquired of me in what capacity I was present, and when I told him my name, he took off his hat and said, "I am proud to have the honour of seeing you. I was formerly your brother's, Mr Grant's,² whipper-in when he kept the hounds in Perthshire:" for the last seventeen years he had been stud-groom to the late Emperor Napoleon. I then recognised him as Mr Gamble, a person of great importance at Chalons when I there attended the French manœuvres professionally. I inquired whether I could obtain admission into the chapel; and he replied that probably this would be very difficult, as there were a large number of followers who would have the first right of entry; at the same

¹ Lieut.-General Sir Linton Simmons, K.C.B.

² Died 1873.

time he begged me to accept his card of admission, of which I gladly availed myself. We followed in the procession to the Roman Catholic chapel, about half a mile distant, and the number of people who had assembled to witness the ceremony was marvellous. The greatest respect and solemnity were manifested throughout. On arriving at the chapel the coffin was taken out of the hearse and covered with a purple-velvet pall, on which were embroidered the imperial crown and numerous bees; it was then carried into the chapel and surrounded by priests. Next began the ceremonies of the Roman Catholic Church, the reading of prayers in Latin, the continual putting the mitre on the head of Monsignor Goddart, the principal priest, and taking it off again, the procession of priests round the coffin, sprinkling it with what is called holy water, and enveloping it in a mist of incense, as though to waft the spirit of the dead into Paradise. After these ceremonies the coffin was borne into a small adjacent vault with grated doors. Every Roman Catholic present then sprinkled holy water upon it. On leaving the chapel, the Duc de Cambacérès requested me to be present at a levee which the Prince Imperial was about to hold at Camden House. There I

was presented by De Montauban to the young Prince and to his cousin Prince Napoleon. The former was much liked by the Woolwich cadets. He afterwards went out to receive a deputation of French peasants and artisans, who had come over to attend the funeral. They appeared carrying the tricolor on the branch of a tree ; and one of them made an oration, which was followed by vociferous cries of "Vive Napoleon IV.!" "Vive l'Empereur!" "Vive l'Angleterre!" Shortly afterwards the crowd dispersed.

APPENDIX.

I.

SHANGHAI, *22d March 1860.*

SIR,—I have the honour to inform you, that with the view of guarding against any delay which might take place in the negotiations with the Chinese Government, in the event of my being compelled from any cause to quit China, the Queen has been graciously pleased to grant to you (or the commander of her Majesty's land forces in China for the time being), and to Rear-Admiral James Hope (or the senior officer in command of her Majesty's squadron for the time being), a full power, authorising you to negotiate, either jointly or separately, with the Ministers of the Emperor of China.

This full power has been transmitted to me, and I have caused it to be placed in the archives of her Majesty's Legation, where it will remain until the contingency in which it is intended to be exercised shall have arisen.—I have the honour, &c.

FREDERICK W. A. BRUCE.

Lieutenant-General Sir J. HOPE GRANT, K.C.B.

II.

Extracts from a Despatch from Sir HOPE GRANT to the SECRETARY of STATE for WAR, reporting the Capture of the Peiho Forts. (See Chap. IV.)

HEADQUARTERS, TANG-KU, . . .
24th August 1860.

SIR,—I have the honour to report, that after the capture of Tang-ku on the 14th inst., I commenced bringing up siege-guns and ammunition from Peh-tang, with a view to the reduction of the uppermost fort on the left bank of the Peiho, distant about two miles from Tang-ku. The ground upon which it was necessary to advance was mostly of a very difficult nature, and intersected with broad and deep canals, used in the manufacture of salt.

I placed Major-General Sir R. Napier in charge of the advance, his division being quartered in Tang-ku. Under his superintendence, bridges were thrown over the ditches by Lieutenant-Colonel Mann, commanding Royal Engineers; and heavy guns,¹ with a good supply of ammunition, having been brought into Tang-ku, the 67th Regiment and one Armstrong battery were pushed forward on the evening of the 19th to within 2000 yards, to cover the working parties making roads, bridges, &c.

¹ Two 32-pounders, two 8-inch howitzers, three 8-inch mortars.

On the 20th, the road was made practicable to within 800 yards of the fort, batteries were traced, and the heavy guns were brought out, ready to place in position by daybreak on the following day.

The Chinese opened fire during the day, and were replied to by Captain Milward's Armstrong guns at 2000 yards range with good effect, and the firing gradually ceased. During the night batteries were constructed for the heavy guns and mortars, and for one field-battery; also for two 8-inch guns, which were brought up with great exertions from Peh-tang during the night; and the whole were placed in position by daybreak on the 21st August.

It had been arranged with the Admiral that the gun-boats should cross the bar that morning, and should engage the outer north fort and the flank of the outer south fort at the same time that the attack on the inner north fort was commenced by the land forces.

At 5 A.M., however, the Chinese opened fire upon the troops from all their forts within range, and we were thus forced to reply an hour earlier than had been intended. The artillery was disposed as follows:—

The storming party of infantry consisted of a wing of the 44th, under Lieutenant-Colonel M'Mahon, and a wing of the 67th, under Lieutenant-Colonel Thomas, supported by the other wings of those two regiments and the Royal Marines, under Lieutenant-Colonel Gascoyne. A detachment of Royal Marines, under

Lieutenant-Colonel Travers, carried a pontoon-bridge for crossing the wet ditches ; and Major Graham, R.E., conducted the attack. The whole were commanded by Brigadier Reeves.

The fire of the artillery was most effective ; the guns of the fort (of which many were of very large calibre) were speedily silenced ; and at about 7 A.M. the magazine blew up with a terrific explosion. A few minutes later the magazine in the outer north fort was also exploded by a shell from the gunboats. The field-guns were all advanced to within 500 yards of the fort, and redoubled their efforts, and a breach was commenced near the gate. The fire of the fort having almost entirely ceased, a portion of the storming party was advanced to within 30 yards, to open a musketry-fire, the French infantry being on the right, the English on the left. The fire of our artillery being thus partially compelled to slacken, the enemy emerged from their cover, and opened a heavy fire of musketry on our troops. The French immediately pushed on to the salient next the river, crossed the wet ditch in the most gallant manner, and established themselves on the berm, from whence they endeavoured to escalate the walls. This, however, they were unable to effect, from the vigorous resistance of the Chinese. The efforts of the sappers to lay down the pontoon-bridge were unavailing, no less than 15 of the men carrying it being knocked over in one instant, and one of the pontoons destroyed.

At this juncture Sir R. Napier caused the two howitzers of Captain Govan's battery to be brought up

to within 50 yards of the gate, in order more speedily to create a breach ; and a space sufficient to admit one man had just been made, when our storming party, now joined by the wing of the 67th, under Colonel Knox, which had partly crossed by the French bridge and partly swam over, forced their way in by single file in the most gallant manner, Lieutenant Rogers, 44th, and Lieutenant Burslem, 67th, being the first to enter, when they assisted the regimental colours of the 67th Regiment, carried by Ensign Chaplin, who first planted them on the breach, assisted by Private Lane, 67th Regiment, and then carried them to the cavalier, which he was the first to mount. At the same moment the French effected their entrance, and the garrison was driven back, step by step, and hurled, pell-mell, through the embrasures on the opposite side.

Here the same obstacles which had impeded our advance obstructed their retreat ; in addition to two wet ditches and two belts of pointed bamboo stakes, there was swampy ground, and a third ditch and bank.

The storming parties opened a destructive fire on them from the cavalier, and this was enhanced by the canister of Captain Govan's guns, which had been moved to the left of the fort for this purpose. The ground outside the fort was literally strewn with the enemy's dead and wounded. Three of the Chinese were impaled on the stakes. A few fugitives reached the outer north fort, which opened fire to cover their retreat, and was answered by the Armstrong guns with good effect. About an hour after this, the whole of the

forts hauled down their war-banners, and hoisted flags
of truce.

I have, &c.,

J. HOPE GRANT, Lieut.-General,
Commander of the Forces.

III.

From HON. F. BRUCE, British Minister, China,
to Sir HOPE GRANT.

SHANGHAI, *May 10, 1860.*

MY DEAR GRANT,—

Montauban has deferred his departure [for Shantung] till he hears from you. With the immediate arrival of the ambassadors, I am not sorry at this. He is not prepared to attack the forts, therefore no time is lost; and if the expedition advances on Shantung after the ambassadors reach China, the Emperor will be disabused of the idea that any change has taken place in the policy of the two Governments.

You will hear from Chusan of the alarm produced by inquiries into the taxation of the island. As the place and inhabitants are poor, it would, in my opinion,

R

be advisable to treat the island now as we did on our former occupation,¹ and not raise taxes. Considering the extent of China, and the importance of not being driven elsewhere for supplies, we ought not to sacrifice lightly the goodwill of the inhabitants, where they are disposed to receive us in a friendly spirit. I hear that Meritens has recommended the removal of the civil mandarin, because he declines furnishing information as to taxes. I should regret any such measure, as his absence would render the task of administering the island much more difficult.

Perhaps the Earl² has left you for the north. If not, pray show him this letter. I don't write to him, because I expect that he will have started for Shanghai.

I may mention that it is reported the Imperialists have been beaten and compelled to raise the siege of Nankin, and that fresh proposals for accommodation are contemplated by the Chinese. I expect some such move when the ambassadors arrive.

I like what I have seen of Janin.³ . . .

Yours very truly,

FREDERICK BRUCE.

¹ In 1843.

² His brother, Lord Elgin.

³ The French envoy.

Heads of Convention between the English and the Chinese, signed at Pekin, October 24, 1860.

1. The Emperor of China expresses his deep regret at the misunderstanding occasioned by the act of the Taku garrison, 1859.
2. The English ambassador to be allowed to reside at Pekin.
3. The Emperor of China to pay 8,000,000 taels indemnity to the British Government.
4. Tien-tsin to be open to British traders.
5. Permission to be granted to Chinese subjects to take service with the British in their colonies or other parts beyond sea.
6. Kowloon permanently ceded to the British.
7. Provisions of the treaty of 1858 to be carried into effect.
8. The 1858 and the 1860 treaty to be made public throughout China.
9. Upon the exchange of ratifications of the 1858 treaty and the signature of the 1860 convention, Chusan to be evacuated, and British force before Pekin to commence its march towards Tien-tsin, Taku, Shan-tung, and Canton; but at the option of the Queen a force may be maintained at any of the above stations pending the payment of the indemnity.

VI.

(See Chapter IV.)

Extract from a Despatch from LORD HERBERT, Secretary of State for War, to Sir HOPE GRANT, dated War Office, 10th November 1860.

“SIR,— . . . I immediately laid before the Queen those despatches in which you have ably described the rapid and brilliant operations which followed the landing of the allied forces at Peh-tang, and which terminated in the capture of the forts both on the north and south banks of the Peiho.

“I have now received her Majesty’s gracious orders to express to you her sense of the great service you have rendered to the country, and her admiration of the gallantry and discipline which have been signally displayed by the troops under your command. . . .

“The Queen deeply deplores the inevitable loss incidental to the achievement of this great success. . . .

“To yourself as commander-in-chief, to the generals of divisions, to the brigadiers, and to all the officers and men engaged, her Majesty tenders her warm and heartfelt thanks.”

VII.

Extract of a Despatch from Sir HOPE GRANT to LORD CANNING relating to the services of the two Sikh Irregular Cavalry Regiments.

HEADQUARTERS, TIEN-TSIN, Nov. 21, 1860.

MY LORD,—The 1st Sikh Irregular Cavalry, under Major Probyn, and Fane's Horse under Captain Fane, have performed their work most admirably. On more than one occasion these regiments have been opposed to, and have successfully charged, a vastly superior force of the enemy's cavalry; and their conduct in the field excited the admiration of the French as well as of the English troops.

It is not only on the field of battle that their services have been so important during the recent campaign, but in performing the numerous other duties required of them of an infinitely more harassing nature—patrols, escorts, reconnaissances, as well as the task of carrying letters almost daily between Tien-tsin and Peking (a distance of 75 miles) for upwards of a month, during which they were frequently fired upon—their services have been of the utmost value to the expedition. I beg to recommend Major Probyn and Captain Fane to your Excellency's most favourable notice.

I have, &c.

J. HOPE GRANT, *Lieut.-General,*
Commander of the Forces.

VIII.

Proposed Distribution of British Troops when the army
marched from Peking, November 1860.

To remain at Tien- tsin under Briga- dier Staveley,	{	2 ½ Batteries Royal Artillery. 1 Company Royal Engineers. Fane's Horse. Military Train. 3 Line Regiments.
To Remain at Shanghai,	{	½ Battery Royal Artillery. 2 Native Infantry Regiments.
Canton,	{	1 Battery Royal Artillery. 99th Regiment. 3d Bombay N.I.

The History of Europe,

FROM THE COMMENCEMENT OF THE FRENCH REVOLUTION IN 1789 TO THE BATTLE OF WATERLOO. By Sir Archibald Alison, Bart., D.C.L. Library Edition, 14 Vols. demy 8vo, with Portraits and a copious Index, £10, 10s.

On Large Paper, 14 vols., £14, 14s.

Crown 8vo Edition, 20 vols., £6.

People's Edition, 12 vols., closely printed in double columns, £2, 8s.; and Index Volume, 3s.

"An extraordinary work, which has earned for itself a lasting place in the literature of the country, and within a few years found innumerable readers in every part of the globe. There is no book extant that treats so well of the period to the illustration of which Mr Alison's labours have been devoted. It exhibits great knowledge, patient research, indefatigable industry, and vast power."—*Times*.

"There is much in Mr Alison's History of the French Revolution against which we intend to record our decided protest; and there are some parts of it which we shall feel compelled to notice with strong disapprobation. We therefore hasten to preface our less favourable remarks by freely acknowledging that the present work is, upon the whole, a valuable addition to European literature, that it is evidently compiled with the utmost care, and that its narration, so far as we can judge, is not perverted by the slightest partiality."—*Edinburgh Review*.

"Alison's *History of Europe*, and the States connected with it, is one of the most important works which literature has produced. Years have elapsed since any historical work has created such an epoch as that of Alison: his sources of information and authorities are of the richest and most comprehensive description. Though his opinions are on the Conservative side, he allows every party to speak for itself, and unfolds with a master's hand how far institutions make nations great, and mighty, and prosperous."—*Preface to the German Translation*.

Continuation of the History of Europe,

FROM THE FALL OF NAPOLEON TO THE ACCESSION OF LOUIS NAPOLEON. By Sir Archibald Alison, Bart., D.C.L. Uniform with the Library Edition of the foregoing, 9 vols., £6, 7s. 6d.

PEOPLE'S EDITION, 8 vols. crown 8vo, 34s.

Atlas to Alison's History of Europe;

Containing 109 Maps and Plans of Countries, Battles, Sieges, and Sea-Fights. Constructed by A. Keith Johnston, F.R.S.E. With Vocabulary of Military and Marine Terms. Library Edition, £3, 3s.; People's Edition, £1, 11s. 6d.

Epitome of Alison's History of Europe.

Sixteenth Edition, 7s. 6d., bound.

Atlas to Epitome of History of Europe.

4to, 7s.

Life of John Duke of Marlborough.

With some Account of his Contemporaries, and of the War of the Succession. By Sir Archibald Alison, Bart., D.C.L. Third Edition, 2 vols. 8vo. Portraits and Maps, 30s.

Essays: Historical, Political, and Miscellaneous.

By Sir Archibald Alison, Bart., D.C.L. 3 vols. demy 8vo, 45s.

*Lives of Lord Castlereagh and Sir Charles**Stewart*, SECOND AND THIRD MARQUESSSES OF LONDONDERRY. From the Original Papers of the Family, and other sources, embracing a full Account of the Campaign of 1813 and 1814 in Germany and France, and of the Congresses of Vienna, Laybach, and Verona. By Sir Archibald Alison, Bart., D.C.L. 3 vols. 8vo, £2, 2s.*Principles of the Criminal Law of Scotland.*

XENOPHON. By Sir Alex. Grant, Bart.	LUCIAN. By the Editor.
CICERO. By Rev. W. L. Collins, M.A.	PLATO. By Clifton W. Collins.
SOPHOCLES. By C. W. Collins, M.A.	GREEK ANTHOLOGY. By Lord Neaves.

Also in 10 Vols, with Calf or Vellum Back, £2, 10s.

Interludes.

By Alfred Austin, Author of 'The Season,' 'The Golden Age, &c. Fcap. 8vo, 5s.

"Enough has been written and quoted to show that Mr Austin is not a mere rhymer, spinning lines without beauty and devoid even of sense. He is hot, impulsive, generous, and thoroughly poetical. He has something to say, and he says it in words that dwell in the mind. He has songs to sing, and he sings them with a sweetness and melody that are rarely found."—*Scotsman*.

Lays of the Scottish Cavaliers, and other Poems.

By W. Edmondstone Aytoun, D.C.L., Professor of Rhetoric and Belles-Lettres in the University of Edinburgh. Twenty-second Edition. Fcap. 8vo, 7s. 6d.

"Mr Aytoun's 'Lays' are truly beautiful, and are perfect poems of their class, pregnant with fire, with patriotic ardour, with loyal zeal, with exquisite pathos, with noble passion. Who can hear the opening lines descriptive of Edinburgh after the great battle of Flodden, and not feel that the minstrel's soul has caught the genuine inspiration?"—*Morning Post*.

"Professor Aytoun's 'Lays of the Scottish Cavaliers'—a volume of verse which shows that Scotland has yet a poet. Full of the true fire, it now stirs and swells like a trumpet-note—now sinks in cadences sad and wild as the wail of a Highland dirge."—*Quarterly Review*.

Aytoun's Lays of the Scottish Cavaliers.

An Illustrated Edition. From designs by Sir J. Noel Paton and W. H. Paton, R.S.A. Engraved by John Thomson, W. J. Linton, W. Thomas, Whymper, Cooper, Green, Dalziels, Evans, &c. In small Quarto, printed on Toned Paper, bound in gilt cloth, 21s.

"The artists have excelled themselves in the engravings which they have furnished. Seizing the spirit of Mr Aytoun's 'Ballads' as perhaps none but Scotchmen could have seized it, they have thrown their whole strength into the work with a heartiness which others would do well to imitate. Whoever there may be that does not know these 'Lays' we recommend at once to make their acquaintance in this edition, wherein author and artist illustrate each other as kindred spirits should."—*Standard*.

Bothwell: A Poem.

By W. Edmondstone Aytoun, D.C.L. Third Edition. Fcap. 8vo, 7s. 6d.

"A noble poem, healthy in tone and purely English in language, and closely linked to the historical traditions of his native country."—*John Bull*.

"Professor Aytoun has produced a fine poem and an able argument, and 'Bothwell' will assuredly take its stand among the classics of Scottish Literature."—*The Press*.

The Ballads of Scotland.

Edited by Professor Aytoun. Fourth Edition. 2 vols., fcap. 8vo, 12s.

"No country can boast of a richer collection of Ballads than Scotland, and no Editor for these Ballads could be found more accomplished than Professor Aytoun. He has sent forth two beautiful volumes which range with Percy's 'Reliques'—which, for completeness and accuracy, leave little to be desired—which must henceforth be considered as the standard edition of the Scottish Ballads, and which we commend as a model to any among ourselves who may think of doing like service to the English Ballads."—*The Times*.

Norman Sinclair.

By W. Edmondstone Aytoun, D.C.L. 3 vols. post 8vo, 31s. 6d.

Firmilian, or the Student of Badajos.

A SPASMODIC TRAGEDY. By T. Percy Jones (Professor Aytoun). In small 8vo, 5s.

"Humour of a kind most rare at all times, and especially in the present day, runs through every page; and passages of true poetry and delicious versification prevent the continual play of sarcasm from becoming tedious."—*Literary Gazette*.

Memoir of William E. Aytoun, D.C.L.

Author of 'Lays of the Scottish Cavaliers,' &c. By Theodore Martin. With Portrait. Post 8vo, 12s.

"This biography is quite a model in its way, and a delightful relief after much that has been done of late years in a similar line. Good taste, right feeling, and a generous but seldom excessive appreciation of the subject, mark the work."—*Manchester Guardian*.

Blackwood's Magazine,

FROM COMMENCEMENT IN 1817 TO DECEMBER 1872. Nos. 1 to 686,
forming 112 Volumes. £30.

Index to Blackwood's Magazine.

OTHER WORKS IN PREPARATION.

Blackwood's Maps of the Counties of Scotland.

In Cloth Case for the Pocket, 1s. each.

The same strongly bound in leather, in one vol. post 8vo, 10s. 6d.

The Maid of Sker.

By **R. D. Blackmore**, Author of 'Lorna Doone,' &c. Originally published in 'Blackwood's Magazine,' A New Edition. Crown 8vo, 7s. 6d.

"His descriptions are wonderfully vivid and natural, although he loves to paint nature in her most extravagant freaks. His pages are brightened everywhere with quiet humour; the quaint dry turns of thought remind you occasionally of Fielding."—*Times*.

"A work which reads in some parts like the famous autobiographies of Defoe, and in others contains descriptions of natural beauty worthy of Kingsley, and nautical adventures not inferior to the best things in Marryat."—*Athenæum*.

"But let fact or fiction begin or end where they will, the book is exceeding able, and strikingly original."—*Saturday Review*.

"Mr Blackmore's book is in our opinion a genuine success, one of the few good novels that have been written for many years, and one which will live."—*Spectator*.

Lilias Lee, and other Poems.

By **James Ballantine**, Author of 'The Gaberlunzie's Wallet,' &c. Fcap. 8vo, 5s.

Battle of Dorking. Reminiscences of a Volunteer :

From 'Blackwood's Magazine.' Second Hundredth Thousand, 6d.

Belief—What is it ?

Or, The Nature of Faith as Determined by the Facts of Human Nature and Sacred History. 8vo, 7s.

Tables for Travellers.

Adapted to the Pocket or Sextant-Case. Compiled by **Admiral Bethune**, **C.B.**, **F.R.A.S.**, and **F.R.G.S.** Cloth, 3s. 6d.

The Boscobel Tracts.

RELATING TO THE ESCAPE OF CHARLES THE SECOND AFTER THE BATTLE OF WORCESTER, AND HIS SUBSEQUENT ADVENTURES. Edited by **J. Hughes, Esq., A.M.** A NEW EDITION, with additional Notes and Illustrations, including Communications from the **Rev. B. H. Barham**, Author of the 'Ingoldsby Legends.' In Octavo, with Engravings, 16s.

"'The Boscobel Tracts' is a very curious book, and about as good an example of single subject historical collections as may be found. Originally undertaken, or at least completed, at the suggestion of the late Bishop Copplestone, in 1827, it was carried out with a degree of judgment and taste not always found in works of a similar character."—*Spectator*.

Memoirs of the Life and Times of Henry Lord

Brougham. Written by **Himself**. 3 vols. octavo, £2, 8s. The Volumes are sold separately, 16s. each.

The Forester :

A Practical Treatise on the Planting, Rearing, and General Management of Forest-trees. By **James Brown**, Wood-Surveyor and Nurseryman, Stirling. Fourth Edition. Royal 8vo, with Engravings, £1, 11s. 6d.

In preparing the present Edition, the Author has carefully re-written the book, and added nearly one hundred new sections upon important subjects, which were necessary to bring it up to the advanced state of the times, and to make it in all respects worthy of continuing in public favour, as a complete directory in all matters connected with the improved state of Arboriculture at the present day.

"What we have often stated in these columns we now repeat, that the book before us is the most useful guide to good arboriculture in the English language."—*Review of Third Edition in Gardeners' Chronicle by Dr Lindley*.

"Beyond all doubt this is the best work on the subject of forestry extant."—*Journal of Horticulture*.

The Book of Ballads.

Edited by **Bon Gaultier**. Eleventh Edition, with numerous Illustrations by DOYLE, LEECH, and CROWQUILL. Gilt edges, post octavo, 8s. 6d.

Family Records of the Bruces and the Cumyns.

With an Historical Introduction and Appendix from authentic Public and Private Documents. By **M. E. Cumming Bruce**. Quarto, cloth, £2, 10s. LARGE-PAPER EDITION, medium quarto, cloth, £3, 10s.

Jessie Cameron: A Highland Story.

By the **Lady Rachel Butler**. Second Edition. Small octavo, with a Frontispiece, 2s. 6d.

Handy Book of Meteorology.

By **Alexander Buchan, M.A., F.R.S.E.**, Secretary of the Scottish Meteorological Society, &c. A New Edition, being the Third. [*In the press.*]

In this EDITION the Charts of the Distribution of Atmospheric Pressure and of Terrestrial Temperature will be revised; the Relations of Temperature to Atmospheric Pressure and Winds will, with the aid of Illustrative Charts, be more fully discussed, and the principle will be applied in explanation of unusually Hot and Cold Seasons, as well as Seasons of excessive Drought or excessive Rainfall; Charts will be given showing the Distribution of Rain over the Continents of the Globe, and its connection with the distribution of atmospheric pressure and temperature, and with prevailing winds, will be pointed out; the Prevailing Winds over the Globe will be represented on Charts; and otherwise the book will be revised throughout.

Introductory Text-Book of Meteorology.

By **Alexander Buchan, M.A., F.R.S.E.**, Author of 'Handy Book of Meteorology,' &c. Crown 8vo, with 8 Coloured Charts and other Engravings, pp. 218. 4s. 6d.

"A handy compendium of Meteorology by one of the most competent authorities on this branch of science."—*Petermann's Geographische Mittheilungen.*

"We can recommend it as a handy, clear, and scientific introduction to the theory of Meteorology, written by a man who has evidently mastered his subject."—*Lancet.*

"An exceedingly useful volume."—*Athenæum.*

Memoir of the Political Life of the Right Honourable Edmund Burke, with Extracts from his Writings. By the **Rev. George Croly, D.D.** 2 vols. post 8vo, 18s.*Handbook of the Mechanical Arts*

Concerned in the Construction and Arrangement of Dwelling-Houses and other Buildings; with Practical Hints on Road-making and the Enclosing of Land. By **Robert Scott Burn**, Engineer. Second edition, crown 8vo, 6s. 6d.

Practical Ventilation,

As applied to Public, Domestic, and Agricultural Structures; with Remarks on Heating, Construction of Fire-Places, Cure of Smoky Chimneys, and an Appendix on the Ventilation of Ships, Steamboats, and Railway Carriages. By **Robert Scott Burn**, Engineer. Crown 8vo, 6s.

The History of Scotland:

From Agricola's Invasion to the Extinction of the last Jacobite Insurrection. By **John Hill Burton**, Historiographer-Royal for Scotland. New and Enlarged Edition, in 8 vols. crown 8vo, and index vol, £3, 3s.

The Book-Hunter.

By **John Hill Burton**. In crown 8vo. Second Edition, 7s. 6d.

"A book pleasant to look at and pleasant to read—pleasant from its rich store of anecdote, its geniality, and its humour, even to persons who care little for the subjects of which it treats, but beyond measure delightful to those who are in any degree members of the above-mentioned fraternity."—*Saturday Review*.

The Scot Abroad,

AND THE ANCIENT LEAGUE WITH FRANCE. By **John Hill Burton**. 2 vols. crown 8vo, in Roxburghe binding, 15s.

"No amount of selections, detached at random, can give an adequate idea of the varied and copious results of reading which are stored up in the compact and pithy pages of 'The Scot Abroad.'"—*Saturday Review*.

"A charming book."—*Spectator*.

The Cairngorm Mountains.

By **John Hill Burton**. In Crown 8vo, 3s. 6d.

"One of the most complete as well as most lively and intelligent bits of reading that the lover of works of travel has seen for many a day."—*Saturday Review*.

Sermons.

By **John Caird, D.D.**, Professor of Divinity in the University of Glasgow. Thirteenth Thousand. Fcap. 8vo, 5s.

"They are noble sermons; and we are not sure but that, with the cultivated reader, they will gain rather than lose by being read, not heard. There is a thoughtfulness and depth about them which can hardly be appreciated, unless when they are studied at leisure; and there are so many sentences so felicitously expressed that we should grudge being hurried away from them by a rapid speaker, without being allowed to enjoy them a second time."—*Fraser's Magazine*.

Religion in Common Life:

A Sermon preached in Crathie Church, October 14, 1855, before Her Majesty the Queen and Prince Albert. By **John Caird, D.D.** Published by Her Majesty's Command. Bound in cloth, 8d. Cheap Edition, 3d.

Autobiography of the Rev. Dr Alexander Carlyle,

Minister of Inveresk. Containing Memorials of the Men and Events of his Time. Edited by John Hill Burton. In 8vo. Third Edition, with Portrait, 14s.

"This book contains by far the most vivid picture of Scottish life and manners that has been given to the public since the days of Sir Walter Scott. In bestowing upon it this high praise, we make no exception, not even in favour of Lord Cockburn's *Memorials*—the book which resembles it most, and which ranks next to it in interest."—*Edinburgh Review*.

"A more delightful and graphic picture of the everyday life of our ancestors it has never been our good fortune to meet with."—*National Review*.

A Treasury of the English and German Languages.

Compiled from the best Authors and Lexicographers in both Languages. Adapted to the Use of Schools, Students, Travellers, and Men of Business; and forming a Companion to all German-English Dictionaries. By Joseph Cauvin, LL.D. & Ph.D., of the University of Göttingen, &c. Crown 8vo, 7s. 6d., bound in cloth.

"An excellent English-German Dictionary, which supplies a real want."—*Saturday Review*.

"The difficulty of translating English into German may be greatly alleviated by the use of this copious and excellent English-German Dictionary, which specifies the different senses of each English word, and gives suitable German equivalents. It also supplies an abundance of idiomatic phraseology, with many passages from Shakespeare and other authors aptly rendered in German. Compared with other dictionaries, it has decidedly the advantage."—*Athenæum*.

Captain Clutterbuck's Champagne.

A WEST INDIAN REMINISCENCE. Post 8vo, 12s.

"We can conscientiously commend 'Captain Clutterbuck's Champagne' to all who like a really original story with no nonsense in it."—*Press*.

The Punjab and Delhi in 1857 :

BEING A NARRATIVE OF THE MEASURES BY WHICH THE PUNJAB WAS SAVED AND DELHI RECOVERED DURING THE INDIAN MUTINY. By the Rev. J. Cave-Brown, Chaplain of the Punjab Movable Column. With Plans of the Chief Stations and of the different Engagements, and Portraits of Sir J. Lawrence, Bart., Sir H. Edwardes, Sir R. Montgomery, and Brig.-Gen. J. Nicholson. 2 vols. post 8vo, 21s.

"This is a work which will well repay the trouble of perusal. Written by one who was himself present at many of the scenes he narrates, and who has had free access to the papers of Sir J. Lawrence, Sir R. Montgomery, and Sir H. Edwardes, it comes with all the weight of official authority, and all the vividness of personal narrative."—*Press*.

Coquet-Dale Fishing Songs.

Now first collected by a North-Country Angler, with the Music of the Airs. 8vo, 5s.

Sporting Days.

By **John Colquhoun**, Author of 'The Moor and the Loch,' &c. Crown 8vo, 5s.

Rocks and Rivers;

Or, Highland Wanderings over Crag and Correi, "Flood and Fell." By **John Colquhoun**, Author of 'Sporting Days.' 8vo, 6s. 6d.

Salmon-Casts and Stray Shots.

Being Fly-leaves from the Note-Book of **John Colquhoun**, Esq., Author of 'The Moor and the Loch,' &c. Second Edition, fcap. 8vo, 5s.

The Coming Race.

Ninth Edition, crown 8vo, 6s.

"Language, literature, and the arts, all touched on with admirable verisimilitude, are impressed into the service of his thesis; and often, in reading of the delights of this underground Utopia, have we sighed for the refreshing tranquillity of that lamp-lit land."—*Athenæum*.

"Its kindly satire, its gentle moralisings, its healthy humour, and its extensive knowledge well applied, combine to separate it from the mass of ephemeral publications, and give evidence of literary skill very rarely to be met with in books written for the circulating libraries."—*Examiner*.

"The book is well written, and ingeniously worked out."—*Saturday Review*.

Venus and Psyche,

WITH OTHER POEMS. By **Richard Crawley**. Fcap. 8vo, 5s.

"Mr Crawley writes verses through which there runs an abundant vein of genuine poetry. . . . Much, very much, of Mr Crawley's poetry is perfectly original—the creation of his own fancy—which is eminently near akin to the vision and the faculty divine, and is equally powerful in painting scenes of terror and tenderness. His minor poems are most of them beautiful, and some of them exquisite pieces of piercing satire."—*Evening Standard*.

The Genesis of the Church.

By the **Right Rev. Henry Cotterill, D.D.**, Bishop of Edinburgh. Demy 8vo, 16s.

"The book is strikingly original, and this originality is one of its great charms—the views of an able and cultivated man whom long study has made fully master of his subject."—*Scottish Guardian*.

"In Dr Cotterill's volume a book of great ability has been presented to the world."—*Edinburgh Courant*.

"His book breathes the spirit and is stamped with the character of the present age. It requires, and will amply repay, the most careful and attentive reading; and it is likely to carry conviction to many a mind which has been merely repelled by the ordinary quoting of texts or appeals to Church History to prove the existence of the three Orders, and the necessity of the apostolical succession."—*Literary Churchman*.

Chronicles of Carlingford.

Salem Chapel. 2s. in boards, or 2s. 6d. in cloth.

The Rector, and the Doctor's Family. 1s. in boards, or 1s. 6d. in cloth.

The Perpetual Curate. 2s. in boards, or 2s. 6d. in cloth.

Miss Marjoribanks. 2s. in boards, or 2s. 6d. in cloth.

Cornelius O'Dowd upon Men and Women,

AND OTHER THINGS IN GENERAL. 3 vols. crown 8vo, 10s. 6d. each.

"The flashes of the author's wit must not blind us to the ripeness of his wisdom, nor the general playfulness of his O'Dowderies allow us to forget the ample evidence that underneath them lurks one of the most earnest and observant spirits of the present time."—*Daily Review*.

The Fatherhood of God:

Considered in its General and Special Aspects, and particularly in relation to the Atonement; with a Review of Recent Speculations on the Subject.

By **Thomas J. Crawford, D.D.** Third Edition, revised and enlarged, with a Reply to the Strictures of Dr Candlish. 9s.

"The plan of this work is comprehensive and yet definite. It embodies much original thought, and the author's habits of searching inquiry and careful arrangement stand him in good stead. Whatever difference of opinion there may be on sundry topics, it would be idle to question the great ability shown by the learned Professor. As the subjects treated of have been and are so much discussed, it will be satisfactory to many to receive a book which expounds so fully, and maintains so forcibly, and on a Scriptural basis, the views of one so well qualified to speak."—*Journal of Sacred Literature*.

The Doctrine of Holy Scripture respecting the

Atonement. By **Thomas J. Crawford, D.D.**, Professor of Divinity in the University of Edinburgh. 8vo, 12s.

"This addition to the latest contributions to the elucidation of the doctrine of the atonement must inevitably take a high rank among them. It collates and analyses the teachings, not only of the apostles, but of all Scriptural authors on the subject. The work is done in a critical, thorough, exhaustive manner, and gives us an exhaustive thesaurus of Scriptural doctrine on the subject."—*Princeton Review*.

The Mysteries of Christianity.

By **T. J. Crawford, D.D., F.R.S.E.** Crown 8vo, 7s. 6d.

Descartes.

On the Method of Rightly Conducting the Reason, and Seeking Truth in the Sciences, and his Meditations, and Selections from his Principles of Philosophy. In one vol. post 8vo, 4s. 6d.

Japan :

Being a Sketch of the History, Government, and Officers of the Empire.
By Walter Dickson. 8vo, 15s.

"The entire work is not only pleasant and instructive reading, but one that ought to be read and re-read by all who wish to attain anything like a coherent idea of the real condition of Japan. Its value can hardly be overestimated."—*London and China Express*.

"Mr Dixon's work gives a general account of the History of Christianity in Japan more accurately than any preceding writer in the English language. . . . His work is the most valuable one that has yet appeared."—*Quarterly Review*.

A Family Tour round the Coasts of Spain and Portugal DURING THE WINTER OF 1860-61. By Lady Dunbar of Northfield. Post 8vo, 5s.

The Divine Footsteps in Human History.

8vo, 10s. 6d.

Seats and Saddles, Bits and Bitting,

AND THE PREVENTION AND CURE OF RESTIVENESS IN HORSES. By Francis Dwyer. A New and Enlarged Edition. Crown 8vo, with Engravings, 7s. 6d.

"Of Major Dwyer's book we can speak with much approbation. To those who are fond of the science of horsemanship, and who will give themselves time for some study of it, we know no work that comprehends so much good matter in so small a space."—*Baily's Monthly Magazine*.

Essays.

By the Rev. John Eagles, A.M., Oxon. Originally published in 'Blackwood's Magazine.' Post 8vo, 10s. 6d.

CONTENTS:—Church Music, and other Parochials.—Medical attendance, and other Parochials.—A few Hours at Hampton Court.—Grandfathers and Grandchildren.—Sitting for a Portrait.—Are there not Great Boasters among us?—Temperance and Teetotal Societies.—Thackeray's Lectures: Swift.—The Crystal Palace.—Civilisation: the Census.—The Beggar's Legacy.

The Sketcher.

By the Rev. John Eagles, A.M. Originally published in 'Blackwood's Magazine.' 8vo, 10s. 6d.

"This volume, called by the appropriate name of 'The Sketcher,' is one that ought to be found in the studio of every English landscape-painter. . . . More instructive and suggestive readings for young artists, especially landscape-painters, can scarcely be found."—*The Globe*.

Sonnets.

By the Rev. John Eagles, A.M. Crown 8vo, 5s.

Works of George Eliot. Library Edition.

- Adam Bede.* 2 vols., fcap. 8vo, 12s.
The Mill on the Floss. 2 vols., fcap. 8vo, 12s.
Scenes of Clerical Life. 2 vols., fcap. 8vo, 12s.
Silas Marner. Fcap. 8vo, 6s.
Felix Holt. 2 vols., fcap. 8vo, 12s.

Works of George Eliot. Cheap Edition,

- Adam Bede.* 3s. 6d.
The Mill on the Floss. 3s. 6d.
Scenes of Clerical Life. 3s.
Silas Marner. 2s. 6d.
Felix Holt. 3s. 6d.
Adam Bede. 2s. 6d.

Middlemarch; A Study of English Provincial

Life. By George Eliot. Cheap Edition. Crown 8vo, 7s. 6d.

The Legend of Jubal and other Poems.

By George Eliot. 2d Edition. Fcap. 8vo, 6s.

The Spanish Gypsy.

By George Eliot. Fourth Edition, crown 8vo, 7s. 6d.

"It is emphatically a great poem, great in conception, great in execution."
 —*Blackwood's Magazine.*

"She is a great writer, and in the 'Spanish Gypsy' she has achieved a great work."—*Times.*

"It is impossible, indeed, to speak too highly of the intellectual conception at the basis of the poem, and the finish and power with which it is worked out and adorned."—*Spectator.*

Wise, Witty, and Tender Sayings,

In Prose and Verse. Selected from the Works of George Eliot. By Alexander Main. Handsomely printed on Toned Paper, bound in gilt cloth. 2d Edition, 6s.

"But undoubtedly George Eliot is the only woman of our time whose writings would be remembered for their humour alone, or whose sayings, just now collected into a volume by themselves, are at all likely, like Shakespeare's sayings, to pass into the substance of the language."—*Spectator.*

"This little volume, which is everything that could be desired in the way of get-up, brings George Eliot's weightier thoughts and reflections, which lie scattered throughout her books, conveniently near; and busy readers may easily repair the results of inevitable haste by frequently devoting to it a spare half-hour. It is a book to have beside one, to be often taken up and laid aside again; for every page supplies food for meditation, and something, too, that is well calculated to be helpful in the conduct of life."—*Nonconformist.*

A Memoir of John Elder,

Engineer and Shipbuilder. By W. J. Macquorn Rankine, with Portrait. Crown 8vo. 2s. 6d.

The Education (Scotland) Act, 1872.

With Introduction, Explanatory Notes, and Index. By **Alexander Craig Sellar**, Advocate, Secretary to the Lord Advocate of Scotland. Price 6s. Another Edition—the Text only—price 6d.

Essays on Social Subjects.

Originally published in the 'Saturday Review.' A New Edition. First and Second Series. 2 vols., crown 8vo, 6s. each.

"Two remarkable volumes of occasional papers, far above the average of such miscellanies. They are the production of a keen and kindly observer of men and manners, and they display a subtle analysis of character, as well as a breadth of observation, which are remarkable. With much of occasional force, these Essays have sufficient solidity to make a book; and while they recall the wit of Montaigne and the playfulness of Addison, they are animated by a better moral tone, and cover a larger range of experience."—*Christian Remembrancer*.

Euchologion; or, Book of Prayers:

Being Forms of Worship issued by the Church Service Society. A New and Enlarged Edition, 6s. 6d.

"We know of no book which could be recommended as likely to be of greater use to the clergyman, especially to the young and inexperienced, than this second edition of 'Euchologion.'"—*Scotsman*.

The Crown and its Advisers;

Or, Queen, Ministers, Lords, and Commons. By **Alexander Charles Ewald, F.S.A.** Crown 8vo, 5s.

"We may congratulate Mr Ewald on the possession of a popular style and a clear method. . . . His observations on everything connected with the usages of Parliament are sound, and calculated to be very useful to the class of persons he is addressing. . . . A commendable attempt to explain in simple and popular language the machinery of the English Government."—*Pall Mall Gazette*.

"May be regarded in some respects as a Constitutional Manual."—*Standard*.

Institutes of Metaphysic:

The Theory of Knowing and Being. By **James F. Ferrier, A.B. Oxon.**, Professor of Moral Philosophy and Political Economy, St Andrews. Second Edition. Crown 8vo, 10s. 6d.

Lectures on the Early Greek Philosophy,

AND OTHER PHILOSOPHIC REMAINS OF PROFESSOR FERRIER OF ST ANDREWS. Edited by **Sir Alexander Grant** and **Professor Lushington**. 2 vols. post 8vo, 24s.

"These lectures, in so far as they treat of Greek philosophy down to Plato, have been carefully elaborated, and are of much value—of higher value, indeed, than any writings on the same subject in the English language; and in point of clearness, depth, and resolute search after truth, and tenacious hold of it when found, we doubt if they are surpassed in any language. . . . For our part, we do not know any philosophical writings so fascinating to a young student of philosophy as these early pages."—*Scotsman*.

Field-Map, Lothians Hunt;

with List of the Meets and Distances from General Post-Office, Edinburgh, and from the nearest Railway Stations. Bound in leather, 5s.

History of Greece under Foreign Domination.

By George Finlay, LL.D., Athens. 7 vols. 8vo—vis. :

Greece under the Romans. B.C. 146 to A.D. 717. A Historical View of the Condition of the Greek Nation from its Conquest by the Romans until the Extinction of the Roman Power in the East. Second Edition, 16s.

History of the Byzantine Empire. A.D. 716 to 1204; and of the Greek Empire of Nicæa and Constantinople, A.D. 1204 to 1453. 2 vols. £1, 7s. 6d.

Mediæval Greece and Trebizond. The History of Greece, from its Conquest by the Crusaders to its Conquest by the Turks, A.D. 1204 to 1566; and the History of the Empire of Trebizond, A.D. 1204 to 1461. 12s.

Greece under Othoman and Venetian Domination. A.D. 1453 to 1821. 10s. 6d.

History of the Greek Revolution. 2 vols. 8vo, £1, 4s.

The Philosophy of History in Europe.

Vol. I., containing the History of that Philosophy in France and Germany.

By Robert Flint, Professor of Moral Philosophy and Political Economy, University of St Andrews. 8vo, 15s.

Flowers from Fatherland in English Soil.

Translations from the German by John Pitcairn Trotter; A. Mercer Adams, M.D.; and George Coltman, M.A. Crown 8vo, 6s.

"A volume of translations that may be heartily recommended for their rare excellence."—*London Quarterly Review*.

"This is a very elegant volume of poems. The translations are good in most cases, spirited often, and readable always. And it is as gratifying as it is astonishing to mark the ease and elegance with which some of Heine's perfect gems are placed in their English setting."—*Illustrated London News*.

The Campaign of Garibaldi in the Two Sicilies :

A Personal Narrative. By Charles Stuart Forbes, Commander, R.N. Post 8vo, with Portraits, 12s.

"A volume which contains the best sketch hitherto published of the campaign which put an end to Bourbon rule in the Two Sicilies. It is accompanied with plans of the chief battles; and its honest unexaggerated record contrasts very favourably with the strained and showy account of the Garibaldians just published by M. Dumas."—*Examiner*.

Geological and Palæontological Map of the British

Islands, including Tables of the Fossils of the different Epochs, &c. &c., from the Sketches and Notes of Professor Edward Forbes. With Illustrative and Explanatory Letterpress. 21s.

Earl's Dene. A Novel.

By R. E. Francillon. 3 vols. post 8vo, 3rs. 6d.

A Dictionary of the Gaelic Language,

Comprising an ample Vocabulary of Gaelic Words, and Vocabularies of Latin and English Words, with their Translation into Gaelic, to which is prefixed a Compendium of Gaelic Grammar. Compiled and published under the Direction of the Highland Society of Scotland. 2 vols. quarto, cloth, £5, 5s.

The Novels of John Galt.

Annals of the Parish.

The Provost.

3. Minion type, limp cloth, 6d.; French morocco, 1s. 6d.
4. School Edition, in paper cover, 2d.
 - No. 1, bound with the Psalms and Paraphrases, cloth, 3s.; French morocco, 4s. 6d.; calf, 7s. 6d.
 - No. 2, bound with the Psalms and Paraphrases, cloth, 2s.; French morocco, 3s.
- 4.—*The Scottish Hymnal, with Music.*

Selected by the Committees on Hymns and on Psalmody. The harmonies arranged by W. H. Monk. cloth, 1s. 6d.; French morocco, 3s. 6d. The same in the Tonic Sol-fa Notation, 1s. 6d. and 3s. 6d.

ANOTHER EDITION, with fixed Tune for each Hymn, cloth, 3s. 6d. and 4s. 6d.; French morocco, 6s. 6d.

The Principles and Practice of the Law of Trusts

and Trustees in Scotland, with Notes and Illustrations from the Law of England. By Charles Forsyth, Esq., Advocate and Barrister-at-Law. 8vo, 18s.

Idylls and Lyrics.

By William Forsyth, Author of 'Kelavane,' &c. Crown 8vo, 5s.

"This is a little volume of unpretending but genuine poetry."—*Standard*.

"Good poetry is not so common a commodity nowadays that it should be passed over without special mark. When found, it should be brought to light that it may be admired. It is for this reason that special attention is here called to a little volume of 'Idylls and Lyrics,' by Mr William Forsyth. . . . Mr Forsyth is a poet. There is genuine music in almost every line he writes. He sees what most men fail to see; he hears what most men fail to hear; and he writes with a felicity of style that few men can equal. In all this volume there is scarcely a page which does not teem with beauties—all the more beautiful that while they want not in vigour and in fineness of perception, they are simple and clear to every reader."—*Scotsman*.

Introductory Addresses

Delivered at the Opening of the University of Glasgow, Session 1870-71. With a Prefatory Notice of the new Buildings by Professor Allan Thomson, M.D.; and Photograph of the University. Small 4to, 4s. 6d.; small Paper Edition without Photograph, 2s. 6d.

The Subaltern.

By G. E. Gleig, M.A., Chaplain-General of Her Majesty's Forces. Originally published in 'Blackwood's Magazine.' Library Edition. Revised and Corrected, with a New Preface. Crown 8vo, 7s. 6d.

"Originally published in 'Blackwood's Magazine' in 1825, it was at once received with favour, and the present generation of readers will no doubt endorse the verdict of their fathers, and find pleasure in reading Mr Gleig's faithful and picturesque account of his boyish campaign. The volume, though as interesting as any novel, is in all respects the actual record of its author's own experience, and it is in fact the day-to-day journal of a young officer who embarked at Dover with his battalion in 1813, joined Lord Wellington's army a few days before the storming of San Sebastian, just as the French, under Soult, were being driven back through the Pyrenees on to their own soil, and had his share of the fighting on the Bidassoa. . . . We must not omit to notice the new preface which gives an additional interest to the present issue of 'The Subaltern,' and which recounts the present-day aspect of the tract of country where were fought the last battles of the Peninsular War. There is something touching in the old clergyman thus going over the ground he trod sixty years ago as a young soldier, full of military ardour, and recognising the cities and the soil on which were acted the glorious and unforgotten scenes in which he bore a hero's part."—*The Times*.

On the Influence exerted by the Mind over the

Body, IN THE PRODUCTION AND REMOVAL OF MORBID AND ANOMALOUS CONDITIONS OF THE ANIMAL ECONOMY. By John Glen, M.A. Crown 8vo, 2s. 6d.

Goethe's Faust.

Translated into English Verse by **Theodore Martin**. Second Edition, post 8vo, 6s.

Cheap Edition, fcap., 3s. 6d.

"The best translation of 'Faust' in verse we have yet had in England."—*Spectator*.

"Mr Theodore Martin's translation is unquestionably the best in the language, and will give to English readers a fair idea of the greatest of modern poems."—*Press*.

Poems and Ballads of Goethe.

Translated by **Professor Ayton** and **Theodore Martin**. Second Edition, fcap. 8vo, 6s.

"There is no doubt that these are the best translations of Goethe's marvelously-cut gems which have yet been published."—*The Times*.

A Walk across Africa;

Or, Domestic Scenes from my Nile Journal. By **James Augustus Grant**, Captain H.M. Bengal Army, Fellow and Gold Medallist of the Royal Geographical Society. 8vo, with Map, 15s.

"Captain Grant's frank, manly, unadorned narrative."—*Daily News*.

"Captain Grant's book will be doubly interesting to those who have read Captain Speke's. He gives, as his special contribution to the story of their three years' walk across Africa, descriptions of birds, beasts, trees, and plants, and all that concerns them, and of domestic scenes throughout the various regions. The book is written in a pleasant, quiet, gentlemanly style, and is characterised by a modest tone. . . . The whole work is delightful reading."—*Globe*.

Memoirs and Adventures of Sir William Kirkcaldy

of Grange, Governor of the Castle of Edinburgh for Mary Queen of Scots. By **James Grant**. Post 8vo, 10s. 6d.

"It is seldom, indeed, that we find history so written, in a style at once vigorous, perspicuous, and picturesque. The author's heart is thoroughly with his subject."—*Blackwood's Magazine*.

Memoirs and Adventures of Sir John Hepburn,

Marshal of France under Louis XIII., &c. By **James Grant**. Post 8vo, 8s.

Memorials of the Castle of Edinburgh.

By **James Grant**. A New Edition. In crown 8vo, with 12 Engravings, 2s.

"Of the different books of this nature that have fallen in our way, we do not remember one that has equalled Mr Grant's 'Memorials of the Castle of Edinburgh.'"—*Spectator*.

Symbolism :

OR, MIND, MATTER, AND LANGUAGE AS THE NECESSARY ELEMENTS OF THINKING AND REASONING. By **James Haig, M.A.** Crown 8vo, 12s.

"The book is in reality a popular exposition of philosophy and philosophical systems expressed in the clearest language. . . . The author occasionally displays considerable originality and ingenuity in his investigations. . . . He seems to suggest that philosophy and theology should go hand in hand. . . . Here we must take leave of this sturdy thinker with some admiration of his bold ideas and careful research. . . . The general reader will gather with little trouble from his pages some of the flowers of philosophical literature."—*Examiner*.

Wenderholme :

A STORY OF LANCASHIRE AND YORKSHIRE LIFE. By **Philip Gilbert Hamerton**, Author of 'A Painter's Camp,' &c. 3 vols. post 8vo, £1, 11s. 6d.

Lectures on Metaphysics.

By **Sir William Hamilton, Bart.**, Professor of Logic and Metaphysics in the University of Edinburgh. Edited by the **Rev. H. L. Mansel, B.D., LL.D.**, Dean of St Paul's; and **John Veitch, M.A.**, Professor of Logic and Rhetoric, Glasgow. Fifth Edition. 2 vols. 8vo, 24s.

Lectures on Logic.

By **Sir William Hamilton, Bart.** Edited by **Professors Mansel and Veitch**. Second Edition. In 2 vols., 24s.

Discussions on Philosophy and Literature,

EDUCATION, AND UNIVERSITY REFORM. By **Sir William Hamilton, Bart.** Third Edition. 8vo, 21s.

Memoir of Sir William Hamilton, Bart.,

Professor of Logic and Metaphysics in the University of Edinburgh. By **Professor Veitch** of the University of Glasgow. 8vo, with Portrait, 18s.

"No better piece of philosophical biography has hitherto been produced in this country."—*North British Review*.

"Professor Veitch has succeeded in blending the domestic with the intellectual life of Sir W. Hamilton in one graphic picture, as biographers rarely do succeed."—*Saturday Review*.

"Hamilton's was a heroic life, and Professor Veitch has told it affectionately, truly, and well."—*Pall Mall Gazette*.

Annals of the Peninsular Campaigns.

By **Captain Thomas Hamilton**. A New Edition Edited by **F. Hardman**. 8vo, 16s. Atlas of Maps to illustrate the Campaigns, 12s.

Men and Manners in America.

By **Captain Thomas Hamilton**. With Portrait of the Author. Fcap., 7s. 6d.

The Operations of War Explained and Illustrated.

By **Edward Bruce Hamley**, Colonel in the Royal Artillery, Companion of the Bath, Commandant of the Staff College, &c. 3d Edition, 4to, with numerous Illustrations, 30s.

"Colonel Hamley's treatise on the 'Operations of War' is, we do not hesitate to say, the best that has been written in the English language."—*The Times*.

"On all matters relating to the practice of the profession it forms the most perfect book of reference that has been published."—*United Service Magazine*.

The Story of the Campaign of Sebastopol.

Written in the Camp. By **Col. E. Bruce Hamley**. With Illustrations drawn in Camp by the Author. 8vo, 21s.

"We strongly recommend this 'Story of the Campaign' to all who would gain a just comprehension of this tremendous struggle. Of this we are perfectly sure, it is a book unlikely to be ever superseded. Its truth is of that simple and startling character which is sure of an immortal existence; nor is it paying the gallant Author too high a compliment to class this masterpiece of military history with the most precious of those classic records which have been bequeathed to us by the great writers of antiquity who took part in the wars they have described."—*The Press*.

Wellington's Career;

A Military and Political Summary. By **Col. E. Bruce Hamley**. Crown 8vo, 2s.

Lady Lee's Widowhood.

By **Col. E. Bruce Hamley**. Crown 8vo, 2s. 6d.

"A quiet humour, an easy, graceful style, a deep, thorough, confident knowledge of human nature in its better and more degrading aspects, a delicate and exquisite appreciation of womanly character, an admirable faculty of description, and great tact, are the qualities that command the reader's interest and respect from beginning to end of 'Lady Lee's Widowhood.'"—*The Times*.

Our Poor Relations.

A Philozoic Essay. By **Col. E. Bruce Hamley**. With Illustrations, chiefly by Ernest Griset. Crown 8vo, cloth gilt, 3s. 6d.

"This is a charming little book, such as may be read through in half an hour; nor would it be easy to spend half an hour more pleasantly, or indeed to more profit. Slowly, very slowly indeed, but still by a sure progress, we are struggling out of the merely selfish and masterful view of the relations between ourselves and the lower animals; and Colonel Hamley's Essay, with its wide, kindly sympathies and delicate fancy, will help it on."—*Spectator*.

The Position on the Alma.

In Seven Sketches from the Field on the Day after the Battle. By Col. E. Bruce Hamley. Cloth, 5s.

A New Sea and an Old Land;

Being Papers suggested by a Visit to Egypt at the end of 1869. By General W. G. Hamley. 8vo, with coloured Illustrations, 10s. 6d.

"Such are the contrasts the book deals with, handling them in a style that is not only pleasant but picturesque; and those who care to have ancient Egypt made easy will attain their object with the smallest possible expenditure of temper and trouble by placing themselves under his guidance."—*Saturday Review*.

Handy Book of Laws

CHIEFLY AFFECTING SCOTLAND. Abridged and plainly stated for general use. By an Ex-Sheriff-Substitute. Sewed, 6d.

The Handy Horse-Book;

Or, Practical Instructions in Riding, Driving, and the General Care and Management of Horses. By "Magenta." A New Edition, with 6 Engravings, 4s. 6d.

"As cavalry officer, hunting horseman, coach-proprietor, whip, and steeple-chase-rider, the author has had long and various experience in the management of horses, and he now gives us the cream of his information."—*Athenæum*.

"He propounds no theories, but embodies in simple untechnical language what he has learned practically."—*Sporting Gazette*.

A Glossary of Navigation.

Containing the Definitions and Propositions of the Science, Explanation of Terms, and Description of Instruments. By the Rev. J. B. Harbord, M.A., Assistant Director of Education, Admiralty. Crown 8vo. Illustrated with Diagrams, 6s.

RECORDS OF WOMAN.
FOREST SANCTUARY.
SONGS OF THE AFFECTIONS.

DRAMATIC WORKS.
TALES AND HISTORIC SCENES.
MORAL AND RELIGIOUS POEMS.

Select Poems of Mrs Hemans.

In One Vol., fcap. 8vo, 3s.

Memoir of Mrs Hemans.

By her Sister. With a Portrait, fcap. 8vo, 5s.

The Practice in the Several Judicatories of the

Church of Scotland. By **Alexander Hill**, D.D. Sixth Edition, Revised and Enlarged. Fcap. 8vo, 4s.

A Book about Roses,

HOW TO GROW AND SHOW THEM. By **S. Reynolds Hole**, Author of 'A Little Tour in Ireland.' Fourth Edition, Enlarged. Crown 8vo, 7s. 6d.

"It is the production of a man who boasts of thirty 'all England' cups, whose Roses are always looked for anxiously at flower-shows, who took the lion's share in originating the first Rose-show *pur et simple*, whose assistance as judge or *amicus curiæ* is always courted at such exhibitions. Such a man 'ought to have something to say worth hearing to those who love the Rose,' and he *has* said it."—*Gardeners' Chronicle*.

"We cordially recommend the book to every amateur who wishes to grow Roses as at once the pleasantest and the best yet written on the subject."—*The Field*.

"A very captivating book, containing a great deal of valuable information about the Rose and its culture, given in a style which cannot fail to please."—*Journal of Horticulture*.

The Six of Spades :

A Book about the Garden and the Gardener. By the **Rev. S. Reynolds Hole**, Author of 'A Book About Roses,' &c. Crown 8vo, 4s.

Homer's Odyssey and Iliad.

Translated into English Verse in the Spenserian Stanza. By **P. S. Worsley, M.A.**, Fellow of Corpus Christi College, Oxford; and **John Conington, M.A.**, Corpus Professor of Latin in the University of Oxford. 4 vols. crown 8vo, 39s.

"If the translator has produced a work which, having caught the spirit of the poem, can delight those to whom the original is a sealed book, he can desire no higher praise: and this praise belongs justly to Mr Worsley. . . . He has placed in the hands of English readers a poem which deserves to outlive the present generation."—*Edinburgh Review*.

"We assign it, without hesitation, the first place among existing English translations."—*Westminster Review*.

The Odes and Epodes of Horace,

A Metrical Translation into English, with Latin Text, Introduction, and Commentaries. By **Lord Lytton**. Crown 8vo, 14s.

Mary Queen of Scots

AND HER ACCUSERS. By **John Hosack**, Barrister-at-Law. This work contains the 'Book of Articles' produced against Queen Mary at Westminster, which has never hitherto been printed. A New and Enlarged Edition, with a Photograph from the Bust on the Tomb in Westminster Abbey. 2 vols. 8vo, £1, 11s. 6d.

"A careful study of Mr Hosack's book will show that he has explicitly or implicitly answered every one of the fifteen arguments in the famous Note L. of Hume's History of this reign."—*Quarterly Review*.

"Whatever surmises may be formed about Mary's knowledge or assent, there can now be no doubt that the murder was contrived, not by Mary, but by her accusers."—*Scotsman*.

"He has confuted those who, by brilliant writing and a judicious selection of evidence, paint the Queen of Scots as an incarnate fiend, and who are dramatic poets rather than historians."—*The Times*.

A Treatise on the Conflict of Laws of England

and Scotland. By **John Hosack**, of the Middle Temple, Barrister-at-Law. 8vo, 10s. 6d.

Decisions of the Court of Session, 1781-1822.

Collected by **David Hume, Esq.**, Professor of the Law of Scotland in the University of Edinburgh. 4to, boards, £3, 3s.

Ballads from the German.

By **Henry Inglis**. Fcap. 8vo, 5s.

Marican, and other Poems.

By **Henry Inglis**. 8vo, 8s.

The Law of Creeds in Scotland.

A Treatise on the Legal Relation of Churches in Scotland, Established and not Established, to their Doctrinal Confessions. By **A. T. Innes**. 8vo, cloth, 15s.

Historical Record of the 79th Regiment of Foot,

OR CAMERON HIGHLANDERS. By **Captain Robert Jameson**, H.P. Depot Battalion, late Quartermaster 79th Highlanders. Crown 8vo, 7s. 6d.

The Mother's Legacie to her Unborne Child.

By **Mrs Elizabeth Joceline**. Edited by the **Very Rev. Principal Lee**. Cloth, gilt edges, 32mo, 4s. 6d. Also in morocco antique, 8s. 6d.

"This beautiful and touching Legacie."—*Athenaeum*.

"A delightful monument of the piety and high feeling of a truly noble mother."—*Morning Advertiser*.

The Scots Musical Museum.

Consisting of upwards of Six Hundred Songs, with proper Bases for the Pianoforte. Originally published by **James Johnson**; and now accompanied with Copious Notes and Illustrations of the Lyric Poetry and Music of Scotland, by the late **William Stenhouse**; with additional Notes and Illustrations, by **David Laing** and **C. K. Sharp**. 4 vols. 8vo, Roxburghe binding, £2, 12s. 6d.

The Royal Atlas of Modern Geography.

In a Series of entirely Original and Authentic Maps. By **A. Keith Johnston**, F.R.S.E., F.R.G.S., Author of the 'Physical Atlas,' &c. With a complete Index of easy reference to each Map, comprising nearly 150,000 Places contained in this Atlas. Imperial Folio, half-bound in russia or morocco, £5, 15s. 6d.; or with General Index in a separate volume, 8vo, both half-bound morocco, £6, 10s. Each Plate may be had separately with its Index, 3s. Dedicated by special permission to Her Majesty.

"Of the many noble atlases prepared by Mr Johnston and published by Messrs Blackwood and Sons, this Royal Atlas will be the most useful to the public, and will deserve to be the most popular."—*Athenaeum*.

"We know no series of maps which we can more warmly recommend. The accuracy, wherever we have attempted to put it to the test, is really astonishing."—*Saturday Review*.

"The culmination of all attempts to depict the face of the world appears in the Royal Atlas, than which it is impossible to conceive anything more perfect."—*Morning Herald*.

"This is, beyond question, the most splendid and luxurious, as well as the most useful and complete, of all existing atlases."—*Guardian*.

"An almost daily reference to, and comparison of, it with others, since the publication of the first part some two years ago until now, enables us to say, without the slightest hesitation, that this is by far the most complete and authentic atlas that has yet been issued."—*Scotsman*.

The Handy Royal Atlas.

45 Maps clearly printed and carefully coloured, with General Index. By **A. Keith Johnston, F.R.S.E., F.R.G.S., &c.** Imp. 4to, £2, 12s. 6d., half-bound morocco.

This work has been constructed for the purpose of placing in the hands of the public a useful and thoroughly accurate ATLAS of Maps of Modern Geography, in a convenient form, and at a moderate price. It is based on the 'ROYAL ATLAS,' by the same Author; and, in so far as the scale permits, it comprises many of the excellences which its prototype is acknowledged to possess. The aim has been to make the book strictly what its name implies, a HANDY ATLAS—a valuable substitute for the 'Royal,' where that is too bulky or too expensive to find a place, a needful auxiliary to the junior branches of families, and a *vade mecum* to the tutor and the pupil-teacher.

"This is Mr Keith Johnston's admirable Royal Atlas diminished in bulk and scale, so as to be, perhaps, fairly entitled to the name of "Handy," but still not so much diminished but what it constitutes an accurate and useful general Atlas for ordinary households."—*Spectator*.

"The 'Handy Atlas' is thoroughly deserving of its name. Not only does it contain the latest information, but its size and arrangement render it perfect as a book of reference."—*Standard*.

Keith Johnston's School Atlases.

Atlas of General and Descriptive Geography. A New and Enlarged Edition, suited to the best Text-Books; with Geographical information brought up to the time of publication. 26 Maps, clearly and uniformly printed in colours, with Index. Imperial 8vo, half-bound, 12s. 6d.

Atlas of Physical Geography, illustrating, in a Series of Original Designs, the Elementary Facts of GEOLOGY, HYDROGRAPHY, METEOROLOGY, and NATURAL HISTORY. A New and Enlarged Edition, containing 4 new Maps and Letterpress. 20 Coloured Maps. Imperial 8vo, half-bound, 12s. 6d.

Atlas of Astronomy. A New and Enlarged Edition, 21 Coloured Plates. With an Elementary Survey of the Heavens, designed as an accompaniment to this Atlas, by **Robert Grant, LL.D., &c.**, Professor of Astronomy and Director of the Observatory in the University of Glasgow. Imperial 8vo, half-bound, 12s. 6d.

Atlas of Classical Geography. A New and Enlarged Edition. Constructed from the best materials, and embodying the results of the most Recent Investigations, accompanied by a complete INDEX OF PLACES, in which the proper quantities are given by **T. Harvey and E. Worsley, MM.A.** Oxon. 21 Coloured Maps. Imperial 8vo, half-bound, 12s. 6d.

"This edition is so much enlarged and improved as to be virtually a new work, surpassing everything else of the kind extant, both in utility and beauty."—*Athenæum*.

Elementary Atlas of General and Descriptive Geography, for the Use of Junior Classes; including a MAP OF CANAAN and PALESTINE, with GENERAL INDEX. 8vo, half-bound, 5s.

Keith Johnston's School Atlases—OPINIONS OF THE PRESS.

"They are as superior to all School Atlases within our knowledge, as were the larger works of the same Author in advance of those that preceded them."
—*Educational Times*.

"Decidedly the best School Atlases we have ever seen."—*English Journal of Education*.

" . . . The *Physical Atlas* seems to us particularly well executed. . . . The last generation had no such help to learning as is afforded in these excellent elementary Maps. The *Classical Atlas* is a great improvement on what has usually gone by that name; not only is it fuller, but in some cases it gives the same country more than once in different periods of time. Thus it approaches the special value of a historical atlas. . . . The *General Atlas* is wonderfully full and accurate for its scale. . . . Finally, the *Astronomical Atlas*, in which Mr Hind is responsible for the scientific accuracy of the maps, supplies an admitted educational want. No better companion to an elementary astronomical treatise could be found than this cheap and convenient collection of maps."—*Saturday Review*.

"The plan of these Atlases is admirable, and the excellence of the plan is rivalled by the beauty of the execution. . . . The best security for the accuracy and substantial value of a School Atlas is to have it from the hands of a man like our Author, who has perfected his skill by the execution of much larger works, and gained a character which he will be careful not to jeopardise by attaching his name to anything that is crude, slovenly, or superficial."—*Scotsman*.

Keith Johnston's Hand Atlases.

Being the Maps of the School Atlases on Large and Thick Paper, bound in half-morocco. Imperial quarto, 25s. each,—viz.,

General and Descriptive Geography.

Physical Geography.

Astronomy.

Classical Geography.

Keith Johnston's Tourists' Maps.

(From the Royal Atlas), each with Index, in cloth case for the pocket :—

Scotland, two sheets,	£0	7	6
Italy, two sheets,	0	8	0
Switzerland, one sheet,	0	4	6
The Shores of the Mediterranean, one sheet,	0	4	6
The Canadas, two sheets,	0	8	0
Austria, two sheets,	0	8	0
Prussia, one sheet,	0	4	6
America (U.S.), two sheets,	0	8	0
America (South), two sheets,	0	8	0
Australia, one sheet,	0	4	6
Belgium and the Netherlands, one sheet,	0	4	6
China and Japan, one sheet,	0	4	6
England, two sheets,	0	8	0
India, two sheets,	0	8	0
Ireland, one sheet,	0	4	6
Palestine, one sheet,	0	4	6
Spain and Portugal, one sheet,	0	4	6
Sweden and Norway, one sheet,	0	4	6

Map of Europe.

By **A. Keith Johnston, F.R.S.E., F.R.G.S.**, Geographer to the Queen. The Map is fully coloured, and measures 4 feet 2 inches by 3 feet 5 inches. Price, mounted on Cloth and Mahogany Roller, varnished, 25s., or Folded in Quarto in a handsome Cloth Case, 2rs.

Index Geographicus :

Being a List, Alphabetically arranged, of the Principal Places on the Globe, with the Countries and Subdivisions of the Countries in which they are situated, and their Latitudes and Longitudes. Compiled specially with reference to Keith Johnston's Royal Atlas, but applicable to all Modern Atlases and Maps. In 1 vol. Imperial 8vo, pp. 676, 2rs.

Notes on North America :

Agricultural, Economical, and Social. By **Professor J. F. W. Johnston.** 2 vols. post 8vo, 2rs.

"Professor Johnston's admirable Notes. . . . The very best manual for intelligent emigrants, whilst to the British agriculturist and general reader it conveys a more complete conception of the condition of these prosperous regions than all that has hitherto been written."—*Economist.*

The Chemistry of Common Life.

By **Professor J. F. W. Johnston.** With 113 Illustrations on Wood, and a Copious Index. 2 vols. crown 8vo, 1rs. 6d.

"It is just one of those books which will best serve to show men how minute is the provision which has been made for human support, and that if the laws prescribed by Nature are duly observed, she, on her part, will see to it that her functions are performed with fidelity and success."—*Durham Chronicle.*

Professor Johnston's Elements of Agricultural

Chemistry and Geology. A New Edition, revised and brought down to the Present Time. By **G. T. Atkinson, B.A., F.C.S.** Fcap., 6s. 6d.

Professor Johnston's Catechism of Agricultural

Chemistry. A New Edition. Edited by **Professor Voelcker.** With Engravings. 1s.

Ex Eremito :

Poems chiefly written in India. By **H. G. Keene.** Crown 8vo, 6s.

The Invasion of the Crimea :

Its Origin, and an Account of its Progress down to the Death of Lord Raglan. By **Alexander William Kinglake.** Vols. I. and II., 32s., and Vols. III. and IV., 34s. Vol. V., Inkerman volume, 17s.

John Knox's Liturgy:

THE BOOK OF COMMON ORDER, AND THE DIRECTORY FOR PUBLIC WORSHIP OF THE CHURCH OF SCOTLAND. With Historical Introductions and Illustrative Notes by the **Rev. George W. Sprott, B.A.**, and the **Rev. Thomas Leishman, D.D.** Handsomely printed, in imitation of the large editions of Andro Hart, on toned paper, bound in cloth, red edges, 8s. 6d.

"We heartily recommend Mr Sprott's Introduction to the 'Book of Common Order' to every one who wishes honestly to get the truth, and the whole truth, about the history, so far as Scotland is concerned, concerning a devotional formulary which has had so curious a destiny. This Introduction is full of learning, used with a candour that deserves all honour. In reading it we cannot find whether the author is a supporter or an opponent of a formulary of worship—he has undertaken the history of one book of that kind, and he tells it fairly out."—*Scotsman*.

On Primary Instruction in Relation to Education.

By **Simon S. Laurie, A.M.**; Author of 'Philosophy of Ethics, &c. Crown 8vo, 4s. 6d.

The Rural Economy of England, Scotland, and Ireland. By **Leonce de Lavergne**. Translated from the French. With Notes by a Scottish Farmer. In 8vo, 12s.

"One of the best works on the philosophy of agriculture and of agricultural political economy that has appeared."—*Spectator*.

Lectures on the History of the Church of Scotland,

FROM THE REFORMATION TO THE REVOLUTION SETTLEMENT. By the late **Very Rev. John Lee, D.D., LL.D.**, Principal of the University of Edinburgh. With Notes and Appendices from the Author's Papers. Edited by the **Rev. William Lee, D.D.** 2 vols. 8vo, 21s.

The Physiology of Common Life.

By **George H. Lewes**, Author of 'Sea-side Studies,' &c. Illustrated with numerous Engravings. 2 vols., 12s.

CONTENTS:—Hunger and Thirst—Food and Drink—Digestion and Indigestion—The Structure and Uses of the Blood—The Circulation—Respiration and Suffocation—Why we are warm, and how we keep so—Feeling and Thinking—The Mind and the Brain—Our Senses and Sensations—Sleep and Dreams—The Qualities we Inherit from our Parents—Life and Death.

Linda Tressel.

By the Author of 'Nina Balatka.' 2 vols. fcap. 8vo, 12s.

Doubles and Quits.

By **Laurence Lockhart**, late Captain 92d Highlanders. With Twelve Illustrations. In 2 vols. post 8vo, 21s.

Fair to See :

A Novel. By **Laurence W. M. Lockhart**, Author of 'Doubles and Quits.'
New Edition in 1 vol. post 8vo, 6s.

The Days of the Son of Man :

A HISTORY OF THE CHURCH IN THE TIME OF OUR LORD. By
William Lee, D.D. Crown 8vo, 6s. 6d.

"Deserves high commendation. First, for the reverent common-sense which characterises its judgments; next, for the extensive and careful reading of the best authorities of which it is the result; also, for its admirable arrangement and lucidity; and lastly, for the succinctness which, without any sacrifice of completeness, presents us with a full view of the ministry of our Lord, its conditions, characteristics, and results, in so small a compass. . . . As a manual for family and school use the book is, we think, the very best that has come under our notice."—*British Quarterly Review*.

History of the Rise and Progress of Freemasonry

In Scotland. By **David Murray Lyon**, one of the Grand Stewards of the Grand Lodge of Scotland; Honorary Corresponding Member of the "Verein Deutscher Friemaurer," Leipzig, &c. &c. In small quarto. Life of Andrew Melville. Containing Illustrations of the Ecclesiastical and Literary History of Scotland in the Sixteenth and Seventeenth Centuries. Crown 8vo, 6s.

History of the Progress and Suppression of the Reformation in Italy in the Sixteenth Century. Crown 8vo, 4s.

History of the Progress and Suppression of the Reformation in Spain in the Sixteenth Century. Crown 8vo, 3s. 6d.

Sermons, and Review of the 'Tales of My Landlord.' In 1 vol. crown 8vo, 6s.

Lectures on the Book of Esther. Fcap. 8vo, 5s.

The Book of the Garden.

By **Charles M'Intosh**, formerly Curator of the Royal Gardens of his Majesty the King of the Belgians, and lately of those of his Grace the Duke of Buccleuch, K.G., at Dalkeith Palace. In two large vols. royal 8vo, embellished with 1350 Engravings.

The work is divided into two great sections, each occupying a volume—the first comprising the formation, arrangement, and laying out of gardens, and the construction of garden buildings; the second treating of the theory and practice of horticulture. Sold separately—viz.:

VOL. I. ON THE FORMATION OF GARDENS AND CONSTRUCTION OF GARDEN EDIFICES. 776 pages, and 1073 Engravings, £2, 10s.

VOL. II. PRACTICAL GARDENING. 868 pages, and 279 Engravings, £1, 17s. 6d.

Studies in Roman Law.

With Comparative Views of the Laws of France, England, and Scotland. By **Lord Mackenzie**, one of the Judges of the Court of Session in Scotland. Second Edition, 8vo, 12s.

"We know not in the English language where else to look for a history of the Roman Law so clear, and at the same time so short. More improving reading, both for the general student and for the lawyer, we cannot well imagine; and there are few, even among learned professional men, who will not gather some novel information from Lord Mackenzie's simple pages."—*London Review*.

"This is, in many respects, one of the most interesting works that the legal press has issued in our time. . . . The explanation of the Roman Law, historical and expository—the 'Studies'—is admirably given, clear and simple, and yet very learned, and the whole work is conceived in a candid and liberal spirit, being, besides, distinguished by a calmness of tone eminently befitting the judicial pen."—*Law Magazine and Review*.

A Manual of Modern Geography,

Mathematical, Physical, and Political. By the **Rev. Alexander Mackay LL.D., F.R.G.S.** New and greatly Improved Edition. Crown 8vo, pp. 676, 7s. 6d.

This volume—the result of many years' unremitting application—is specially adapted for the use of Teachers, Advanced Classes, Candidates for the Civil Service, and proficient in geography generally.

Gems of German Poetry.

Translated by **Lady John Manners.** Small quarto, 3s. 6d.

Translations by Theodore Martin:

Goethe's Faust. Second Edition, crown 8vo, 6s. Cheap Edition, 3s. 6d.

The Odes of Horace. With Life and Notes. Second Edition, post 8vo, 9s.

Catullus. With Life and Notes. Post 8vo, 6s. 6d.

The Vita Nuova of Dante. With an Introduction and Notes. Second Edition, crown 8vo, 5s.

Alladin: A Dramatic Poem. By **Adam Oehlenschlaeger.** Fcap. 8vo, 5s.

Correggio: A Tragedy. By **Oehlenschlaeger.** With Notes. Fcap. 8vo, 3s.

King René's Daughter: A Danish Lyrical Drama. By **Henrik Hertz.** Second Edition, fcap., 2s. 6d.

The System of Field Manœuvres

Best adapted for Enabling our Troops to meet a Continental Army. Being the Wellington Prize Essay. By **Lieutenant F. Maurice,** Royal Artillery, Instructor of Tactics and Organisation, Royal Military College, Sandhurst. Third Edition. Crown 8vo, 5s.

"We are prepared to say that this brilliant and most readable treatise clearly sets forth the momentous issues, and points out the direction in which not only military chiefs but statesmen must go, if our army is to be brought up to that standard which will permit it to enter war on a level, in excellence at least, with contemporary armies."—*Spectator.*

"No work, English or foreign, has treated this subject (infantry tactics) better than the 'Wellington Prize Essay.'"—*Times.*

"Lieutenant Maurice may well claim credit for having built up a work of such living interest as his is, even to the layman, upon such a set of dry bones as the given thesis afforded."—*The Saturday Review.*

Journal of the Waterloo Campaign:

Kept throughout the Campaign of 1815. By **General Cavalie Mercer,** Commanding the 9th Brigade Royal Artillery. 2 vols. post 8vo, 21s.

"No actor in the terrible scene ushered in by the following day has ever painted it in more vivid colours than the officer of artillery who led his troop into the very heart of the carnage, and escaped to write a book more real, more lifelike, more enthralling, than any tale of war it has ever been our lot to read."—*Athenæum.*

Maxims of Sir Morgan O'Doherty, Bart.

Originally published in Blackwood's Magazine. Cloth, 1s.

The Life and Labours of the Apostle Paul.

A continuous Narrative for School and Bible Classes. By **Charles Michie, M.A.**, Author of an 'Outline of the Geography of Palestine.' 1s., with a Map.

A Manual of English Prose Literature,

Biographical and Critical: designed mainly to show Characteristics of Style. By **W. Minto, M.A.** Crown 8vo, 10s. 6d.

Characteristics of English Poets, from Chaucer to

Shirley. By **Wm. Minto, M.A.** In crown 8vo, 9s.

"This volume shows not only a great deal of reading, but judgment and taste."—*Saturday Review.*

"Mr Minto's theme is a wide one, but he has treated it with terseness and ability. . . . It is seldom that we meet with a volume of poetical criticism so thoughtful and suggestive."—*Fall Mail Gazette.*

Biographies of Eminent Soldiers of the last Four

Centuries. By **Major-General John Mitchell**, Author of 'Life of Wallenstein,' 'The Fall of Napoleon,' &c. Edited, with a Memoir of the Author, by **Leonhard Schmitz, LL.D.** 8vo, 9s.

Poetical Works of D. M. Moir (Delta).

With Memoir by **Thomas Aird**, and Portrait. Second Edition. 2 vols. fcap. 8vo, 12s.

Domestic Verses. By *Delta.*

New Edition, fcap. 8vo, cloth gilt, 4s. 6d.

Lectures on the Poetical Literature of the Past

Half-Century. By **D. M. Moir.** Third Edition. Fcap. 8vo, 5s.

Memoir of Count De Montalembert.

A Chapter of Recent French History. By **Mrs Oliphant**, Author of the 'Life of Edward Irving,' &c. In 2 vols. crown 8vo, £1, 4s.

"Having a delightful subject, she has handled it in an altogether delightful way. . . . It is as good, full, and truthful a portrait of his life and character as could be desired, and while the skill of the author makes it as interesting as a novel, it may be read as an altogether trustworthy 'chapter of recent French history.'"—*Examiner.*

"In its delicacy, in its fine insight and sympathy, no less than in its eloquence, Mrs Oliphant's 'Life of Montalembert,' with all its faults, will take high rank among standard English biographies."—*The Nonconformist.*

The Wedderburns and their Work;

Or, the Sacred Poetry of the Scottish Reformation in its Historical Relation to that of Germany. By **Alexander F. Mitchell, D.D.**, Professor of Hebrew, St Andrews. Small quarto, 2s. 6d.

The Origin of the Seasons,

Considered from a Geological Point of View: showing the remarkable Disparities that exist between the Physical Geography and Natural Phenomena of the North and South Hemispheres. By **Samuel Mossman**. In crown 8vo, with Engravings, 10s. 6d.

A Geological Map of Europe,

Exhibiting the different Systems of Rocks according to the latest Researches, and from Inedited Materials. By **Sir R. I. Murchison, D.C.L., F.R.S., &c.**, Director-General of the Geological Survey of Great Britain and Ireland; and **James Nicol, F.R.S.E., F.G.S.**, Professor of Natural History in the University of Aberdeen. Constructed by Alex. Keith Johnston, F.R.S.E., &c., Geographer to the Queen, Author of the 'Physical Atlas,' &c. Scale $\frac{1}{300,000}$ of Nature, 76 miles to an inch. Four Sheets Imperial, beautifully printed in Colours. Size, 4 feet 2 inches by 3 feet 5 inches. In Sheets, £3, 3s.; in a Cloth Case, 4to, £3, 10s.

Manual of the Law of Insolvency and Bank-

ruptcy: Comprehending a Treatise on the Law of Insolvency, Notour Bankruptcy, Composition Contracts, Trust Deeds, Cessios, and Sequestrations; with Annotations on the various Insolvency and Bankruptcy Statutes; and with Forms of Procedure applicable to these subjects. By **James Murdoch**, Member of the Faculty of Procurators in Glasgow. Third Edition. 8vo, 16s.

Catalogue of the Coleoptera of Scotland.

By **Andrew Murray** of Conland, W.S., Member of the Royal Physical Society of Edinburgh, of the Entymological Society of France, &c. Fcap. 8vo, cloth limp, 2s. 6d.

A Glance at some of the Principles of Comparative

Philology. As illustrated in the Latin and Anglican Forms of Speech. By the **Hon. Lord Neaves**. Crown 8vo, 1s. 6d.

"Lord Neaves's remarks, as well as his very clear and well-ordered display of the principles of the science, characterised by great modesty and simplicity, well deserve attention."—*Pall Mall Gazette*.

The Uses of Leisure:

An Address delivered to the Students of the School of Arts, Edinburgh. By the **Hon. Lord Neaves**, President of the School. Sewed, 6d.

On Fiction as a Means of Popular Teaching.

A Lecture. By the Hon. Lord Neaves. 6d.

The New "Examen;"

Or, An Inquiry into the Evidence of certain Passages in Macaulay's 'History of England' concerning the Duke of Marlborough, the Massacre of Glencoe, the Highlands of Scotland, Viscount Dundee, William Penn. By John Paget, Esq., Barrister-at-Law. In crown 8vo, 6s.

A Manual of Zoology,

For the Use of Students. With a General Introduction on the Principles of Zoology. By Henry Alleyne Nicholson, M.D., F.R.S.E., F.G.S., &c., Professor of Natural History in the University of Toronto. Third Edition. Crown 8vo, pp. 706, with 280 Engravings on Wood, 12s. 6d.

"It is the best manual of zoology yet published, not merely in England, but in Europe."—*Pall Mall Gazette*, July 20, 1871.

"The best treatise on Zoology in moderate compass that we possess."—*Lancet*, May 18, 1872.

BY THE SAME AUTHOR.

Elementary Text-Book of Zoology for Schools. Second Edition. Crown 8vo, 2s. 6d.

Advanced Text-Book of Zoology. Crown 8vo, 6s.

Introduction to the Study of Biology.

By Henry Alleyne Nicholson, M.D., &c. Crown 8vo, with numerous Engravings, 5s.

"Admirably written and fairly illustrated, and brings within the compass of 160 pages the record of investigations and discoveries scattered over as many volumes. Seldom indeed do we find such subjects treated in a style at once so popular and yet so minutely accurate in scientific detail."—*Scotsman*.

A Manual of Palaeontology,

For the Use of Students. By Henry Alleyne Nicholson, M.D., &c. Crown 8vo, with upwards of 400 Engravings, 15s.

Nina Balatka :

The Story of a Maiden of Prague. In 2 vols. small 8vo, 10s. 6d. cloth.

Piccadilly :

A Fragment of Contemporary Biography. By Laurence Oliphant. With Eight Illustrations by Richard Doyle. 4th Edition, 6s.

"The picture of 'Good Society'—meaning thereby the society of men and women of wealth or rank—contained in this book, constitutes its chief merit, and is remarkable for the point and vigour of the author's style."—*Athenaeum*.

"The real interest of 'Piccadilly' lies in the clever *morceaux* with which it is literally jewelled. They sparkle in every page. Mr Oliphant is one of the wittiest Jeremiahs of his time."—*Pall Mall Gazette*.

Narrative of Lord Elgin's Mission to China and

Japan. By **Laurence Oliphant**, Private Secretary to Lord Elgin. Illustrated with numerous Engravings in Chromo-Lithography, Maps, and Engravings on Wood, from Original Drawings and Photographs. Second Edition. In two vols. 8vo, 21s.

"The volumes in which Mr Oliphant has related these transactions will be read with the strongest interest now, and deserve to retain a permanent place in the literary and historical annals of our time."—*Edinburgh Review*.

Russian Shores of the Black Sea in the Autumn

of 1852, with a Voyage down the Volga and a Tour through the Country of the Don Cossacks. By **Laurence Oliphant**. 8vo, with Map and other Illustrations. Fourth Edition, 14s.

The Transcaucasian Campaign of the Turkish

Army under Omer Pasha: A Personal Narrative. By **Laurence Oliphant**. With Map and Illustrations. Post 8vo, 10s. 6d.

Patriots and Filibusters;

or, Incidents of Political and Exploratory Travel. By **Laurence Oliphant**. Crown 8vo, 5s.

Historical Sketches of the Reign of George Second.

By **Mrs Oliphant**. Second Edition, in one vol., 10s. 6d.

"Her aim has simply been, by means of judicious selection and careful and sympathetic painting, to form a portrait-gallery which shall illustrate the characters of a given age. We think that she has been, on the whole, very successful."—*Saturday Review*.

"Mrs Oliphant's Historical Sketches form two attractive volumes whose contents are happily arranged so as to bring out some of the salient points at a period in our social history richly illustrated by epistolary and biographical remains."—*Examiner*.

The Story of Valentine; and his Brother.

By **Mrs Oliphant**. 3 vols. post 8vo, £1, 5s. 6d.

John: A Love Story.

By **Mrs Oliphant**. 2 vols. post 8vo, 21s.

Brownlows.

By **Mrs Oliphant**. 3 vols. post 8vo, 31s. 6d.

The Athelings:

Or, The Three Gifts. By **Mrs Oliphant**. 3 vols. post 8vo, 31s. 6d.

Zaidee: A Romance.

By **Mrs Oliphant**. 3 vols. post 8vo, 31s. 6d.

Katie Stewart: A True Story.

By Mrs Oliphant. Fcap. 8vo, illustrated boards, 2s. 6d.

"A singularly characteristic Scottish story, most agreeable to read and pleasant to recollect. The charm lies in the faithful and lifelike pictures it presents of Scottish character and customs, and manners and modes of life."—*Tait's Magazine*.

Chronicles of Carlingford.

By Mrs Oliphant.

Salem Chapel. 2s. in boards, or 2s. 6d. cloth.

The Perpetual Curate. 2s. in boards, or 2s. 6d. cloth.

Miss Marjoribanks. 2s. in boards, or 2s. 6d. cloth.

The Rector and the Doctor's Family. 1s. sewed, or 1s. 6d. cloth.

Modern Practical Cookery,

PASTRY, CONFECTIONERY, PICKLING, AND PRESERVING, WITH A GREAT VARIETY OF USEFUL RECEIPTS. By Mrs Nourse. Fcap. 8vo, boards, 5s. 6d.

Narratives of Voyage and Adventure.

By Sherard Osborn, C.B., Captain Royal Navy. 3 vols. crown 8vo, 17s. 6d., or separately:—

Stray Leaves from an Arctic Journal;

or, Eighteen Months in the Polar Regions in Search of Sir John Franklin's Expedition in 1850-51. To which is added the Career, Last Voyage, and Fate of Captain Sir John Franklin. New Edition, crown 8vo, 5s.

The Discovery of a North-West Passage by H.M.S. Investigator,

During the years 1850-51-52-53-54. Edited from the Logs and Journals of CAPTAIN ROBERT C. M'CLURE. Fourth Edition, crown 8vo, 5s.

Quedah; a Cruise in Japanese Waters; and, *The Fight on the Peiho.* New Edition, crown 8vo, 7s. 6d.

The Poems of Ossian

In the Original Gaelic. With a Literal Translation into English, and a Dissertation on the Authenticity of the Poems. By the Rev. Archibald Clerk. 2 vols. imperial 8vo, £1, 11s. 6d.

"The most thoughtful and able book in connection with Celtic literature that has appeared for a long time."—*Perthshire Journal*.

"We feel assured that the present work, by the well-condensed information it contains, by the honest translation of the Gaelic it gives, by the mere weight of its fair statements of fact, will do more to vindicate the authenticity of Caledonia's Bard from the pompous ignorance of Johnson, the envious spite of Pinkerton, the cold incredulity of Laing, and even the self-asserting vanity of Macpherson, than any champion that has yet appeared."—*Glasgow Mail*.

The Conquest of Scinde.

A Commentary. By General Sir James Outram, C.B. 8vo, 18s.

The Metamorphoses of Ovid.

Translated in English Blank Verse. By **Henry King, M.A.**, Fellow of Wadham College, Oxford, and of the Inner Temple, Barrister-at-Law. Crown 8vo, 10s. 6d.

"Turning to Mr King's version of the poet's *Metamorphoses*, we have very much to say in its praise. He has given us by far the most elegant and trustworthy version of the *Metamorphoses* in the English language. . . . Cordially do we commend this version of Ovid's *Metamorphoses* to our readers as by far the best and purest in our language."—*Graphic*.

"An excellent translation."—*Athenæum*.

"The execution is admirable. . . . It is but scant and inadequate praise to say of it that it is the best translation of the *Metamorphoses* which we have."—*Observer*.

Our Domesticated Dogs :

Their Treatment in Reference to Food, Diseases, Habits, Punishment, Accomplishments, &c. By the Author of 'The Handy Horse-Book.' 2s. 6d. bound in gilt cloth.

"How frequently do we hear ladies complain that just when their favourites come to know and love them, 'they are sure to die.' If instead of constantly cramming them with unwholesome food, they would follow the directions given in the pages before us, not only would the mortality be less, but the appearance and even the dispositions of their pets would be marvellously improved."—*Land and Water*.

Highway Law :

A Manual for the Use of Waywardens, Clerks, and Surveyors; to which are added Notes, Forms, Cases, and Statute; Hints as to Road-making, and a Complete System of the Accounts necessary to be kept. By **Hiram A. Owston**, Author of 'The Highway Act, 1862: Its Objects and Uses,' &c. Crown 8vo, 7s. 6d.

Introductory Text-Book of Geology.

By **David Page, LL.D.**, Professor of Geology in the Durham University of Physical Science, Newcastle. With Engravings on Wood and Glossarial Index. Tenth Edition. 2s. 6d.

Advanced Text-Book of Geology,

Descriptive and Industrial. By **David Page, LL.D.** With Engravings and Glossary of Scientific Terms. Fifth Edition, Revised and Enlarged. 7s. 6d.

Economic Geology; or, Geology in its Relations to

the Arts and Manufactures. By **David Page, LL.D., F.G.S.**, &c. With Engravings and Geological Map of the British Islands. Crown 8vo, 7s. 6d.

Handbook of Terms in Geology and Physical Geography.

By the Same. Second Edition, 7s. 6d.

Geology for General Readers.

A Series of Popular Sketches in Geology and Palaeontology. By David Page, LL.D. Third Edition, enlarged, 6s.

"This is one of the best of Mr Page's many good books. It is written in a flowing popular style. Without illustration or any extraneous aid, the narrative must prove attractive to any intelligent reader."—*Geological Magazine*.

Chips and Chapters.

A Book for Amateurs and Young Geologists. By David Page, LL.D. 5s.

The Past and Present Life of the Globe.

With numerous Illustrations. By David Page, LL.D. Crown 8vo, 6s

The Crust of the Earth:

A Handy Outline of Geology. By David Page, LL.D. Sixth Edition, 1s.

Introductory Text-Book of Physical Geography.

With Sketch-Maps and Illustrations. By David Page, LL.D. Sixth Edition, 2s. 6d.

Advanced Text-Book of Physical Geography

By David Page, LL.D. Second Edition, with Engravings. 5s.

"A thoroughly good Text-Book of Physical Geography."—*Saturday Review*.

Spindrift.

By Sir J. Noel Paton. Fcap., cloth, 5s.

Poems by a Painter.

By Sir J. Noel Paton. Fcap., cloth, 5s.

An Essay on the National Character of the

Athenians. By John Brown Patterson. Edited from the Author's revision, by Professor Pillans, of the University of Edinburgh. With a Sketch of his Life. Crown 8vo, 4s. 6d.

Essays in History and Art.

By R. H. Patterson. 8vo, 12s.

"A volume which no discerning reader will open only once. Fine appreciative taste, and original observation, are found united with range of thought and rare command over the powers of the English language."—*Athenæum*.

The Science of Finance.

A Practical Treatise. By R. H. Patterson, Member of the Society of Political Economy of Paris, Author of 'The Economy of Capital,' &c Crown 8vo, 14s.

The Economy of Capital;

or, Gold and Trade. By **R. H. Patterson**, Author of 'The New Revolution,' &c. 12s., cloth.

It displays throughout a thorough acquaintance with our Monetary System, and is written in the lucid and graceful style which distinguishes Mr Patterson's works."—*Morning Post*.

"A very brilliant chapter of Mr Patterson's volume is devoted to the City, and to the business carried on therein. . . . We feel almost as if we heard the roar of the ceaseless traffic, and joined in the restless activity, as we read Mr Patterson's descriptions."—*The British Quarterly Review*.

Analysis and Critical Interpretation of the Hebrew

Text of the Book of Genesis. Preceded by a Hebrew Grammar, and Disquisitions on the Genuineness of the Pentateuch, and on the Structure of the Hebrew Language. By the **Rev. William Paul, A.M.** 8vo, 18s.

Egypt, the Soudan, and Central Africa.

With Explorations from Khartoum on the White Nile to the Regions of the Equator. By **John Petherick, F.R.G.S.**, Her Britannic Majesty's Consul for the Soudan. In 8vo, with a Map, 16s.

The Handy-Book of Bees,

AND THEIR PROFITABLE MANAGEMENT. By **A. Pettigrew**, Rusholme, Manchester. Crown 8vo, 4s. 6d.

"The author of this volume is evidently a practical man, and knows a great deal more about bees and their habits than most of the bee-keepers in England; indeed he may be said to be a very master in the art of bee mysteries."—*Bell's Life in London*.

Poems. By Isa.

Fcap. 8vo, cloth, 4s. 6d.

The Course of Time: A Poem.

By **Robert Pollok, A.M.** Small fcap. 8vo, cloth, gilt, 2s. 6d.

THE COTTAGE EDITION, 32mo, sewed, 1s. The Same, cloth, gilt edges, 1s. 6d. Another Edition, with Illustrations by Birket Foster and others. fcap. gilt cloth, 3s. 6d., or with edges gilt, 4s.

An Illustrated Edition of the Course of Time.

The Illustrations by Birket Foster, Tenniel, and Clayton. In large 8vo, bound in cloth, richly gilt, 21s.

"Of deep and hallowed impress, full of noble thoughts and graphic conceptions—the production of a mind alive to the great relations of being, and the sublime simplicity of our religion."—*Blackwood's Magazine*.

The Port Royal Logic.

Translated from the French: with Introduction, Notes, and Appendix. By Thomas Spencer Baynes, LL.B., Professor in the University of St Andrews; Author of 'An Essay on the New Analytic of Logical Forms.' Seventh Edition, 1amo, 4s.

"Through his excellent translation of the Port Royal, his introduction and notes, Professor Baynes has rendered good service to logical studies in this country; for if the student desires to understand something of the *rationale* of the rules laid down in ordinary texts, he could not have recourse to a better work."—*London Quarterly Review*.

On the Priory of Inchmahome:

NOTES, HISTORICAL AND DESCRIPTIVE; with Introductory Verses, and an Appendix of Original Papers. By the Rev. Wm. M'Gregor Stirling. 4to, with Plates, 31s. 6d.

Collection of Public General Statutes Affecting

Scotland. Containing a Table of all the Public General Statutes, the Statutes affecting Scotland being printed entire, with a GENERAL INDEX, and Tables of all the General, Local, and Private Acts.

The Volumes are supplied at the following prices:—11° & 12° VICTORIÆ, 1848, 8vo., cloth boards, 5s.; 1849, 2s. 6d.; 1850, 5s. 6d.; 1851, 2s. 6d.; 1852, 2s. 6d.; 1853, 7s.; 1854, 4s. 6d.; 1855, 6s.; 1856, 6s. 6d.; 1857, 5s. 6d.; 1858, 5s.; 1859, 3s. 6d.; 1860, 10s.; 1861, 6s.; 1862, 9s. 6d.; 1863, 6s.; 1864, 5s.; 1865, 4s.; 1866, 5s.; 1867, 9s.; 1868, 10s. 6d.; 1869, with General Index to all the Public Acts of Parliament relating to Scotland, 1800 to 1868, 9s. 6d.; 1870, 8s.; 1871, 8s.; 1872, 9s.; 1873, 6s. 6d.

The Public Schools:

Winchester—Westminster—Shrewsbury—Harrow—Rugby. Notes of their History and Traditions. By the Author of 'Etoniana.' Crown 8vo, 8s. 6d.

"In continuation of the delightful volume about Eton, we have here, by the same author, a volume of gossip as delightful concerning five other public schools. Neither volume professes to be history, but it is history of the best sort."—*Pall Mall Gazette*.

Two Lectures on the Genius of Handel,

AND THE DISTINCTIVE CHARACTER OF HIS SACRED COMPOSITIONS. Delivered to the Members of the Edinburgh Philosophical Institution. By the Very Rev. Dean Ramsay, Author of 'Reminiscences of Scottish Life and Character.' In Crown 8vo, 3s. 6d.

An Historical View of the Law of Maritime

Commerce. By James Reddie, Esq., Advocate. 8vo, 14s.

The Life of Carl Ritter.

Late Professor of Geography in the University of Berlin. By W. L. Gage. Crown 8vo, 7s. 6d.

Life of the late Rev. James Robertson, D.D.,

F.R.S.E., Professor of Divinity and Ecclesiastical History in the University of Edinburgh. By **Professor Charteris**. With Portrait. 8vo, ros. 6d.

"This is a beautiful record of the life of a true man. . . . Mr Charteris has discharged the duty of biographer with fidelity and candour, with rare good taste, and an affectionate reverence. The memoir is worthy of its subject, and supplies one of the most interesting biographies which has seen the light for many a day."—*Aberdeen Free Press*.

The Geology of Pennsylvania :

A Government Survey; with a General View of the Geology of the United States, Essays on the Coal Formation and its Fossils, and a Description of the Coal-Fields of North America and Great Britain. By **Professor Henry Darwin Rogers, F.R.S., F.G.S.**, Professor of Natural History in the University of Glasgow. With Seven large Maps, and numerous Illustrations engraved on Copper and on Wood. In Three Volumes, Royal 4to, £8, 8s.

A Visit to the Cities and Camps of the Con-

federate States. By **Fitzgerald Ross**, Captain of Hussars in the Imperial Austrian Service. Crown 8vo, 7s. 6d.

The War for the Rhine Frontier, 1870 :

Its Political and Military History. By **Col. W. Rustow**, translated from the German, by **John Layland Needham**, Lieutenant R.M. Artillery. 3 vols. 8vo, with Maps and Plans, £1, 11s. 6d.

"Colonel Rustow is already well known as an able military writer, and the present work cannot fail to increase his reputation. . . . He has given to the world a valuable book; and we honour him for his evident desire to be just. The military merits of the book are great; and the reader derives much advantage from the numerous maps interspersed throughout the three volumes. As to the translator, he has performed his task in a thoroughly satisfactory and highly creditable manner."—*Athenæum*.

"The work is faithfully and intelligibly executed; and it is of importance that the work of one who was once himself a Prussian Officer, and who is confessedly one of the first military critics of the day, should be placed ready at hand for the perusal and consultation of that great mass of Englishmen who do not read German works in the original."—*Saturday Review*.

The St Andrews University Calendar.

Published yearly, price 1s. 6d.

Lord St Leonards' Handy Book on Property

Law. Eighth Edition. Revised and Enlarged, 5s.

"Seven large editions indicate the popularity which this admirable manual has obtained, not merely with the profession but with the public. It should be made a text-book in schools. It gives just as much of the law as every man ought to know, conveyed in a manner which every man can understand. This new edition has been considerably enlarged by the venerable author."—*Law Times*.

The Great Governing Families of England.

By **J. Langton Sandford** and **Merodith Townsend**. 2 vols., 8vo, 15s., in extra binding, with richly-gilt cover.

"In the 'Great Governing Families of England' we have a really meritorious compilation. The spirit in which it is conceived, the care expended on the collection and arrangement of the material out of which the various memoirs are fashioned, and the vigorous and sometimes picturesque statement which relieves the drier narrative portions, place it high above the ordinary range of biographical reference books."—*Fortnightly Review*.

"Some of these sketches, of these family pictures, are admirably done, none of them are otherwise than well done. Anecdote and comment serve to relieve or explain the narrative of incidents. The book is, in its kind, a thoroughly satisfactory book, showing research, thought, and decision."—*Westminster Review*.

St Stephens;

Or, Illustrations of Parliamentary Oratory. A Poem. *Comprising*—Pym—Vane—Strafford—Halifax—Shaftesbury—St John—Sir R. Walpole—Chesterfield—Carteret—Chatham—Pitt—Fox—Burke—Sheridan—Wilberforce—Wyndham—Conway—Castlereagh—William Lamb (Lord Melbourne)—Tierney—Lord Gray—O'Connell—Plunkett—Shiel—Follett—Macaulay—Peel. Second Edition. Crown 8vo, 5s.

Lectures on the History of Literature.

Ancient and Modern. By **Frederick Schlegel**. Translated by **J. G. Lockhart**. Fcap., 5s.

Physiology at the Farm.

In Aid of Rearing and Feeding the Live Stock. By **William Sellar**, M.D., F.R.S.E., Fellow of the Royal College of Physicians, Edinburgh, formerly Lecturer on Materia Medica and Dietetics; and **Henry Stephens**, F.R.S.E., Author of the 'Book of the Farm,' &c. Post 8vo, with Engravings, 16s.

The Passion Play in the Highlands of Bavaria.

By **Alexander Craig Sellar**. Third Edition. Fcap., sewed, 1s.

A Treatise upon Breeding, Rearing, and Feeding,

Cheviot and Black-faced Sheep in High Districts. By a **Lammermoor Farmer**. Crown 8vo, cloth, 2s. 6d.

Traverse Tables to Five Places,

FOR EVERY 2' OF ANGLE UP TO 100 OF DISTANCE, By **Robert Shortrede**, F.R.A.S. Edited by **Edward Sang**, F.R.S.E. 8vo, 21s.

French Home Life.

Contents:—SERVANTS.—CHILDREN.—FURNITURE.—FOOD.—MANNERS.
—LANGUAGE.—DRESS.—MARRIAGE. In Octavo, 10s. 6d.

Italian Irrigation:

A Report on the Agricultural Canals of Piedmont and Lombardy, addressed to the Hon. the Directors of the East India Company; WITH AN APPENDIX, containing a Sketch of the Irrigation System of Northern and Central India. By *Lieut.-Col. E. Baird Smith, F.G.S., Captain, Bengal Engineers.* Second Edition. 2 vols. 8vo, with Atlas in folio, 30s.

Legends, Lyrics, and other Poems.

By *B. Simmons.* Fcap. 8vo, 7s. 6d.

Paris after Waterloo.

A Revised Edition of a "Visit to Flanders and the Field of Waterloo." By *James Simpson, Advocate.* With Two coloured Plans of the Battle. Crown 8vo, 5s.

Poems, Songs, and Ballads.

By *James Smith.* Third Edition. 5s.

"The collection is certainly a rich and remarkable one, containing many specimens of finely pathetic and descriptive verse, imbued with the true spirit of poetry and song."—*Scotsman.*

"A most meritorious and enjoyable volume."—*Courant.*

Thorndale; or, the Conflict of Opinions.

By *William Smith, Author of "A Discourse on Ethics," &c.* Second Edition. Crown 8vo, 10s. 6d.

"Mr Smith has read deeply and accurately into human nature, in all its weaknesses, fancies, hopes, and fears. It is long since we have met with a more remarkable or worthy book. . . . We know few works in which there may be found so many fine thoughts, light-bringing illustrations, and happy turns of expression, to invite the reader's pencil."—*Fraser's Magazine.*

Gravenhurst; or, Thoughts on Good and Evil.

By *William Smith, Author of 'Thorndale,' &c.* Crown 8vo, 7s. 6d

"One of those rare books which, being filled with noble and beautiful thoughts, deserves an attentive and thoughtful perusal."—*Westminster Review.*

"Our space will only allow us to mention, in passing, the charming volume of subtle thought expressed in a graceful transparent style, which the author of 'Thorndale' has just issued under the title of 'Gravenhurst; or, Thoughts on Good and Evil.' . . . We will simply recommend every reader, fond of thoughtful writing on the moral aspects of life, to carry 'Gravenhurst' with him into some delightful solitude."—*Cornhill Magazine.*

A Discourse on Ethics of the School of Paley.

By William Smith, Author of 'Thorndale.' 8vo, 4s.

Dramas by William Smith.

Author of 'Thorndale,' &c. 1. SIR WILLIAM CRICHTON. 2. ATHELWOLD. 3. GUIDONE. 24mo, boards, 3s.

Songs and Verses:

Social and Scientific. By an Old Contributor to 'Maga.' A New Edition, with Music of some of the Songs. Fcap. 8vo, 3s. 6d.

"The productions thrown off by this eccentric muse have all the merits of originality and variety. . . . He has written songs, not essays—such a hotch-potch of science and humour, jest and literature, gossip and criticism, as might have been served at the Noctes Ambrosianæ in the blue parlour at Ambrose's."—*Saturday Review*.

Poetical Works of Caroline Bowles Southey.

In 1 vol. fcap. 8vo, 5s.

"In one of those well-bound, neatly printed, toned paper editions, in turning out which our leading publishers so laudably vie with each other, Messrs Blackwood have gathered up the precious remains of Caroline Bowles Southey. We call them *precious* advisedly, because they illustrate a style of authorship which is somewhat out of date, and has been superseded by other styles neither so natural nor so attractive to cultivated tastes. Caroline Bowles was nursed, so to speak, in the school of nature, taught with all the fostering care of home influence, and allowed to ripen in intellect and fancy amidst the varied charms of a country life."—*The Churchman*.

"We do not remember any recent author whose poetry is so unmingledly native; and this English complexion constitutes one of its characteristic charms. No purer model of our genuine home feeling and language."—*Quarterly Review*.

The Birthday, and other Poems.

By Mrs Southey. Second Edition. 5s.

Chapters on Churchyards.

By Mrs Southey. Second Edition. Fcap. 8vo, 2s. 6d.

Robin Hood: a Fragment.

By the late Robert Southey and Caroline Southey. With other Fragments and Poems. Post 8vo, 8s.

What led to the Discovery of the Nile Source.

By John Hanning Speke, Captain H.M. Indian Army. 8vo, with Maps, &c., 14s.

"Will be read with peculiar interest, as it makes the record of his travels complete, and at the same time heightens, if possible, our admiration of his indomitable perseverance, as well as tact."—*Dispatch*.

Journal of the Discovery of the Source of the Nile.

By **J. H. Speke**, Captain H.M. Indian Army, 8vo, 21s. With a Map of Eastern Equatorial Africa by **CAPTAIN SPEKE**; numerous illustrations, chiefly from Drawings by **CAPTAIN GRANT**; and Portraits, engraved on Steel, of **CAPTAINS SPEKE and GRANT**.

"The volume which Captain Speke has presented to the world possesses more than a geographical interest. It is a monument of perseverance, courage, and temper displayed under difficulties which have perhaps never been equalled."—*Times*.

"Captain Speke has not written a noble book so much as he has done a noble deed. The volume which records his vast achievement is but the minor fact—the history of his discovery, not the discovery itself: yet even as a literary performance it is worthy of very high praise. It is wholly free from the traces of book manufacture. . . . It is, however, a great story that is thus plainly told; a story of which nearly all the interest lies in the strange facts related, and, more than all, in the crowning fact that it frees us in a large degree from a geographical puzzle which had excited the curiosity of mankind—of the most illustrious emperors and communities—from very early times."—*Athenæum*.

Villa Residences and Farm Architecture:

A Series of Designs. By **John Starforth**, Architect. 102 Engravings. Second Edition, medium 4to, £2, 17s. 6d.

The Statistical Account of Scotland.

Complete, with Index, 15 vols. 8vo, £16, 16s. Each County sold separately, with Title, Index, and Map, neatly bound in cloth, at the prices annexed, forming a very valuable Manual to the Landowner, the Tenant, the Manufacturer, the Naturalist, the Tourist, &c.

The Book of Farm-Buildings;

THEIR ARRANGEMENT AND CONSTRUCTION. By **Henry Stephens**, F.R.S.E., Author of 'The Book of the Farm;' and **Robert Scott Burn**. Illustrated with 1045 Plates and Engravings. In 1 vol., large 8vo, uniform with 'The Book of the Farm,' &c. £1, 11s. 6d.

The Book of the Farm,

Detailing the Labours of the Farmer, Farm-Steward, Ploughman, Shepherd, Hedger, Farm-Labourer, Field-Worker, and Cattleman. By **Henry Stephens, F.R.S.E.** Illustrated with Portraits of Animals painted from the life; and with 557 Engravings on Wood, representing the principal Field Operations, Implements, and animals treated of in the Work. A New and Revised Edition, the third, in great part Rewritten. 2 vols., large 8vo, £2, 10s.

"The best practical book I have ever met with."—*Professor Johnston.*

"We assure agricultural students that they will derive both pleasure and profit from a diligent perusal of this clear directory to rural labour. . . . We have thoroughly examined these volumes; but to give a full notice of their varied and valuable contents would occupy a larger space than we can conveniently devote to their discussion; we therefore, in general terms, commend them to the careful study of every young man who wishes to become a good practical farmer."—*Times.*

The Book of Farm Implements and Machines.

By **J. Slight** and **R. Scott Burn**, Engineers. Edited by **Henry Stephens, F.R.S.E.**, Author of 'The Book of the Farm,' &c. In 1 vol., large 8vo, uniform with 'The Book of the Farm,' £2, 2s.

Catechism of Practical Agriculture.

By **Henry Stephens, F.R.S.E.**, Author of 'The Book of the Farm.' With Engravings. 1s.

A Concise Hebrew Grammar;

with the Pronunciation, Syllabic Division and Tone of the Words, and Quantity of the Vowels. By the **Rev. Duncan Stewart, B.A.** 8vo, cloth, limp, 3s.

Advice to Purchasers of Horses.

By **John Stewart, V.S.** Author of 'Stable Economy.' 2s. 6d.

To the farmer, the sportsman, and all interested in obtaining a sound and well-conditioned animal, calculated either for work or pleasure, this work will be found to be eminently useful. It is the result of the experience of a first-rate authority on the subject.

Stable Economy.

A Treatise on the Management of Horses in relation to Stabling, Grooming, Feeding, Watering, and Working. By **John Stewart, V.S.** Seventh Edition, fcap. 8vo, 6s. 6d.

The Angler's Companion to the Rivers and

Lochs of Scotland. By **T. T. Stoddart.** With Map of the Fishing Streams and Lakes of Scotland. Second Edition. Crown 8vo, 3s. 6d.

Graffiti D'Italia.

By **W. W. Story**, Author of 'Roba di Roma.' Fcap. 8vo, 7s. 6d.

"As a sculptor's sketches in a kind of poetic neutral tint, they are of great value, quite apart from their intrinsic value as poems."—*Athenaeum*.

"In the present volume he has translated the marble for us into poetry. Goethe used to say that sculpture was the most poetical of all the arts. And in a certain high transcendental sense he is perfectly right. Those who are interested in the question should certainly study the Cleopatra of Story in marble, and the Cleopatra as we find her translated in the present volume into verse."—*Westminster Review*.

Etymological and Pronouncing Dictionary of the

English Language. Including a very Copious Selection of Scientific Terms. For Use in Schools and Colleges, and as a Book of General Reference. By the **Rev. James Stormonth**. The Pronunciation carefully Revised by the **Rev. P. H. Phelp, M.A.**, Cantab. Crown 8vo, pp. 755. 7s. 6d.

The School Etymological Dictionary and Word-

Book. Combining the advantages of an ordinary pronouncing School Dictionary and an Etymological Spelling-book. By the **Rev. James Stormonth**. Fcap. 8vo, pp. 254. 2s.

Lives of the Queens of Scotland,

AND ENGLISH PRINCESSES CONNECTED WITH THE REGAL SUCCESSION OF GREAT BRITAIN. By **Agnes Strickland**. With Portraits and Historical Vignettes. 8 vols. post 8vo, £4. 4s.

"Every step in Scotland is historical; the shades of the dead arise on every side; the very rocks breathe. Miss Strickland's talents as a writer, and turn of mind as an individual, in a peculiar manner fit her for painting a historical gallery of the most illustrious or dignified female characters in that land of chivalry and song."—*Blackwood's Magazine*.

Agricultural Labourers,

AS THEY WERE, ARE, AND SHOULD BE, IN THEIR SOCIAL CONDITION. By the **Rev. Harry Stuart, A.M.**, Minister of Oathlaw. 8vo, Second Edition, 1s.

Lake Victoria.

A Narrative of Explorations in Search of the Source of the Nile. Compiled from the Memoirs of Captains Speke and Grant. By **George C. Swayne, M.A.**, Late Fellow of Corpus Christi College, Oxford. Illustrated with Woodcuts and Map. Crown 8vo, 7s. 6d.

"Mr Swayne has admirably discharged his task, and has produced a very excellent and truly readable volume."—*Daily News*.

"The volume before us is a very readable one. We anticipate for it a wide popularity."—*London Review*.

Handbook of Hardy Herbaceous and Alpine

Flowers, FOR GENERAL GARDEN DECORATION. Containing Descriptions, in Plain Language, of upwards of 1000 Species of Ornamental Hardy Perennial and Alpine Plants, adapted to all classes of Flower-Gardens, Rockwork, and Waters; along with Concise and Plain Instructions for their Propagation and Culture. By **William Sutherland**, Gardener to the Earl of Minto; formerly Manager of the Herbaceous Department at Kew. Crown 8vo, 7s. 6d.

"This is an unpretending but valuable work, well adapted to furnish information respecting a class of plants certainly rising in popular estimation. . . . We cordially recommend his book to the notice of our readers, as likely to be, from a gardening point of view, the standard work on Herbaceous Plants."—*Gardeners' Chronicle*.

"The best book of its class available for English readers."—*Gardeners' Magazine*.

Lays of the Deer Forest.

With Sketches of Olden and Modern Deer-Hunting, &c. By **John Sobieski** and **Charles Edward Stuart**. 2 vols. post 8vo, 21s.

The Jerusalem Delivered of Torquato Tasso.

Translated by **Col. Alex. Cunningham Robertson**. Crown 8vo, 10s. 6d.

Tara: A Mahratta Tale.

By **Captain Meadows Taylor**. 3 vols. post 8vo, £1, 11s. 6d.

"A picture of Indian life which it is impossible not to admire. We have no hesitation in saying, that a more perfect knowledge of India is to be acquired from an attentive perusal and study of this work, than could be gleaned from a whole library."—*Press*.

The Greek Grammar of Thiersch.

Translated from the German, with brief Remarks. By **Sir Daniel K. Sandford, M.A.** Professor of Greek in the University of Glasgow. 8vo, 16s.

Hours of Christian Devotion.

Translated from the German of **A. Tholuck, D.D.**, Professor of Theology in the University of Halle, and Councillor of the Supreme Consistory, Prussia. By the **Rev. Robert Menzies, D.D.** With a Preface written for this Translation by the Author. Crown 8vo, 9s.

"To many of these meditations four or five great texts are prefixed, and the reader feels that the gentle pressure of a powerful hand has crushed these sacred fruits, and handed him the fragrant wine of the kingdom in a golden goblet. . . . The abundance and variety of the material furnished in this volume for quiet pondering render farther characterisation difficult. We are thankful for the introduction of this wise, thoughtful, helpful book in this dark, sad season."—*British Quarterly Review*.

Handy-Book of the Flower-Garden :

Being Practical Directions for the Propagation, Culture and Arrangement of Plants in Flower-Gardens all the year round. Embracing all classes of Gardens, from the largest to the smallest. With Engraved and Coloured Plans, illustrative of the various systems of Grouping in Beds and Borders. By **David Thomson**, Gardener to his Grace the Duke of Buccleuch, K.G., at Drumlanrig. A New and Enlarged Edition, crown 8vo, 7s. 6d.

"Its author is entitled to great praise for the simple and clear manner in which he has explained the cultural directions, which, if carefully complied with, will enable the non-professional floriculturist to grow plants as well as any gardener."—*Gardeners' Chronicle*.

A Practical Treatise on the Culture of the Pine-Apple. By **David Thomson**. 8vo, 5s.

"The name of the author, one of the very best gardeners in the British Islands, guarantees that this volume contains no directions that are not sound and tested by experience."—*Journal of Horticulture*.

"The best work extant upon this important subject."—*Gardeners' Magazine*.

A Practical Treatise on the Cultivation of the Grape-Vine. By **William Thomson**, formerly Gardener to his Grace the Duke of Buccleuch, K.G., Dalkeith Park. Seventh Edition, Enlarged, 8vo, 5s.

"We cannot too strongly recommend Mr Thomson's treatise as a thoroughly practical and sure guide to the cultivation of the vine."—*Journal of Horticulture*.

"We urge our readers to procure the work, and they will get so clear an insight into vine-growing that a vinery will become one of the necessities of existence."—*Field*.

A COMPANION VOLUME TO THE 'HANDY-BOOK OF THE FLOWER-GARDEN.'

The Handy-Book of Fruit Culture under Glass.

Being a series of Elaborate Practical Treatises on the cultivation and forcing of Pines, Vines, Peaches, Figs, Melons, Strawberries, and Cucumbers. With Engravings of hothouses, &c., most suitable for the cultivation of and forcing of these fruits. By **David Thomson**, author of 'Handy-Book of the Flower-Garden,' 'A Practical Treatise on the Culture of the Pine-Apple,' &c., in crown 8vo, with Engravings, 7s. 6d.

Introduction to Meteorology.

By **David P. Thomson, M.D.** Octavo, with Engravings, 10s

Notes on the Pecuniary Interests of Heirs of Entail.

With Calculations regarding such Interests in reference to the Acts of Parliament affecting Entails, and Tables showing the values of Liferent Interests. By **William Thomas Thomson**, Fellow of the Institute of Actuaries, Manager of the Standard Life Assurance Company. 8vo, 10s.

County Law, a Practical Treatise on the Functions,

Qualifications and Duties of County Officials, Lords-Lieutenants, and Conveners of Counties, Commissioners of Supply, Clerks of Supply, &c. &c. With special reference to the Acts of Parliament which they administer as members of Road Trusts, Prison Boards, Police Committees, Local Authorities, &c. By **John Comrie Thomson, Esq.**, in 1 vol.

[In the Press.]

Ralph Darnell. A Novel.

By **Captain Meadows Taylor**. 3 vols. post 8vo, £1, 11s. 6d.

The Company and the Crown.

By the **Hon. T. J. Hovell-Thurlow**. Second Edition, corrected and revised. 8vo, 7s. 6d.

"Those who wish to understand what our work actually is in India, and how it is being done, will find an abundant store of information, both about persons and things, in Mr Thurlow's interesting pages."—*Times*.

The Elegies of Albius Tibullus.

Translated into English Verse, with Life of the Poet, and Illustrative Notes. By **James Cranstoun, B.A.**, Author of a Translation of 'Catullus.' In crown 8vo, 6s. 6d.

"We may congratulate Mr Cranstoun on having occupied a place for which his poetical skill, no less than his manifest classical training and acquirements, abundantly fits him."—*Saturday Review*.

"He comes nearer the originals than any of his predecessors that we are acquainted with. . . . The notes are scholarly and really illustrative."—*Examiner*.

"By far the best of the few versions we have of this sweet and graceful poet."—*Standard*.

Tom Cringle's Log.

A New Edition, with Illustrations. Crown 8vo, 6s., or extra gilt, gilt edges, 7s. 6d.

"Everybody who has failed to read 'Tom Cringle's Log' should do so at once. The 'Quarterly Review' went so far as to say that the papers composing it, when it first appeared in 'Blackwood,' were the most brilliant series of the time, and that time one unrivalled for the number of famous magazinists existing in it. Coleridge says in his 'Table Talk' that the 'Log' is most excellent: and these verdicts have been ratified by generations of men and boys, and by the manifestation of Continental approval, which is shown by repeated translations. The engravings illustrating the present issue are excellent."—*Standard*.

The Buchanites from First to Last.

By **Joseph Train**. Fcap. 8vo, 4s.

Journal of Agriculture,

AND TRANSACTIONS OF THE HIGHLAND AND AGRICULTURAL SOCIETY OF SCOTLAND. Old Series, 1828 to 1843, 21 vols. bound in cloth, £3, 3s. New Series, 1843 to 1865, 22 vols., £4, 4s.

Rational Theology and Christian Philosophy in

England in the Seventeenth Century. By **Rev. John Tulloch, D.D.**, Senior Principal in the University of St Andrews; and one of Her Majesty's Chaplains in Ordinary in Scotland. Author of 'Leaders of the Reformation,' &c. 2 vols. 8vo, 28s.

Leaders of the Reformation:

LUTHER, CALVIN, LATIMER, and KNOX. By the **Rev. John Tulloch, D.D.**, Principal, and Primarius Professor of Theology, St Mary's College, St Andrews. Second Edition, Crown 8vo, 6s. 6d.

English Puritanism and its Leaders:

CROMWELL, MILTON, BAXTER, and BUNYAN. By the **Rev. John Tulloch, D.D.** Uniform with the 'Leaders of the Reformation.' 7s. 6d.

"It is a book which, from its style—firm and interesting, dispassionate and impartial, but yet warm with admiration—will be hailed for fireside reading in the families of the descendants of those Puritan men and their times."—*Eclectic Review.*

Theism.

The Witness of Reason and Nature to an All-Wise and Beneficial Creator. By the **Rev. John Tulloch, D.D.** 8vo, 10s. 6d.

"Dr Tulloch's Essays, in its masterly statement of the real nature and difficulties of the subject, its logical exactness in distinguishing the illustrative from the suggestive, its lucid arrangement of the argument, its simplicity of expression, is quite unequalled by any work we have seen on the subject."—*Christian Remembrancer.*

Transactions of the Highland and Agricultural

Society of Scotland. 1866-1871, 6 Nos., sewed, 4s. each; 1872 and 1873, cloth, 5s. each. *Continued annually.*

A Treatise upon Terrestrial Magnetism.

With numerous Charts, 8vo, 10s. 6d.

Tweed Salmon Reports, 1866.

Reports on the Natural History and Habits of Salmonoids in the Tweed, and its Tributaries. Published by authority of the Tweed Fishery Commissioners. Demy 8vo, 3s. 6d.

Narrative of a Journey through Syria and

Palestine. By **Lieut. Van de Velde.** 2 vols. 8vo, with Maps, &c., £1, 10s.

"He has contributed much to knowledge of the country, and the unction with which he speaks of the holy places which he has visited, will commend the book to the notice of all religious readers. His illustrations of Scripture are numerous and admirable."—*Daily News.*

The Æneid of Virgil.

Translated in English Blank Verse by G. K. Rickards, M.A., and Lord Ravensworth. 2 vols. fcap. 8vo, 10s.

"Mr Rickards has done good service to the non-classical public by the faithful and beautiful version of Virgil's Æneid now before us, and he has enhanced the boon by a preface of special value, as setting forth fairly and conclusively the respective merits of previous translations, and the special qualities of Virgil as a poet."—*Standard*.

"Lord Ravensworth's success and strength are to be found, not so much in his verbal force as in the Virgilian spirit which breathes throughout his lines. No English reader can well miss their poetical grace and vigour; no scholar will deem unfaithful the clean cut, decisive lines of this masterly version."—*Evening Standard*.

The Wonder Seeker,

Or the History of Charles Douglas. By M. Fraser Tytler, Author of 'Tales of the Great and Brave,' &c. A New Edition. Fcap., 3s. 6d.

Memoirs of the Confederate War for Independence

By HEROES VON BORCKE, lately Chief of Staff to General J. E. B. Stuart. 2 vols. post 8vo, with Map, 21s.

Works of Samuel Warren, D.C.L.

Library Edition.

The Diary of a late Physician. In 2 vols. fcap., 12s. Also an Illustrated Edition, in crown 8vo, handsomely printed, 7s. 6d.

Ten Thousand A-Year. Three vols. fcap., 18s.

Now and Then. Fcap., 6s.

Miscellanies. 2 vols. crown 8vo, 24s.

The Lily and the Bee. Fcap. 8vo, 5s.

Samuel Warren's Works.

People's Edition, 4 vols. crown 8vo, cloth, 18s. Or separately:—

Diary of a late Physician. 3s. 6d.

Ten Thousand A-Year. 5s.

Now and Then. Lily and Bee. Intellectual and Moral Development of the Present Age. 1 vol., 4s. 6d.

Essays, Critical, Imaginative, and Juridical. 1 vol., 5s.

The Moral, Social, and Professional Duties of

Attornies and Solicitors. By Samuel Warren, Esq., F.R.S., of the Inner Temple, Barrister-at-Law. Fcap. 8vo, 9s.

Essays Written for the Wellington Prize.

Selected for Publication, by His Grace's desire, from those specially mentioned by the Arbitrer. 8vo, 12s. 6d.

List of Authors.

- I. By Lieut. J. T. HILDYARD, 71st Highland Light Infantry.
- II. By Lieutenant STANIER WALLER, Royal Engineers.
- III. By Captain J. C. RUSSELL, 10th Royal Hussars.
- IV. By Colonel Sir GARNET J. WOLSELEY, C.B., K.C.M.G.
- V. By General J. R. CRAUFURD.
- VI. By Lieutenant C. COOPER KING, Royal Marine Artillery.

The Eighteen Christian Centuries.

By the **Rev. James White**, Author of 'The History of France.' Seventh Edition, post 8vo, with Index, 6s.

"He has seized the salient points—indeed, the governing incidents—in each century, and shown their received bearing as well on their own age as on the progress of the world. Vigorously and briefly, often by a single touch, has he marked the traits of leading men; when needful, he touches slightly their biographical career. The state of the country and of society, of arts and learning, and, more than all, of the modes of living, are graphically sketched, and, upon the whole, with more fulness than any other division."—*Spectator*.

History of France,

FROM THE EARLIEST TIMES. By the **Rev. James White**, Author of 'The Eighteen Christian Centuries.' Fifth Edition, post 8vo, with Index, 6s.

Archæological Sketches in Scotland—Kintyre.

By **Captain T. P. White, R.E.**, &c., of the Ordnance Survey. With 138 Illustrations. Folio, £2, 2s.

Through Burmah to Western China:

Being Notes of a Journey in 1863, to Establish the Practicability of a Trade-Route between the Irawaddi and the Yang-tse-Kiang. By **Clement Williams**, formerly Assistant-Surgeon in the 68th Light Infantry, and First Political Agent at Mandalay to the Chief-Commissioner of British Burmah. Crown 8vo, with Two Maps and Numerous Engravings, 6s.

The "Ever-Victorious Army."

A History of the Chinese Campaign under Lieut.-Col. C. G. Gordon, and of the Suppression of the Tai-ping Rebellion. By **Andrew Wilson, F.A.S.L.**, Author of 'England's Policy in China;' and formerly Editor of the 'China Mail.' In 8vo, with Maps, 15s.

"In addition to a good deal of information respecting China and its recent history, this volume contains an interesting account of a brilliant passage in the military career of an English officer of remarkable promise, and of the important results of his skill and heroism. . . . It brings out clearly the eminent qualities of Colonel Gordon, his intrepidity and resources as a military leader, his rare aptitude for a difficult command, his dauntless courage, calmness, and prudence, his lofty character and unsullied honour."—*Times*.

Works of Professor Wilson.

Edited by his Son-in-Law, Professor Ferrier. In Twelve Vols. Crown 8vo, £2, 8s.

The Noctes Ambrosianæ.

By Professor Wilson. With Notes and a Glossary. In Four Vols. Crown 8vo, 16s.

Recreations of Christopher North.

By Professor Wilson. In Two Vols. New Edition, with Portrait, 8s.

"Welcome, right welcome, Christopher North; we cordially greet thee in thy new dress, thou genial and hearty old man, whose 'Ambrosian nights' have so often in imagination transported us from solitude to the social circle, and whose vivid pictures of flood and fell, of loch and glen, have carried us in thought from the smoke, din, and pent-up opulence of London, to the rushing stream or tranquil tarn of those mountain-ranges," &c.—*Times*.

Essays, Critical and Imaginative.

By Professor Wilson. Four Vols. Crown 8vo, 16s.

Tales.

By Professor Wilson. Comprising 'The Lights and Shadows of Scottish Life;' 'The Trials of Margaret Lyndsay;' and 'The Foresters.' In One Vol. Crown 8vo, 4s., cloth. Cheap Edition. Fcap. 8vo, 2s. 6d.

Professor Wilson's Poems.

Containing the 'Isle of Palms,' the 'City of the Plague,' 'Unimore,' and other Poems. Complete Edition. Crown 8vo, 4s.

Homer and his Translators, and the Greek Drama.

By Professor Wilson. Crown 8vo, 4s.

Poems and Songs.

By David Wingate. In fcap. 8vo, 5s.

"It contains genuine poetic ore, poems which win for their author a place among Scotland's true sons of song, and such as any man in any country might rejoice to have written."—*London Review*.

"We are delighted to welcome into the brotherhood of real poets a countryman of Burns, and whose verse will go far to render the rougher Border Scottish a classic dialect in our literature."—*John Bull*.

Annie Weir, and other Poems.

By David Wingate. Fcap. 8vo, 5s.

Fortification :

For the Use of Officers in the Army, and Readers of Military History. By Lieut. H. Yule, Bengal Engineers. 8vo, with numerous Illustrations, 10s. 6d.

"An excellent manual: one of the best works of its class."—*British Army Despatch*.

Now complete, in 20 vols., 2s. 6d. each. Also in 10 vols., with calf or vellum backs, £2, 10s.

ANCIENT CLASSICS

FOR

ENGLISH READERS

BY VARIOUS AUTHORS.

EDITED BY

REV. W. LUCAS COLLINS, M.A.

Author of 'Etoniana,' 'The Public Schools,' &c

OPINIONS OF THE PRESS.

"We gladly avail ourselves of this opportunity to recommend the other volumes of this useful series, most of which are executed with discrimination and ability."—*Quarterly Review*.

"These Ancient Classics have, without an exception, a twofold value. They are rich in literary interest, and they are rich in social and historical interest. We not only have a faithful presentation of the stamp and quality of the literature which the master-minds of the classical world have bequeathed to the modern world, but we have a series of admirably vivid and graphic pictures of what life at Athens and Rome was. We are not merely taken back over a space of twenty centuries, and placed immediately under the shadow of the Acropolis, or in the very heart of the Forum, but we are at once brought behind the scenes of the old Roman and Athenian existence. As we see how the heroes of this 'new world which is the old' plotted, intrigued, and planned; how private ambition and political partisanship were dominant and active motives then as they are now; how the passions and the prejudices which reign supreme now reigned supreme then; above all, as we discover how completely many of what we may have been accustomed to consider our most essentially modern thoughts and sayings have been anticipated by the poets and orators, the philosophers and historians, who drank their inspiration by the banks of Ilissus or on the plains of Tiber, we are prompted to ask whether the advance of some twenty centuries has worked any great change in humanity, and whether, substituting the coat for the toga, the park for the Campus Martius, the Houses of Parliament for the Forum, Cicero might not have been a public man in London as well as an orator in Rome?"—*Morning Advertiser*.

"A series which has done, and is doing, so much towards spreading among Englishmen intelligent and appreciative views of the chief classical authors."—*Standard*.

"To sum up in a phrase our sincere and hearty commendation of one of the best serial publications we have ever examined, we may just say that to the student and the scholar, and to him who is neither scholar nor student, they are simply priceless as a means of acquiring and extending a familiar acquaintance with the great classic writers of Greece and Rome."—*Belfast Northern Whig*.

*List of the Volumes published.***I.—HOMER: THE ILIAD.**

By THE EDITOR.

"We can confidently recommend this first volume of 'Ancient Classics for English Readers' to all who have forgotten their Greek and desire to refresh their knowledge of Homer. As to those to whom the series is chiefly addressed, who have never learnt Greek at all, this little book gives them an opportunity which they had not before—an opportunity not only of remedying a want they must often have felt, but of remedying it by no patient and irksome toil, but by a few hours of pleasant reading."—*Times*.

II.—HOMER: THE ODYSSEY.

By THE EDITOR.

"Mr Collins has gone over the 'Odyssey' with loving hands, and he tells its eternally fresh story so admirably, and picks out the best passages so skilfully, that he gives us a charming volume. In the 'Odyssey,' as treated by Mr Collins, we have a story-book that might charm a child or amuse and instruct the wisest man."—*Scotsman*.

III.—HERODOTUS.

By GEORGE C. SWAYNE, M.A.

"This volume altogether confirms the highest anticipations that were formed as to the workmanship and the value of the series."—*Daily Telegraph*.

IV.—THE COMMENTARIES OF CÆSAR.

By ANTHONY TROLLOPE.

"We can only say that all admirers of Mr Trollope will find his 'Cæsar' almost, if not quite, as attractive as his most popular novel, while they will also find that the exigencies of faithful translation have not been able to subdue the charm of his peculiar style. The original part of his little book—the introduction and conclusion—are admirably written, and the whole work is quite up to the standard of its predecessors, than saying which, we can give no higher praise."—*Vanity Fair*.

V.—VIRGIL.

By THE EDITOR.

"Such a volume cannot fail to enhance the reputation of this promising series, and deserves the perusal of the most devoted Latinists, not less than of the English readers for whom it is designed."—*Contemporary Review*.

"It would be difficult to describe the 'Æneid' better than it is done here, and still more difficult to find three more delightful works than the 'Iliad,' the 'Odyssey,' and the 'Virgil' of Mr Collins."—*Standard*.

VI.—HORACE.

By THEODORE MARTIN.

“ Though we have neither quoted it, nor made use of it, we have no hesitation in saying that the reader who is wholly or for the most part unable to appreciate Horace untranslated, may, with the insight he gains from the lively, bright, and, for its size, exhaustive little volume to which we refer, account himself hereafter familiar with the many-sided charms of the Venusian, and able to enjoy allusions to his life and works which would otherwise have been a sealed book to him.”—*Quarterly Review*.

“ We wish, after closing his book, to be able to read it again for the first time; it is suited to every occasion; a pleasant travelling companion; welcome in the library where Horace himself may be consulted; welcome also in the intervals of business, or when leisure is abundant.”—*Edinburgh Review*.

“ In our judgment, no volume (of the series) hitherto has come up to the singular excellence of that now under consideration. The secret of this is, that its author so completely puts himself in Horace's place, scans the phases of his life with such an insight into the poet's character and motives, and leaves on the reader's mind so little of an impression that he is following the attempts of a mere modern to realise the feelings and expressions of an ancient. Real genius is a freemasonry, by which the touch of one hand transmits its secret to another; and a capital proof of this is to be found in the skill, tact, and fellow-feeling with which Mr Martin has executed a task, the merit and value of which is quite out of proportion to the size and pretensions of his volume.”—*Saturday Review*.

VII.—ÆSCHYLUS.

By REGINALD S. COPLESTON, B.A.

“ A really delightful little volume.”—*The Examiner*.

“ The author with whom Mr Copleston has here to deal exemplifies the advantage of the method which has been used in this series. . . . Mr Copleston has apprehended this main principle, as we take it to be, of his work: has worked it out with skill and care, and has given to the public a volume which fulfils its intention as perfectly as any of the series.”—*Spectator*.

VIII.—XENOPHON.

By SIR ALEXANDER GRANT, Bart.,
Principal of the University of Edinburgh.

“ Sir Alexander Grant tells the story of Xenophon's life with much eloquence and power. It has evidently been with him a labour of love; while his wide reading and accurate scholarship are manifest on nearly every page.”—*The Examiner*.

IX.—CICERO.

By THE EDITOR.

"No charm of style, no facility and eloquence of illustration, is wanting to enable us to see the great Roman advocate, statesman, and orator, in the days of Rome's grandeur, in the time of her first fatal hastening to her decadence, with whom fell her liberty two thousand years ago. The first lines of introduction to this fascinating book are full of help and light to the student of the classical times who has not mastered the classical literature, and in whose interests this book is done, simply to perfection."—*Saunders' News-Letter*.

X.—SOPHOCLES.

By CLIFTON W. COLLINS, M.A.

"Sophocles has now been added to the acceptable and singularly equal series of 'Ancient Classics for English Readers.' Mr Collins shows great skill and judgment in analysing and discriminating the plays of the sweet singer of Colonus."—*Guardian*.

XI.—PLINY'S LETTERS.

By the Rev. ALFRED CHURCH, M.A., and

The Rev. W. J. BRODRIBB, M.A.

"This is one of the best volumes of the series called 'Ancient Classics for English Readers.' . . . This graceful little volume will introduce Pliny to many who have hitherto known nothing of the Silver Age."—*Athenæum*.

"Mr Lucas Collins's very useful and popular series has afforded a fit opportunity for a sketch of the life and writings of the younger Pliny; and the writers of the volume before us have contrived, out of their intimate and complete familiarity with their subject, to place the man, his traits of character, his friends, and his surroundings so vividly before us, that a hitherto shadowy acquaintance becomes a distinct and real personage."—*Saturday Review*.

XII.—EURIPIDES.

By W. B. DONNE.

"This is the twelfth instalment of this admirably conducted series, and one of the very best that has yet appeared."—*Bell's Weekly Messenger*.

XIII.—JUVENAL.

By EDWARD WALFORD, M.A.

"This is one of the best executed volumes of the whole series of 'Ancient Classics,' and exhibits Mr Walford's critical powers in a very favourable light."—*Fall Mall Gazette*.

XIV.—ARISTOPHANES.

By the EDITOR.

"There has been no work yet published which brings the Greek comedian better within the comprehension of the average Englishman."—*Standard*.

XV.—HESIOD AND THEOGNIS.

By the Rev. J. DAVIS, M.A.

"If all the other works of this series are written with the same ability as 'Hesiod,' and 'Theognis,' a very valuable addition, in an unpretending form, will have been made to the literature of the country."—*Saturday Review*,

XVI.—PLAUTUS AND TERENCE.

By THE EDITOR.

"One of the very best of this admirable series that has yet come under our notice. For the first time, indeed, the true meaning and purpose of the works of the two oldest Latin dramatists are thoroughly investigated, whilst the elegance of their phraseology and the unity of their design are equally exemplified."—*Bell's Weekly Messenger*.

XVII.—TACITUS.

By W. B. DONNE.

"Mr Donne's sketch of the life and writings of Tacitus is worthy of the excellent series of 'Ancient Classics' to which it belongs. It is evident that Mr Donne has studied his author deeply and thoroughly, at once recognising his defects and appreciating his merits. The little work before us is a brief but perspicuous summary of the works of the great historian, calculated not only to interest the English readers, for whom it is primarily intended, but also to assist the student who is anxious to make himself acquainted with the history of the first century after Christ. . . . We anticipate for the work a great success."—*Athenæum*.

XVIII.—LUCIAN.

By THE EDITOR.

"The whole series hitherto has been well done, this volume especially so."—*Westminster Review*.

XIX.—PLATO.

By CLIFTON W. COLLINS, M.A.

"In the main, we must congratulate Mr Collins on his success. We know no book of anything like this brevity and cheapness from which a man, reading merely for general information's sake, would get so good a notion of Plato's position in thought and literature."—*London Quarterly Review*.

XX.—THE GREEK ANTHOLOGY.

By LORD NEAVES.

"Of all the 'Ancient Classics for English Readers' that have been published, this volume is in our opinion the most fascinating and suitable for general perusal. It gives the most complete and varied, the most life-like and sympathetic view of Greek thought, habits, manners, and customs."—*Morning Advertiser*.

BLACKWOOD'S CLASS - BOOKS.

GEOLOGY.

INTRODUCTORY TEXT-BOOK OF GEOLOGY. By David Page, LL.D., &c.,	2s. 6d.
ADVANCED TEXT-BOOK OF GEOLOGY. By the same,	7s. 6d.
